For Dairyman.

Mr. H. West of Seapooose has a two-year-old heifer that promises to make the champion cow of Oregon. She calved about the first of March and is now giving about 34 pounds of milk per day and the milk tests five per cent butter fat. She is not receiving extra care nor unusual feed and it is altogether probable that she will give 400 pounds of butter for her first year. Mr. West is to be congratulated on his success in breeding so valuable an animal. For a number of years he has been carefully breeding his herd on scientific principles with a view to the development of butter-producing capacity, and he is securing the results for which he has been working.—Rural Spirit.

It would be a pleasure to milk such a cow and also profitable.

There is good money in handling cows if one has good ones.

Our Creamery management is doing every thing to make the business a success, but could do much more if the patrons would furnish milk all the year.

Mr. M M Williams of near this city milks 8 head of cows that pays him \$30 per month. This is a good showing, and proves that cows, when taken care of will pay for their feed and something besides. Our Creamery pays spot cash has an established reputation in the markets and if properly patronized by the farmers will prove a fine thing for the community. Dairy farming in the East is considered the most profitable of all farm products. Get a dairy paper.

Oregon's Sailor Boys.

Among the brave marines in Dewey's fleet are the following Oregon boys: Lieutenant C. P. Rees, of the cruiser Baltimore, is a Marion county boy.

Guy Osborn, of Salem, a son of W. H. Osborn, was also a participant in this most decisive battle, he being a handsman on board the cruiser Concord.

Garfield Sutton of Albany, for some time a residence of this county also saw some of the fight, being in the marine corps on board the protected cruiser Baltimore.

Claude Taylor, a Salem boy was also in the fight; he is a step-son of Ex-State printer F. C. Baker.

About 60 men are employed at the government fortifications at Scarborough head. The work of placing in position one of the two guns that were recently sent there is delayed, the carriage for it not yet having arrived. The guns are 8 inch bore and about 20 feet long.

The Blue And The Gray.

At the G. A. R. parade to escort the O. N. G. boys to the depot yesterday, Ed. Goins was discovered on the other side of the street while the G. A. R. boys were forming in line, and immediately the cry went up "come over here Ed, and fall in." And he came and with Fred Heis—the two old confederate soldiers in Albany marched with the boys who wore the blue as happy as clams in high water. There are no divisions between the blue and gray now. They are one in patriotism.—Herald.

LATEST FROM THE WAR

As the Dispatches Gave It From Day to Day.

Hurrah For Dewey

May 3.

A World dispatch from London says: England has been staggered by Commodore Dewey's overwhelming victory. The superiority of the United States squadron was recognized, but it was fully believed that it would have been more than counterbalanced by the assistance afforded the Spanish fleet by the submarine mines and the powerful shore batteries. The splendid seamanship and valor of Commodore Dewey in forcing an entrance to Manila harbor in the face of these defenses excited admiration while among naval experts the dispatch with which the American squadron disposed of the Spaniards is held to prove that Commodore Dewey employed the resources at his command with the highest possible amount of effectiveness.

Lord Charles Bessford said: "It was a brilliant stroke. Everything, as I said to you before, depends upon the man, in modern naval warfare Dewey is an able officer. He brought his command warships with him. He thought out and planned the whole affair with consummate skill and foresight."

The cabinet meeting today resulted in a decision to await the report of Dewey and then send him the number of troops necessary to enforce control of the Philippines. For these purposes the Pacific slope transports will be used, and it is expected that at least 5000 will be enroute within the next 10 days. There does not seem to be any doubt as to the government's purpose to hold the islands pending a final settlement with Spain, when they will be used as collateral to secure payment to the United States of a war indemnity.

A resolution was introduced in the house today thanking Commodore Dewey and promoting him to be an admiral.

Some one too mean to live and yet not fit to die, sawed down ten of the new telephone poles recently put up on Dr. Hill's place near Sodusville, along the motor track. They were sawed about four feet from the ground thus rendering the poles valueless, making them too short to be raised again.—From the Criticon.
