

Pimples

Are the danger signals of impure blood. They show that the stream of life in the body is impure. Clear the course by taking Hood's Sarsaparilla and the blood will be made pure, complexion fair and healthy, and life's journey pleasant and successful.

Hood's Sarsaparilla

Is America's Greatest Medicine. It is for all Hood's Pills cure Indigestion, Biliousness

ITEMS OF INTEREST.

A pen carrying a small electric lamp to prevent shadows when writing has been patented in Germany.
Children never enter or leave a coach, street car or other public vehicle without bowing to all its occupants.
A Brighton (England) young man has killed himself because his wife made fun of him for kissing the servant girl.
It is estimated that since the beginning of the historical era 13,500,000 persons have perished for sarthapines.

STATE LEGISLATURE.

Proceedings of the Extra Session of Oregon Legislatures.

The regular routine was followed in both houses of the legislature Wednesday, and about 11 o'clock both houses adjourned till Thursday to enable members to accept the invitation to attend the state fair. In the senate 44 bills have been introduced and in the house 20.

The Senate.
The senate met at 10 A. M. Bills were introduced as follows:
By Dufur, resolution calling for 90 sets of the Oregon code for the use of the legislature; action deferred by consent.

By Kuykendall, resolution providing that the senate sessions be opened with prayer. By Driver, to provide for the display of the American flag on the schoolhouses of the state.
By Haseltine, resolution providing that 100 copies of the rules of the senate be printed; adopted.
By Dufur, providing for a committee of three in the matter of the senate journal of 1897; adopted.
By Leoney, to provide for the working of state convicts upon the public highways. By Daly of Benton, regulating tax sales of lands mortgaged to the state; read second time by title, and referred to the committee on public lands.

By Haseltine, to provide for the regulation of the sale of municipal lands under default. By Taylor, bill to incorporate the city of Pendleton.
By Dufur, amending the statute in reference to trespass on telephone poles and wires. By Kuykendall, to define the qualification of the voters at school meetings and kindred subjects on public buildings.
By Haseltine, amending the Portland charter. By Dufur, for protection of grouse and prairie chickens. By Daly of Benton, asking the secretary of state to supply senators with \$2 worth of stamps and \$1 worth of newspaper wrappers; adopted.

By Reed, providing for the return to the secretary of state of codes ordered in the morning. By Bates, to amend the statutes in relation to returns of sales by executors and administrators of estates. By Harmon, to provide for the resignation of electors, and kindred matters.

A message from the house concurring in the resolution providing for an examination of the books of the secretary of state was received and filed. The chair announced as a special commission on examination of the act on books and accounts, Senators Taylor and Kelly, and on examination of the books and accounts of the penitentiary, Senators Patterson and Howe.

The House.
Upon the meeting of the house Wednesday morning several committees were appointed on minor matters, and the introduction of bills was begun. Speaker Carter announced the members of the committee on investigation of state offenses.

On motion of McCulloch, the joint resolution referring to the committee on food fishes was withdrawn from the senate, pending a reconsideration of the matter. These bills were introduced:
By Moody—Providing that an attorney from outside states who is a practitioner in the highest courts, may appear as an attorney in an action in Oregon.
By Stillman—To incorporate the city of Pendleton and repeal the act now in force relating to the Umalla county delegation.
By Ross—To establish in the city of New York a fiscal agent for the state of Oregon and other civil corporations of this state, the agent to be appointed by the governor.

By Young—To provide for the discharge of judgment liens on real estate.
By Young—Providing for the protection of elk, and making the closed season from January 1, 1909, to December 31, 1910, after that time the closed season is to be during December of each year.
By Tapping—To provide the times, etc. for holding teachers' examinations.

By Flagg—Fixing the salaries of Marion county officers.
By Kruse—To increase the facilities for the alleviation and cure of disease, and repealing all acts in conflict therewith.
By Virtue—Protecting hotel and innkeepers against delinquent guests.

