COW STAKING CAUSES COMPLAINTS IN CITY

The practice which many people have gotten into of staking their cows on vacant lots and along the streets of the city has been causing many complaints to be made at the City Hall lately says Lum F. Anderson. People who stake out their cows should be careful not to let them get on the sidewalks, he says.

Tired Eyes Waste Energy
Nothing wastes energy more than straining your eyes. Common causes of eye strain are nearsightedness, farsightedness, astigmatism, and double vision. All of these can be effectively and quickly remedied by the use of proper glasses.
If your eyes are causing you discomfort you owe it to yourself to have them examined. This will cost you nothing at

This Year IN WASHINGTON BY RADFORD MOLEY

Washington, June 29—President Roosevelt was anxious to have congress adjourn before the 15th, because that was the date for the payment of another installment of the European war debts, and he knew they were not going to be paid in appreciable amount. He didn't want senators getting up and saying unkind things about Europe just at a time when the World Monetary and Economic Conference was meeting in London and we were trying to get on friendly terms with the rest of the world. And the reason some senators did their best to hold congress in session was just to give themselves an opportunity to let loose a lot of anti-foreign fireworks about the debts.

But when the date came, and the debt installments weren't paid—England paid 10 percent, France and Italy nothing, Czechoslovakia and Greece and a few others also 10 percent and Finland alone paid what was due in full—there wasn't any occasion for fireworks. The President accepted what was offered as payment on account, sent a sharp rebuke to France, which is two installments behind, and committed the nation for nothing except what he has said before, that we shall always be glad to listen to any nation which wants to tell us why it can't pay.

New Deal Goes into Action
What this extra session did was more than any previous peace congress has ever done in its whole life, however. And now that congress has passed the burden to the administration, the new deal is beginning to get into action.
Under the new Farm Relief act the Secretary of Agriculture has announced that the reduction of wheat acreage is beginning to be put into effect and that \$150,000,000 will be distributed among wheat growers this year, to compensate them for wheat not produced. This amount will be raised by a processing tax of 30 cents a bushel levied on the millers, who will not be permitted to pay less than market price for wheat. They will add the processing tax to the price of flour, which is calculated to add about 1/2 cent to the consumer's cost of a pound loaf of bread.
Cotton in the fields is to be destroyed, probably as much as 25 percent of the 1933 crop, and growers compensated out of the proceeds of a processing tax of 4 cents a pound laid on spinners, who are to tack it on to the price of cotton goods.

Federal Home Loans
The Federal Home Loan Bank Board has been set up under the direction of William E. Stevenson. If anyone owning a home has a mortgage on it he can refinance that mortgage under proper conditions with government funds, up to 80 percent of the appraised value, if the mortgagor will accept 4% Government bonds for his money. A market will be maintained for the bonds if anyone needs to convert them into cash. Mortgages will have to pay nothing on the principal of such loans for three years, then pay them off in 15 annual installments at 5%. If the distressed mortgagee needs cash for back taxes or repairs the government will lend cash for both purposes.

Contracts are being prepared now for the spending of the \$3,300,000,000 appropriated for public works. Four hundred million dollars of Federal roads construction is to start at once, as well as the building of all the naval craft which we are allowed under our treaties amount to another \$200,000,000. The administration proposes to get the entire \$3,300,000,000 of additional money into circulation as speedily as possible.

Industry to Resume
Under the Industrial Recovery Act all industrial concerns in the nation are now organizing themselves, with Government aid, into trade associations for the adoption of standard codes of practice, hours of labor and minimum wage scales. In order to get factories going at once. Any industry that won't play can be forced to come in under the rules approved by the majority and the government. The expectation of Washington is that a million men a month will be put back at work, beginning now.

Under Joseph B. Eastman, formerly chairman of the Interstate Commerce Commission and now Federal Coordinator of Railroads, the task of reorganizing the railroads into regional systems, and in general trying to make them more efficient, has been started. One of the first things the railroads did was to announce another pay cut, making a total reduction, effective next November, of 22 1/2 percent in railroad wages.
The only "inflation" thus far in effect is the acceptance of silver at 50 cents an ounce in payment of foreign debts to the United States. Each 50-cent ounce of silver will make about \$1.19 in silver dollars, which will be the basis for that much in silver certificates. But unless the agreements arrived at in London result in putting the currencies of the rest of the world up to where they were, with relation

TOWN AND VICINITY

Minor Operation—John Porter underwent a minor operation at the office of a Springfield physician.

Ill at Goshen—William Cornelius of Goshen is quite ill at his home this week.
