> Now, out of deference to the feelings of certain peculiarly sensitive people, the tunic is worn a little longer, so as

nearly to hide the masculine garment,

the head-dress is a little neater, and, in addition, a short jacket is worn. The dress is certainly not picturesque, but as a means to an end, as allowing the utmost freedom of motion and obviating accidents, it is beyond all praise. Nevertheless, the women themselves are conscious of its incongruity, and

ing it for ordinary female attire as soon as they get home from work. It has happened before now that while proceeding to or from work they have, some of them, been made the subject of attack by somebody with an undue proportion of tongue to brain, but-this may be said with safety-never more

than once by the same individual. In addition to possessing a highlyvigorous vocabulary they are so hardened with exposure to the weather and developed by the nature of their work that they can give a good account of themselves, even though a fight should ensue, and the opponent may have reason to admit, with benefiting humility, the wisdom of Providence in endowing women generally with the will and keeping from them the power.-Cassell's Saturday Journal.

-"You think you know yourself, my boy, but you don't." "O, yes, I do. 1 know all the best people around here.' - Harper's Bazan Ha Bi
