## ABOUT MINES AND MINING.

### Alaska Gold in Relation to Affecting Prices.

"What effect will the new gold yield have upon prices?" is a question which is being debated by statesmen and financiers. The North American Review treats the subject at length and draws the deduction that even though the Alaska yield is enormous it will not affect prices to any noticeable degree. It reasons that there are too many avenues open to the use of gold—its monetary use, among the arts and the foreign demand for it to ever change prices. The article says:

With a gold production for 1897 estimated at \$240,000,000, it is evident that the new goldfields will have to prove exceptionally productive in order to add a great percentage to the world's annual supply of gold. If they should yield \$60,000,000 per year, carrying the total annual production to \$300,000,000, they would still be adding only 25 per cent to the previous annual increase. The effect of new supplies of the precious metals is greatly restricted by the fact that the additions have to be set against the whole mass already in existence. An addition of 25 per cent to the annual production of wheat or corn, or even of more permanent industrial products, like iron or copper, would have a marked effect upon prices. Gold is undoubtedly influenced, like all other articles, by the law of supply and demand, but the supply in any one year is only a small addition to the amount already in the market. All the gold of the world used as coin or bullion in monetary exchanges is constantly in the world's money market, capable of being purchased by commodities directly or by slight premiums in rates of exchange.

It has been shown that the visible stock of monetary gold existing in the world today is about \$4,860,000,000. Reasons will soon be given for thinking that another sum of \$1,000,000,000 is concealed in private hoards. The mathematical elements of the problem, therefore, are: An aggregate gold production within historic times of \$9,000,000,000; a visible supply of gold in use as money of \$4,860,000,000, and a possible annual increase of the supply from \$40,000,000 in 1897 to \$290,000,000 in future years.

The second question—what portion of the new gold will be devoted to monetary uses—suggests the interesting inquiry, what has become of the difference between the whole amount of gold produced and the amount now visible in coin and bullion? The amount to be accounted for is \$4,860,000,000 and represents more than half of the gold which has been produced since 1492. There are three channels through which this difference has been absorbed, which may be briefly treated thus:

**American Gold.** It is estimated that the British have made no money out of mining in this country. They should not send over the proverbial younger son, and luxurious mine managers, who "dress for dinner" in remote mining camps and have French chefs, and violinists to soothe them during the hour of digestion. Americans are mining to better advantage here; they are mostly plain, practical men, and when they buy a mine they send one set of experts to check up another, and then pay a price for the property, and no more.—Mexico City Herald.

**Brought in Samples.** Mr. Cole, of the Copper creek mining district, Shoshone county, Washington, has brought to Messrs. Collett and Sebecki, of Portland, samples of ore from the 20-foot level of the Yellow Bird shaft, which assayed 15 per cent copper and \$13 in gold. Mr. Sebecki and Mr. Collett expect to take the machinery for a smelter on the ground just as soon as the trail can be put in shape. There are a number of promising properties in Copper creek district in which Portland parties are interested.

**State Mining Boards.** Mr. Hatcher, of Portland, believes it would be of great assistance to the mining interests of Oregon and Washington. Like others, Mr. Hatcher realizes that

## ABOUT IRREGULARITY.

**A Chat With Miss Marie Johnson.** The balance wheel of a woman's life is menstruation. Irregularity lays the foundation of many diseases, and is in itself a symptom of disease. It is the greatest importance that regularity be accounted as soon as possible after the flow is an established fact.

Lydia E. Pinkham's Vegetable Compound is the greatest regulator known to medicine. "My health became so poor that I had to leave school. I was tired all the time, and had dreadful pains in my side and back and I was also troubled with irregularity of menses, and I lost so much flesh that my friends became alarmed."

"My mother, who from experience is a firm believer in the Pinkham remedies, thought perhaps they might benefit me. I followed the advice Mrs. Pinkham gave me, and used Lydia E. Pinkham's Vegetable Compound and Liver Pills and am now as well as I ever was."—Miss MABEL F. JOHNSON, Centerville, Pa.

**PINKHAM'S CURE FOR CONSUMPTION.**

## THE BARK ALMY LOST

Forty Passengers and Crew Are Missing.

### WAS BOUND FOR COPPER RIVER

Supposed to Have Been Struck by a Heavy Gale Which Was Blowing Off Golden Gate.

