It Needed Explanation.

A Kansas Citian relates that recently while on a trip about the environs of San Diego and Coronado beach in a sight seeing motor car, the driver pointed out various land holdings, buildings, hotels, etc., as the property of J. D. Spreckels Jr., the sugar magnate. Even the road over which they bowed was privately owned by Spreckels. As the car, following the winding road, drew near the bay, a little girl asked: "Mama, who owns the bay?" Mama smiled and said, "Why, dearie, God owns the bay." "Well," said the puzzled child, "how did he get it away from Mr. Spreckels?"

Louisville, Ky.—"I think if more suffering women would take Lydia E. Pinkham's Vegetable Compound they would enjoy better health. I suffered from a female trouble, and the doctors decided I had a tumorous growth and would have to be operated upon, but I refused as I do not believe in operations. I had fainting spells, bloated, and could hardly stand the pain in my left side. My husband insisted that I try Lydia E. Pinkham's Vegetable Compound, and I am so thankful I did, for I am now a well woman. I sleep better, do all my housework and take long walks. I never fail to praise Lydia E. EMPLOYERS TO AID NEW DEFENSE PLAN

Trained Army of 800,000 Men At Uncle Sam's Call.

60-DAY VACATIONS FOR ALL WORKERS

Security of Positions and Earnings Is Essential Part of Proposition Now Interesting Officials.

Washington, D. C. — Employers throughout the United States—corporations, manufacturers, professional men, tradesmen and business men of all classes—are to be asked to contribute as their share in the national defense permission for their employees to engage, without serious financial loss, in two months' military training during each of three years.

This is an essential part of the administration's plan for raising a citizen army of 800,000 men in six years, which, with the regular army of 140,000 men and 300,000 reserves, would give a trained force, exclusive of state militia, of about 1,200,000 in the event of war.

The success of the plan, officials admit, depends not on the appropriation of congress, for its cost will be comparatively small, but on the patriotic response of employers to whom an appeal will be made to furlough as many men each year, at different seasons, as they can spare and who wish to join the proposed continental army.

Administration officials are confident that, even though it is proposed to enlist only 133,000 men in the year in the continentals, or a total of nearly 800,000 in the first six-year period, more than that number would be attracted by the outdoor life of a military camp if they could be assured by their employers that their positions would not be lost and their earnings seriously decreased.

The proposed enlistment requires two months' service for each of three years and liability for service during the remaining three years only in event of war.

The army plans for more than 1,000,000 trained men in six years, and the navy program of ten dreadnoughts and six battle cruisers within five years, both of which will be presented to congress with the indorsement of President Wilson, were the absorbing topics of interest here.

New Radio Dispenses With Masts.

San Francisco.—A wireless telegraph invention eliminating the construction of the present towering steel structures for sending and receiving by simply projecting a wire along the ground for a short distance is announced here by R. B. Woolverton, United States radio inspector. In collaboration with Palmer B. Hewitt, of Hollister, Cal., Mr. Woolverton has been experimenting for months with the new apparatus.

According to its discoverers, the new method has proved eminently successful in receiving messages from Honolulu, Sayville and Arlington, Va. An absolute freedom from static conditions has been achieved in the reception of messages.

England Demands 3,000,000 Men.

London.—"Great Britain needs 3,000,000 more men by spring."

This declaration was made Monday by Brigadier-General Sir Eric Swayne, director of recruiting in the northern command, in a speech at Hull.

General Swayne estimated that Germany still has between 9,000,000 and 10,000,000 men from the ages of 18 to 45, and that, therefore, it was useless to talk about wearing out Germany. In the spring, said he, Germany would lose more men than the allies, which would balance the numbers of the allies and the central powers, but if Great Britain should raise 3,000,000 additional men, Germany probably would recognize that it would be fruitless to continue.

Wilson's Yacht Refitted.

Norfolk, Va.—To be ready for service in case President Wilson decides to spend a part of his honeymoon on the ocean, the yacht Mayflower is being fitted up at the Norfolk navy-yard.

The vessel will have a new coat of paint added inside and out. Her machinery will be overhauled and her boilers cleaned. Her cabins and saloons will be renovated and she will take on some furniture, including a piano, before she sails for Washington. She will leave here the latter part of the week.

Park Visitors Doubled.

Washington, D. C.—Reports show that more than twice as many persons visited the national parks of the west during the season just closed than last year.

The Yellowstone park recorded 51,820 tourists, compared with 20,250 in 1914; Yosemite 31,642, against 15,145; and Mount Rainier 34,314 against 15,638. Secretary Lane said the policy of permitting automobiles to enter the parks had been a success and would be continued.