THE NEW CHARTER BILL.
Portland Measures Introduced in the State Senate.
The Portland charter bill, introduced in the senate by Haseltine Thursday morning, provides for several important changes in the administration of city affairs. The salary of mayor is to be reduced from \$5,000 to \$4,000 per year, city attorney from \$5,000 to \$2,400, to take effect after present terms expire. The city treasurer's office is to be abolished, and the present municipal court, costing \$3,000 for the judge and \$1,500 for the clerk, is to be superceded by a police court, the judge of which shall receive \$1,800 and the clerk \$1,200. Municipal Judge Hennessey's term of office is to expire three days after the act shall take effect, and the mayor is to appoint his successor. Thereafter, however, the police judge shall be elected by the voters.

An Overworked Brain.

From the Record, Princeton, Ind.

Determined to rise in his chosen profession as an educator, Ernest Kemper, of Princeton, Ind., overtaxed himself mentally and physically. He was ambitious, his mind was always on his work. From early morn until late at night he continually poured out his brain.
"Burned the candle at both ends."
Few persons, even with the strongest constitutions, can keep up under such a strain.

In addition to his studies, Mr. Kemper was teaching school some three miles from his home. Finally, his excessive study and the exposure of going to and from school in all kinds of weather undermined his health. He was taken to his bed with pneumonia and his overworked brain almost collapsed. For several weeks he was seriously ill.

Mr. Kemper had taken root in his system and his mind was in a delicate condition. He was sent to Colorado where he spent three months without receiving any benefit. Then a noted specialist from Cleveland treated him without avail, and then a hospital in Chicago was tried, but all absolutely without benefit. Finally his physician recommended Dr. Williams' Pink Pills for Pale People, and from the first box he began to improve.

When he had taken nine boxes he was completely cured. This famous blood and nerve medicine had accomplished what all his former expensive treatment failed to accomplish. Mr. Kemper says his catarrh has entirely left him; he is strong again and weighs nine pounds more than he ever did. He gives the pills the entire credit. He is starting teaching again and feels abundantly able to continue the work. To prove that the above is true in every respect, Mr. Kemper made an affidavit as follows:
Subscribed and sworn to before me this 10th day of September, 1907.

R. P. WATT, Notary Public.
We doubt if these pills have an equal in all the range of medicine, for building up a run down and debilitated system.
Five Dollars Postage for Letters.
W. F. Bailey contributes an article to the October Century on "The Pony Express," from St. Joseph, Mo., to San Francisco. Mr. Bailey says: The letters, before being placed in the pockets, were wrapped in oiled silk to preserve them from moisture. The maximum weight of any one mail was 20 pounds, and this was rarely exceeded. The charges were originally \$5 for each letter of one-half ounce or less; but afterward this was reduced to \$2.50 for each letter not exceeding one-half ounce, this being in addition to the regular United States postage. Specially made light-weight paper was generally used to reduce the expense.

Special editions of the Eastern newspapers were printed on tissue paper to enable them to reach subscribers on the Pacific coast. This, however, was more an advertisement, there being little demand for them at their necessarily large prices.
A Thorough Sport.
The Deacon—"Young man, don't you know that there's a rainy day coming?"
Spendthrift—"Maybe there is, but I've got \$5 that says the weather man won't call that turn. Come, now, if you've got any nerve show your money."

If you want the best windmill, pumps, tanks, plows, wagons, bells of all sizes, boilers, engines, or general machinery, see our write JOHN FOLEY, foot of Morrison street, Portland, Oregon.
Lotteries in Old Havana.
In Havana the stranger's attention is arrested by the vendors of lottery tickets, who stand on the street corners with a pair of shears in one hand and sheets of lottery tickets in the other, ready to cut off any number for buyers. They are very aloof, and are apt to persuade the credulous that they will draw a fortune in the scheme. These licensed lotteries are one of the great evils there, especially to the Spanish people, who seem to be born gamblers, and for whom the chances of dice, cards, and lottery tickets appear to have an irresistible charm, all classes in Havana dealing in them habitually.

