P. J. Corbett, of San Francisco, father of the celebrated fighter, Tuesday morning, shot and killed his aged wife probably while asleep in bed. It was a very cold blooded affair, but was properly supplemented by his shooting himself. The old man was probably insane.

A. M. Young, opened up his bowling alley Tuesday eveing, and the pins fairly flew until midnight Sam Shore started out be the champion of the evening, but THE NEWS pencil pusher didn't do a thing but beat him two out of three. N. T. Higgins, manager of Johnston & Co's. planing mills, assisted by the well known machanic, Thos Claxton, have just completed a very handsome desk and book case combined for G. L. Sutherland. The DeVaney-Goins threshing crew planked the bridge in this city before crossing with their engin, but two other machines have passed through it the present season to which our notice has been called, without taking the trouble to plank. Miss Persie Wing, a school teacher of Washougal Wash., was drowned while bathing in the serf at seaside, near the mouth of the Columbia, last Monday. H. S. Johnston & Co, have just added a large iron frame band-saw to the equipment of their planing mill. These people never loose an opertunity to add improvements for the better equipment of their mill and each addition serves to enable them to manufacture something additional in their line. We doubt if there is now a more complete mill for doing all kinds of work to be found in the Valley

The DeVaney-Goins threshing crew reports the following grain threshed the first of the week: Mart Bilyeu, wheat and oats, 850 bushels, on 50 acres; W. C. Miller, 1414; Jackson Bilyeu, wheat, 854, oats and cheat, 587. The machine is now in the "Bilyeu den," where they have about 10 days work. The average of the three crops above mentioned was 25 per cent below that produced on the same ground last year.

B. F. Childs, of the Star Cheese factory, of Brownsville, was introducing his cheese here this week, and left some of it at S. M. Daniel's store. Mr. Childs is talking of arranging with the Scio Creamery company, whereby he will have supervision over the creamery and will add a cheese factory, and manufacture both cheese and butter. If such a combination is effected the farmers will realize a higher price for their milk, and no doubt many of the farms now raising wheat will be converted into dairy farms, as the manufacture of chees has been demonstaited to be more profitable than grain farming. Many of the datrons of Mr Child's factory at Brownsville have realized as high as $6 and $7 per month per cow. We are surely in hopes that the arrangements may be completed.

In a preavious issue of THE NEWS we mentioned the fact that Thomas Allison had just about as neat a cottage as could be found in a days drive, but we said nothing regarding the work done on the building. It has been our pleasure to inspect the interior finish of the building this week and examine the work done there by H. L. Sumner, and we can say without exaggeration that it is by far the best finished house that we have visited in many days. The house is clothed and papered, and this alone is an exceptionally good piece of work, the paper, instead of being turned in the corners, is cut and matched, and laid over a four inch strip of paper which had previously been fitted into the corners and firmly pasted. The wood work is finished in natural color, first thoroughly filled with an oil filler, and finished with a flowing coat of rubbing varnish, the varnish coat being very heavy and leaving the surface as smooth as glass. It is without doubt the best peice of work in this section and is indeed a credit to the workmanship of Mr. Sumner.

The prune crop in this vicinity is going to be short. The fruit is falling, in some orchards the fruit is withered on the trees, and in some instances trees appear to be dying. There is great difference of opinion as to the cause. Some say it is caused by neglect, others that the opposite is true, too much cultivation. Whatever the cause may be it is to be hoped it will be discovered and a remedy found.
