court at Portland. illegal under the present law, but each manufacturing unit must be are by necessity turning more and licensed by the federal government. This license costs so much that only the large-scale manufacturers find it profitable to purchase them.

It is doubtful is any of the smaller still operators could qualify for a federal license either with product or quantity.

Feeding Cost

Are you satisfied with the re-sults you are receiving from your present feed? Are you getting by? Do you desire to lower your feed-

Do you desire to lower your feeding costs?

Here is a low priced home mixed dairy feed which we recommend as a good combination to be fed with your roots, silage or hay crops: 2 sacks Mill Run, 1 sack Coconut Meal plus dairy minerals. If you have surplus oats, barley or wheat, take some of your home grown grains to your feed dealer and trade for Coconut Meal, feeding as follows: 4 parts your home grown grain and 1 part Coconut Meal plus dairy minerals. Your feed dealer will grind and mix this for you.

To the poultry farmer we recommend the following low cost home mixed growing feed: Mix 2 sacks Mill Run with 1 sack Coconut Meal and 1 sack sun cured Alfalfa Meal, plus poultry minerals.

All of the above feed mixes may be fed with your surplus akimmed milk with excellent results. Why not figure these savings?

See your feed dgaler; he has all these feeds. Write P. O. Box 443. Portland, Oregon, for FREE booklet "The Feeding of Coconut Meal For Profit".