San Francisco, March 24.—Upon the arrival of the Pacific Coast Steamship Company's steamer Santa Rosa, from San Diego today, the news was received here of a horrible accident incidentally attributed to the Alaskan gold excitement, which is believed to have cost the lives of 40 passengers and sailors. Captain Alexander, of the Santa Rosa, reported that early this morning, while nine miles off Point Bonita, at the mouth of the Golden Gate, he sighted a derelict, bottom up.

The tug Sea Witch was immediately dispatched to the point indicated, and found the derelict to be the bark Helen W. Almy, Captain Hogan, which sailed hence for Copper river points with 27 passengers and a crew of 13, on Sunday last. The bark lay upon her starboard side, with her stern low down in the water, her deck hamper badly wrecked, and several planks of her hull washed loose by the seas which broke over her.

While there were no signs of her boats, it is not believed that her passengers and crew escaped by putting off from the vessel in them, as there has been a very heavy sea for several days past. Furthermore, no word has been received from the survivors, if any exist, although the derelict was sighted within 10 miles of this port and fully 48 hours have passed since the wreck occurred.

According to the tugboat men, there was a pretty stiff breeze when the Almy sailed out of the Golden Gate Sunday, and at night it was blowing a gale. She left here under topsails, and when last seen was standing out for an offing. There was a heavy sea running, and it is supposed that sometime during the night she struck a squall and turned turtle.

The Helen W. Almy was once a South Sea trader, and was quite famous for her many adventures among the reefs. Her commander was Captain Luttrell, and he operated her in the interest of John Wightman, who retained an interest in her when she entered the Alaska trade. She was in good condition for an old vessel and perfectly seaworthy. She was on the drydock some days before being put on the berth, and her owners spent \$3,000 in repairing her. She had a temporary house on deck.

When the Almy left port she had 125 tons of ballast which she carried, besides the provisions of the passengers and their outfits. She was a vessel of only about 250 tons, and was therefore ballasted sufficiently to make her "stiff."

### WILL NOT STARVE.

Supplies in Immense Quantities to Be Sent to Alaska.

San Francisco, March 25.—During the coming season the Alaska Commercial Company proposes to get 15,000 tons of supplies up the Yukon and distribute them among its various trading posts. Last year 20,000 tons were forwarded, but most of this was started late in the season, after the Klondike excitement began, and some thousands of tons got no farther than St. Michaels.

This year the company will have 18 river steamers moving with heavy loads at the earliest possible moment. Five will be new ones. They were built on the Ohio river, and have been shipped to Unalakleet. They are expected to make four round trips between June 11 and the freezing time.

The company's fine new 2,500-ton ocean steamer St. Paul, now being built at the Union Iron works, will be launched at midnight on April 6. The Northwest Telegraph and Transportation Company, the Wear-Gage corporation, is expected to keep up with the older rival, the Alaska Commercial Company, in the way of supplying the people of Alaska with the necessities of life, and from present appearances there will be no lack of food next winter in the frozen gold fields of the north.

## WEEKLY MARKET LETTER.

Trade Conditions in the Leading Cities of the World.

The feature of the week in the wheat trade has been the attempt to make the bull clique stand firm under the market. The attempt has been an absolute failure, for the Letter crowd have stood in the breach and bid \$1.04 for May wheat and took all they could get at that price. The "barring" of houses representing Letter was a sign of lack of confidence on the part of the bears. They know that the clique is simply able to pay for all the wheat it takes, but probably they do not wish to add to the incentive which the clique already has to run prices up. A rather severe break has occurred in the other reports, but aside from the better crop options from the southwest the news has not been bearish. Foreign markets have been remarkably firm and the constant purchase of wheat by foreigners at the seaboard bespeaks a genuine demand. The addition to the contract stock looks bearish, but it must be admitted that a very small percentage of the total receipts grades up to the standard. Some may wonder why Letter withdrew his support from the July option. Probably because he anticipated a hard fight on the May deal, and considered it a foregone conclusion that a hedge in the May wheat will bring the July back into line in a hurry.

The crop situation is looming up against the price of deferred futures, and the excellent prospects are a strong inducement toward loosening up farmers' holdings and to putting out of line of shorts.