No household is complete without a bottle of Famous French Whisky. It is a pure and wholesome stimulant recommended by all physicians. Don't neglect this necessity.
Seymour Keyes, a postmaster at Manhattan, N. Y., has an apple tree which was brought from Holland in the 17th century. It still bears fruit.
Under the laws of China the man who loses his temper in a discussion is sent to jail for five days to cool down.

In Persia a bonfire plays an important part in the marriage ceremony, the ceremony being read over in front of it.
Foreign authorities assert that tuberculosis is prevalent in all countries, irrespective of climate and other conditions. In Europe Professor Leyden states that it is responsible for at least 1,000,000 deaths annually.
Coronum, a chemical element hitherto found only by spectroscopic examination in the sun's corona, has been found by Mount Vesuvius. It is supposed to be much lighter than hydrogen.

A joint resolution by Myers was read, providing for a committee of three from the house and two from the senate to investigate and report to the regular session of the legislature in relation to food fishes and the legislation necessary for their propagation and protection.
A concurrent resolution by Beach was read, providing for a committee of three from the house and two from the senate to investigate the penitentiary.

A resolution by Stillman was read, requesting that the governor, secretary of state and state treasurer submit their financial estimates, which are required for the appropriation bill, not later than Friday.
A concurrent resolution by Dayer was read, providing for a committee to investigate the state treasurer's office. It was referred to the committee on resolutions.
A concurrent resolution by Massingill was read, providing for a committee to investigate the military board. It was referred.

Crabs of Cuba.

These crabs are larger than a sea-crab, and live entirely on the land. They run with great speed, even outstripping a horse. At seasons of the year they migrate in large bodies from one side of the island to the other, in columns sometimes half a mile wide, and so dense as almost to stop a carriage on the road they may be crossing.

These columns overcome every obstacle in their direct line of march, even high mountains. It is supposed that these migrations are prompted by the instinct of propagation, as the crabs seek the sea shores, deposit their eggs, and cast off the old shell. These crabs are so common about the city of Matanzas that the inhabitants often receive the sobriquet of "cangrejo." They are frequently found in the houses, and in some cases even under the beds.

There is a species of conch which makes similar marches through the country in immense bodies. These are called pirates, from a very curious habit they display. This creature, which resembles a snail, has the ability of detaching itself from the shell, which, for some reason, it temporarily leaves attached, and while its house is thus vacant, another, passing, will back its body, tail foremost, into the empty shell, and keep possession.

The Pony Express.
At first the schedule was fixed at 10 days, an average of eight miles an hour from start to finish. This was cut down to eight days, requiring an average speed of 10 miles. The quickest trip made was in carrying President Lincoln's inaugural address, which was done in seven days and 17 hours, an average speed of 10.7 miles per hour, the latest time of any one letter being 120 miles, from Smith's Creek to Fort Churchill, by "Fony Bob," in eight hours and 10 minutes, or 14.7 miles per hour. Considering the distance and difficulties encountered, such as hostile Indians, road-agents, floods, and snowstorms, and accidents to horses and riders, the schedule was maintained to an astonishing degree. The service created the greatest enthusiasm not only among the employes, but also in the ranks of stage employes, freighters, and residents along the route. To add a "pony" in difficulty was a prize, and well to the man who would so much as throw a stone in the way.

Uncle Sam's Watch Dog.
At the United States naval laboratory is an expert official at the head of a department—probably the most perfect of its kind in the world—whose duty is to keep in hand for the use of the navy thoroughly tested chronometers, a work which requires much care and attention six months in the year. For this purpose, says The New York Sun, a temperature room is connected with the chronometer and time service department, in which the testings are made, under the influence of a hydro-metric condition of the atmosphere. Comparisons are made daily between 11 and 11:40 o'clock, morning, with the mean time standard clock, and the errors and rates are worked up once a week from these mean rates calculations being made and comparisons to the nearest quarter of a second. The temperature is closely observed each day and recorded for the previous 24 hours by a chromometric thermometer, and by self-recording maximum and minimum thermometers. The room is heated by circulation of hot water, the fuel being gas, and is cooled by an ice refrigerator when a temperature is required below that of the outside atmosphere. For the six colder months the temperature room is kept within a range of two degrees.

