Stockholders Meeting.

The annual meeting of the stockholders of the Scio Creamery company, was held at the Masonic hall on Saturday of last week, and at which the following officers were elected: S. M. Daniel, pres; J. S. Morris, secy; R. E. Hilder and E. A. Powell, directors. It was decided to put forward every effort which would be of advantage to the creamery and its patrons. The prospects for the coming season's run are much better than in the past, and many new patrons are promised. The creamery should be patronized by every farmer who can profitably reach it, as the difference in the price of home-made butter and that made by a creamery will more than pay for the extra trouble and expense of getting the milk to the creamery.

What One Family Has Done.

Some twenty-two years ago they arrived in Junction City, from Missouri, a German family by the name of Strone—Abraham Strone, his wife and five child, four boys and a girl, the oldest boy at that time being 16 years of age, the youngest boy 10 years. On their arrival at this place the family did not have to exceed \$25. They worked out and rented land for a few years, then purchased land and at this time the old gentleman has 400 acres of land with good improvements. The young men are all located with in a few miles of Junction City. The oldest son has a farm of 200 acres house and barn that cost \$2,400, another has a farm of 250 acres, with buildings that cost \$1,500, another has 200 acres of land with good improvements, and the other one has 200 acres one mile from Junction City the best of land and good buildings. These parties are all out of debt, not one of them is worth less than \$7,000. They are all industrious, sociable and enterprising citizens. There are others no doubt that have done equally as well, but these people living in our immediate vicinity and being personally acquainted with them we know that we have not over estimated them in any way. We mention these facts to show what can be done in the way of farming in Oregon.—Junction Times.

Bernhard Walther gave a most successful and enjoyable recital. Mr. Walther is one of our cleverest violinists, whose work is always appreciated because it is artistic. His rendition of the various numbers was delightful, his execution in the Rubinstein trio being especially commendable—Mercury, Liverpool, Eng.

A very enjoyable party was given at the city hall on Saturday evening by a number of our young people. Mr. Flagg is waving in the right direction. He has introduced a resolution in the legislature providing for the retention of waste baskets, spittoons, inkstands, etc. at the end of the session. It should pass. At the same time it is a great slam on the members of the legislature. A man intelligent enough to be elected to the legislature ought to be above such smallness without any resolution.—Democrat.

How to Prevent Pneumonia.

You are perhaps aware that pneumonia always results from a cold or from an attack of la grippe. During the epidemic of la grippe a few years ago when so many cases resulted in pneumonia, it was observed that the attack was never followed by that disease when Chamberlain's Cough Remedy was used. It counteracts any tendency of a cold or la grippe to result in that dangerous disease. It is the best remedy in the world for bad colds and la grippe. Every bottle warranted. For sale by Peery & Peery.

J. W. Britain, of Portland, was in Scio this week looking over the city with a view to locating and establishing a photograph gallery here. He found the field fully as good as he expected, and on Wednesday made up his mind to locate. Scio has long been without a photograph gallery, and it is our belief that Mr. Britain will receive the patronage due him.

Electricity Water Power.
Clear lake, 75 miles north of San Francisco and 1,317 feet above the sea level, having its outlet at Cache creek, a stream supplying 27,000,000 gallons of water daily, is to have its force translated into electricity, sent on overhead copper wires, 20,000 horse-power and upward, to the motors at San Francisco, besides doing lots of work all around the region and on the line of transit. On the way the waste water is to irrigate hundreds of thousands of acres of land, making it bud and blossom like the rose. The water will be shot through Pelton wheels, which will be connected directly with the dynamo, the latter being among the largest and most powerful known. The transmission of electricity under the waters of the bay has been an intricate and difficult problem, but has found its solution, and now presents no obstacle of serious character.

PEOPLE... Can't be Gulled!

We are still at the old stand, and selling loads of goods. People appreciate RIGHT prices. We buy our goods as cheap as MONEY will buy them, and sell them accordingly. Many good people tell us, after comparing, that our goods are yet cheaper than our comped's after they take off their alluring "20 per cent discount." And that's the size of the matter. The fellows are just coming to the prices we have always sold at when they make a reduction of twenty per cent....