**Portland Market.**  
Wheat—Walla Walla, 74@75c; Valley and Blumstein, 77@78c per bushel.  
Flour—Best grades, \$3.50; Graham, \$3.40; superfine, \$2.35 per barrel.  
Oats—Choice white, 36@37c; choice gray, 33@34c per bushel.  
Barley—Feed barley, \$17@18.50; brewing, \$20 per ton.  
Rye—Timothy, \$18 per ton; middlings, \$22; shorts, \$18.  
Hay—Timothy, \$12.50; clover, \$10 @11; Oregon wild hay, \$9@10 per ton.

Meats—Choice dressed beef steers, 8c; cows, 7@7 1/2c; mutton, 8 1/2c; pork, 7c; veal, small, 8c.

Poultry—Chickens, live, per pound, hogs, 12c; dressed, 14c; turkeys, live, 12c; dressed, 16c.  
Fresh Fish—Halibut, 6@7c; steel heads, 7@8c; scalmon trout, 12 1/2c; flounders, 4@5c; rock cod, 8c; smelt, 3@4c; herring, 4c.  
Olympia oysters, per sack, \$3 @ 3.50.  
Corn—Whole, \$23; cracked, per ton, \$22; feed meal, \$23 per ton.  
Barley—Rolled or ground, per ton, \$23; whole, \$22.  
Flour—Patents, per barrel, \$4.25 @ 4.50; straights, \$4.00; California brands, \$4.65; Dakota brands, \$5.40 @ 5.75; buckwheat flour, \$6.  
Bran, per ton, \$17; shorts, per ton, \$18 @ 19.  
Feed—Chopped feed, \$18 @ 20 per ton; middling, per ton, \$24; oil cake meal, per ton, \$25.  
Hay—Puguet Sound, new, per ton, \$12 @ 14; Eastern Washington timothy, \$18; alfalfa, \$13; straw, \$7.  
Wheat—Feed wheat, per ton, \$23.  
Oats—Choice, per ton, \$23.

**San Francisco Market.**  
Wool—Nevada, 11@13c; Oregon, 12 @14c; Southern coast lambs, 7@8c.  
Hops—12@17 1/2c per pound.  
Middlings—Middlings, \$20 @ 22.50; California bran, \$16.00 @ 18.50 per ton.  
Onions—Silverskins, \$2.00 @ 2.50 per cental.  
Eggs—Store, 11 1/2 @ 12c; ranch, 12 1/2 @ 13c.  
Butter—Fancy creamery, 18 1/2c; do seconds, 17c; fancy dairy, 16 1/2c; good to choice, 15 @ 16c per pound.  
Cheese—Fancy mild, new, 9 1/2c; old, 9c per pound.  
Fruit—Apples, 40c @ \$1.40 per large box; grapes, 23 @ 30c; Isabella, 60 @ 75c; peaches, 80c @ \$1; pears, 75c @ \$1 per box; plums, 20 @ 25c.  
Potatoes—Early Rose, 55 @ 75c.  
Citrus Fruit—Oranges, navel, \$1.25 @ 2.50; Mexican limes, \$5.50; California lemons, choice, \$2.25; do common, 50c @ \$1.00 per box.  
Hay—Wheat, \$18 @ 22.50; wheat and oat, \$18 @ 21; oat, \$14.50 @ 16.50; best barley, \$17 @ 19; alfalfa, \$10.50 @ 11.50; clover, \$12 @ 13.50.

**Dear Sir:**  
"Pahaw" he said; "that's nothing. Why, when I was a boy I fell out of a third story window and struck right on my head. Of course it hurt me some at the time, but I got over it all right." "How do you know you got over it all right?" his wife asked. "It's bare-ly possible that you would have had ordinary good sense if that hadn't happened to you."—Cleveland Leader.

## DEATH IN THE FLAMES.

Many Killed and Injured in a Hotel Fire in Butte.

