UNUSUAL GARDEN IN LANE IS REPORTED

An unusual garden is that of the Carl Gimple family of Spencer Creek community, Gerkins, lemon cucumbers, Savoy cabbage, Danish ball head cabbage, red peppers, garden huckleberries, sprouting and heading broccoli, vine peaches, dewberries, celery, are some of the late vegetables and fruits noted in this well cultivated garden which came about because Mrs. Gimple gave four of her children a few dimes for garden money.

The youngsters studied the seed catalogue long and earnestly, according to Gertrude Skow, county home demonstration agent, and have shown much interest and skill in caring for their garden. Miss Skow has enrolled Mrs. Gimple in the Lane county year-round garden project.

Minister Files Certificate—The ministerial certificate of William Gibb Taylor was filed for record Tuesday at the office of the county clerk.

NOTICE OF FINAL SETTLEMENT

The undersigned, Administrator of the estate of Luella Yarnall, deceased, has filed his Final Account in the matter of said estate with the County Clerk of Lane County, Oregon, and an order has been made and entered of record by the County Court of said County, directing this notice and appointing Monday, the 16th day of November, 1931, at the hour of ten o'clock A. M. for the hearing of objections to said account and the settlement of said estate.

Dated this 15th day of October, 1931.

E. O. POTTER, Administrator of the Estate of Luella Yarnall, Deceased.

POTTER & BAILEY, Attorneys. (O 15-22-29—N 5-12)

Trees for Farm Areas Available

State Forest Nursery Has 11 Species to Be Distributed for Special Planting

Eleven species of trees are again available for distribution from the state forest nursery at Corvallis to farmers of Oregon for use in establishing shelter belts, wind breaks and woodlots all of which add to the appearance as well as usefulness of the farmstead. Thousands of these trees have been distributed over the state in the last few years, many of them now thriving in regions where there are few native trees.

Fall planting of these trees is recommended west of the Cascade mountains where moisture is more abundant and where frosts are not so severe. Planting at this time of year permits the roots to become well established by the time the growing season starts in the spring. In eastern Oregon spring planting is preferred.

Species available for immediate distribution are black locust, green ash, box elder, Russian olive, western yellow pine, Scotch pine, Russian mulberry, western red cedar, Douglas fir, Port Orford cedar, European larch and Norway spruce. The first six named are suitable for eastern Oregon and all will grow in western Oregon, according to Dean George W. Peavy of the school of forestry at Oregon State college, who is in charge of distribution.

Species available for immediate distribution are black locust, green ash, box elder, Russian olive, western yellow pine, Scotch pine, Russian mulberry, western red cedar, Douglas fir, Port Orford cedar, European larch and Norway spruce. Elections Set For Road Districts

Voters in November Will Pass on Proposals for Special Tax Levies

Annual elections in county road districts where votes will be taken as to raising of special levies for road work in the respective districts will be held in Lane in November.

Supplies to the various districts will be sent out from the office of the county clerk this week.

All road district elections must be held in the month of November. Each district may levy a special tax of not to exceed 10 mills on the valuation in the district.
