HOW ABOUT YOUR CHILD?

One child in every five has defective vision. In most cases these children do not know that their vision is at fault and handicapping them. They find it hard to study. They have frequent headaches. They are graded as dull. Naturally they do not get ahead as well as their parents and teachers would like to have them. So it is wise to get your eyes tested and know, not guess, their true condition.

Kelley of the University who is manager for the building.

The Miner building was recently given to the University by the

LAMB CREEP EASILY MADE SAYS O. S. C. SPECIALIST

A lamb creep to be used in supplying young lambs with extra grain to hasten their development may be easily and quickly made with four movable panels commonly found on any farm raising sheep, says Orin M. Nelson, associate professor of animal husbandry at Oregon State college.

One panel is made over into a creep panel by nailing on vertical slats spaced about eight to 10 inches apart. Rounding the edges prevents tearing the wool of the lambs. A creep made of three ordinary 12-foot panels and one creep panel will give an enclosure large enough for 50 lambs as all will not be in the creep at the same time. It is best placed near a shed or in the field wherever the flock ordinarily congregates during the day.