Reduction in Bicycle Prices.
It is said that western capitalists are now lowering the organization of bicycle companies, which have to make (practice) and sell them as low as \$15.
A hair restorer, or rather an article, a hair restorer, is worked up once a week from these mean rates calculations being made and comparisons to the nearest quarter of a second. The temperature is closely observed each day and recorded for the previous 24 hours by a chromometric thermometer, and by self-recording maximum and minimum thermometers. The room is heated by circulation of hot water, the fuel being gas, and is cooled by an ice refrigerator when a temperature is required below that of the outside atmosphere. For the six colder months the temperature room is kept within a range of two degrees.

Latest for the Toilet Table.
The newest arrangements for ladies' toilet table is that tireless article, a hair restorer, or rather an article, a hair restorer, is worked up once a week from these mean rates calculations being made and comparisons to the nearest quarter of a second. The temperature is closely observed each day and recorded for the previous 24 hours by a chromometric thermometer, and by self-recording maximum and minimum thermometers. The room is heated by circulation of hot water, the fuel being gas, and is cooled by an ice refrigerator when a temperature is required below that of the outside atmosphere. For the six colder months the temperature room is kept within a range of two degrees.

FITS Permanently Cured.
No more nervousness. After first day a use of Dr. King's Great Peppermint Cure, bottle and bottle and bottle, 108 R. H. RILEY, 121 E. Arch Street, Philadelphia, Pa.
A curious fact has been noted by arctic travelers. Snow, when at a very low temperature, absorbs moisture and dries garments.

I never used so quick a cure as Pina's Cure for Consumption. J. B. Palmer, Box 1171, Seattle, Wash., Nov. 25, 1906.
In Sweden there are floating canneries. They are small vessels, which follow fishing fleets, and men on them can fish while they are fresh.

Foreign authorities assert that tuberculosis is prevalent in all countries, irrespective of climate and other conditions. In Europe Professor Leyden states that it is responsible for at least 1,000,000 deaths annually.
Coronum, a chemical element hitherto found only by spectroscopic examination in the sun's corona, has been found by Mount Vesuvius. It is supposed to be much lighter than hydrogen.

A Beautiful Present. In order to further introduce ELASTIC STARCH (Flat Iron Brand), the manufacturers, J. C. Hobbiger Bros. Co., of Rockville, Iowa, have decided to GIVE AWAY a beautiful present with each package of starch sold. These presents are in the form of Beautiful Pastel Pictures. They are 13x19 inches in size, and are entitled as follows: Lilacs and Pansies. Wild American Poppies. Pansies and Marguerites. Lilacs and Iris. These rare pictures, four in number, by the renowned pastel artist R. LeRoy, of New York, have been chosen from the very choicest subjects in his studio and are now offered for the first time to the public. The pictures are accurately reproduced in all the colors used in the original, and are pronounced by competent critics, works of art. Pastel pictures are the correct thing for the home, nothing surpassing them in beauty, richness of color and artistic merit. One of these pictures will be given away with each package of purchased of your grocer. It is the best laundry starch on the market, and is sold for 10 cents a package. Ask your grocer for this starch and get a beautiful picture. ALL GROCERS KEEP ELASTIC STARCH. ACCEPT NO SUBSTITUTE. The Most Surprising Jacket. That double faced stuff with striking plaid on one side and downy white on the other, makes a most surprising jacket, and a walk through the country on a crisp winter day would be a delight thus attired. The jacket is made plaid side out, though the inside of the collar, the revers and the straps show white. It is double-breasted and will warrant to make one long to face a blizzard in it. Undoubtedly the most bewitching, sanest hat is a sable lined felt affair, which just shades the eyes enough. Its only trimming is any quantity of airy black net, which has been plaited until it can be fantastic enough. All this smartness, which you, of course knew, was only an excuse and a back-ground for one finishing touch, is set off by a brilliant sprinkling of vivid wings poised well in front.

PISOS CURE FOR COUGHS AND COLDS. CURE FOR BRONCHITIS AND CONSUMPTION.

Why don't you use money=back tea? A Schilling & Company San Francisco