Butte, Mont., March 25.—The Hale house, a large three-story brick building on East Broadway, used as a lodging and boarding-house by miners in the employ of the Anaconda Company, was entirely destroyed by fire, which broke out shortly after 3 o'clock this morning. So far as known, two men are dead from injuries in jumping from windows, another is dying and 20 are missing, while a search of the ruins may disclose the fact that many transient lodgers lost their lives also. The casualties were as follows:

Dead—  
Matt Doyle, aged 43, miner at the Mountain Consolidated, jumped from third-story window, turned over in the air and struck on head.  
Frank Kinley, aged 40, lately from Portland, Or., jumped from third-story window, turned over and struck on head and shoulders, fracturing his skull; dying.  
Hugh Boyle, aged 30, miner at Anaconda mine, started to lower himself from third-story by means of improvised rope, which parted 50 feet from the ground. He was just recovering from the effects of a broken leg through an accident a month ago. Six men were severely injured.

There were 250 men and women in the building when the fire broke out. Of these, it is believed about 200 escaped without injury. The fire started in the bakery south of the center of the building, and had a good start before discovered. The blaze was first discovered by Billy White, Jake Yuch and Jack Dooley, who were awake at the time, and, smelling smoke, went down stairs to make an investigation. Two of the men immediately attached a small hose to a hydrant and began to throw water upon the fire.

After a few minutes' work, however, the men realized that the task was a hopeless one, and they retreated to give the alarm. They ransacked the watchman and rushed to the upper portion of the building, shouting that the house was on fire. By this time, the fire had broken through the first floor, and smoke filled the hallways. Dooley and his companions realized that there was no time to lose, and they began kicking in the doors of the rooms. The men thoughtfully awakened the women help first. By this time, the alarm had been turned in, and the department responded promptly. When the firemen arrived, men in their night clothing and others half-dressed were clambering down the fire escapes in the rear. Others, and the servant girls were at the windows in the front of the building, frantically calling for help. They were cut off from the rear of the building by the dense smoke. Ladders were run up, but not before many of the frightened people had jumped. Others, including all the female help, were gotten out by the firemen. On the side of the building, many had made ropes of their bed clothes and sought to escape in that way. Some of them succeeded, but in other cases the ropes broke and the men dropped many feet to the ground.

### A SERIOUS BLAZE.

A Jersey City Railroad Depot Damaged to the Extent of \$100,000.

New York, March 25.—The Pennsylvania railroad depot in Jersey City was damaged by fire early today to the extent of \$100,000. The mammoth train shed and large office building escaped. Much mail matter was destroyed. Train and ferry traffic is seriously crippled. All of the frame portions of the depot, with the shed covering the approach to the several ferry slips and the waiting-room and restaurant, were destroyed. The rolling stock was promptly run out of the shed when the fire was discovered, and the ferry boats were simultaneously hurried out into the stream and over to this city.

There were several acres of glass on the roof of the big train shed, and, being melted and cracked by the intense heat, it fell upon the frames and made their work more perilous. The Keystone restaurant, where the greatest damage was done, was one of the most spacious and handsomely fitted up restaurants in the country.

### Railroad to the Yukon.

San Francisco, March 25.—At a meeting of capitalists interested in the construction of a railroad to the Yukon country, W. C. Alder presented a report based upon recent explorations and observations made during an exhaustive surveying trip to Alaska, and showing that a route up Copper river was not only feasible, but practicable. It was decided to organize a party of surveyors who are to start as soon as the weather conditions will permit, probably by May 15. The programme is to start for Orosi and proceed up Copper river to its head, and thence across to the Yukon to its junction with American boundary line.

### From Copper River.

Seattle, March 23.—The schooner General Siglin arrived tonight from Copper river. Captain Johnson states that 300 people have crossed the Valdes glacier and are now making their way into the interior. The day the Siglin left Copper river, which is now 600 inhabitants, the theft of a quantity of bacon had been discovered. Notices were being posted that the thief if caught would be hanged.

### Would Affect France.

London, March 23.—St. James's Gazette, commenting on the mobilization of the French fleet, suggests that it may be connected with the Spanish question, and says: "If trouble between Spain and the United States should become acute, it would precipitate issues of great moment for France."

### Secretary Gage's View.

Pittsburg, March 22.—Secretary of the Treasury Gage, in an interview, said that if it was shown conclusively that the Spanish government was responsible for the destruction of the Maine, the United States would declare war within 15 minutes. Gage thought the report of the board of inquiry would be made in a few days.

Rhinometers are devices to measure the amount of air a man breathes through his nose, in order that his doctor may compare it to the amount he should take in that way.