Fruit Is Shipped South.

New York.—A shipment of apples and pears from Northwestern states, consisting of 60,000 boxes, or about 2000 tons, left here on the steamship Vestris for Rio Janeiro and Buenos Aires. The shipment of fruit is said to be one of the largest made to South America via New York in many months.

Women Triumph in Kansas.

Out in Kansas where they strive to please, the women ought to have small cause for complaint if it is possible to deprive the sex of that inalienable right.

Here are some of the things a woman of the Sunflower state may legally do:

Can take back her maiden name after her husband is dead, without any legal process or legislative act.

Can keep her own name when she is married.

Can persuade her husband to take her name and give up his family name if she does not like it.

Can keep her maiden name and her husband can keep his.

Can retain her maiden name for business transactions and use her husband's name for social affairs.

If wife does not like either her own or husband's family name they can change to a name that does suit.

A woman can wear men's clothing without any restriction except that she must not pose as a man.

She can vote at every election.

She can hold any office in the state and run for congress.

As Kansas probably puts it, a woman there can do almost anything a man can. That's so. The men's clothing provision even permits her to scratch a match as some men do. Only thing she seems debarred from is "posing as a man," which is impossible, of course, for most of them, at least.

Wheat Farmers Holding Firmly.

Portland.—The Merchants Exchange was closed Tuesday on account of the holiday. The country wheat markets were also quiet.

Grain farmers in the interior are holding their wheat firmly in anticipation of higher prices. They have followed this policy for the first two months of the season and are well satisfied with the results. As most of them are independent they are not likely to upset values by a general selling movement. As an indication of the way supplies are being held back in the country it is cited that on the lines of the Spokane & Inland railway there are now 1,366,676 bags of wheat, against 940,000 bags at this time last year.

Broomhall in his weekly international review says:

"The general position of the market is about unchanged with the undertone strong and an advancing tendency."

"The evidence is becoming increasingly plain that the world's supply of wheat will be abundant for the season, and the abnormally large receipts in both the United States and Winnipeg of spring wheat indicate that the period of scarcity is about ending and recent large purchases, in a quiet way, indicate that a good share of these supplies will eventually reach the United Kingdom."

"The urgent demand, which is becoming pronounced, from Mediterranean countries, and the extraordinary strength in freights, may prevent any immediate decline."

Potato Crop Condition Lower.

The government's monthly crop report estimates a lower condition, as compared with the 10-year average, for potatoes in the Pacific coast.

For the entire United States, the indicated yield for 1915, based upon average averages for October, is 368,151,000 bushels, compared with the September 1 estimate of 405,909,000, the final estimate on 1914 crop of 405,921,000 and the five-year average of 357,000,000 bushels.

Statistics as to potato crop conditions in the western states follow:

State	Cond'n	Cond'n 10-Yr. Avg.
Oregon	82	91
Washington	87	84
California	85	87
Idaho	84	88
Nevada	81	89
Utah	70	75
Montana	80	85
Colorado	81	88
Wyoming	87	84

For the United States as a whole, the condition on October 1 was 74.2, on September 1, 82.7 and the 10-year average, 76.4.

Plenty of Grapes on Street.

Grapes of all kinds were abundant during the past week, and sold well at steady prices. Among the receipts were good pack Tokays from Grants Pass, which brought \$1 per crate.

A few small shipments of Southern Oregon cantaloupes are arriving, standard selling at \$2 and flats at 85 cents.

Onion prices have been advanced 10 cents on the street and will go higher. There is a limited shipping trade in potatoes at steady prices.

Several cars of new-crop California walnuts arrived in sacks and cartons.

Couldn't Forget It.

"Saturday night some miscreant lugged off a whole cord of my wood, and somehow I can't forget it," declared Elias.

"Have you tried to forget it?" inquired his friend.

"Yes. Sunday morning I went to church, hoping I could get it off my mind, and before I had been there five minutes the choir started in singing 'The Lost Chord' so I got out."—Judge.

Judges' Wigs.

The wig is only worn by English barristers to give them a stern, judicial appearance, and no one can say that it fails in this respect. The custom was originated by a French judge in the seventeenth century when, happening to don a marquis' wig one day, he found it gave him such a stern and dignified appearance that he decided to get one for himself and wear it at all times in court. This he did, and the result was so satisfactory from a legal point of view that not only the judges, but barristers also, took up the custom throughout Europe.—London Graphic.
