The American Wool Reporter talks about the extreme cheapness of clothing in the United States, and tells us that any time during the past four years \$10 would have bought a better suit of clothes in the United States than in any other country. This is a valuable statement from a journal which has steadily sympathized with democratic tariff policy.

American manufacturers have not yet got wages down to the point where they can be certain of successfully competing with foreign mills. Until that reduction in wages is made, the American mills will continue to buy sparingly of wool. The necessary reduction in wages will probably be deferred until the new tariff on woolen goods takes effect in January.—Philadelphia Press.

Among the exhibitions at the late state fair, that was visited by the curious, was a sort of side show affair, labeled "The Downfall of Man." When he of the curious mind reached the inner side of the flamingly advertised "Downfall," all that he could discover, we are told, was a broken whisky bottle, a deck of cards and two or three pictures. They do say that Wm. Brenner and Al Moore were among the visitors, and took great delight in telling about it.

The city council of Portland has enacted an ordinance placing a license tax upon nearly every conceivable class or kind of business that is carried on in the city. With double and triple taxation on what the citizens of that city eat, drink or wear, to which a tax upon what a man does is added, leaves but the air they breathe untaxed. The most probable result from such action on the part of the city fathers, will be a falling off in the number of her business men and a decrease in her population.

Murder at Albany.

ALBANY, Or., Sept. 25.—Two young gentlemen returning from a reception at the college about 11:30 P. M., Monday night, found the body of a man in the alley back of the United Presbyterian church with his feet on the walk. Thinking the man drunk, they went for Nightwatchman Jones. Dr. J. L. Hill and son, returning from a call, arrived at the place soon after and found the man was dead.

There was a bullet-hole in the left side, under the heart. They sent for the acting coroner, Judge J. C. Powell. On the body was found a Masonic pin, Masonic diploma and a receipt from the Corvallis lodge, A. F. & A. M., showing the man was E. H. Burnham. In one of the pants pockets were some keys, and a knife in the other. In the hip-pocket was a handkerchief. There were \$1.35 in loose silver and a watch-key in one vest pocket, but no watch. The body was taken to the engine-house, where an inquest will be held in the morning. It was plainly a case of murder and robbery.

Mrs. Crouch, living in the house opposite the church, heard a shot and some one cry for help, and awakened her husband, but others found the body before he reached there. The body was still warm when found.

The facts brought out by the coroners investigation pointed rather more in the direction of suicide than to that of murder. He had lived in Corvallis for the past 15 or 18 years, was a painter by trade and a reliable man. He was a member of the Corvallis Masonic lodge, also of the G. A. R. post at Santiago Cal. The jury rendered a verdict of suicide. The body was taken to Corvallis for burial.

A Disastrous Fire.

One of the most disastrous conflagrations visited Portland last Sunday, that she has had since the two great fires laid block upon block of her business houses in ashes. Sunday's fire occurred on the water front of Albina, and the entire wharfage, about one half mile in length, the Pacific Coast elevator with 1500 tons of wheat, the railroad coal bunkers and contents, 40 loaded freight cars and 20 empties burned to the ground. It is thought that three employees of the elevator company were burned in the building. The several losses which were generally well insured are as follows:

Pacific Coast Elevator	\$ 450,000
Wheat in elevator	75,000
Warehouse and contents	40,000
40 laden wheat cars	100,000
20 empty cars	40,000
Cars and electrical machinery	76,000
Coal bunkers and coal	27,500
Tracks and platform	26,000
Steamer Willamette Chief	7,500
Wharves	150,000
Miscellaneous	14,000
Total losses	1,000,000

Famous Woman.

Mr. W. M. Hyle, recently from Los Angeles, California, arrived at the Scio Hotel last Sunday evening. He had in his possession and placed on exhibition, what purported to be a perfectly petrified woman, and said to have been found by a Mexican sheep herder in the mountains in Northern Mexico. The petrification shows a large and remarkably well formed woman, feet 1 inch in height, and weigh over 415 pounds. He also exhibits pieces of rock taken from the same vicinity, that appears to be exactly of the same quality of rocky formation as the defunct Astec woman, that Mr. Hyde claims this to be. Whether this specimen of genus homo is what it purports to be or not, it is well worth the trifling consideration required by the exhibitor, to see it.
