

Durability is Better Than Show.

The wealth of the multi-millionaires is not equal to good health. Riches without health are a curse, and yet the rich, the middle classes and the poor alike have in Hood's Sarsaparilla a valuable assistant in getting and maintaining perfect health.

BITS FROM ABROAD.

The value of the fruit consumed in Great Britain every year is estimated at £10,000,000.

The queen of Italy, says a gossip, weighs 176 pounds; Queen Victoria, 171 pounds; the queen of Spain, 143 pounds, and the queen of Belgium, 143 pounds.

There is a quicksilver mine in Peru 170 fathoms in circumference and 450 feet deep. In this profound abyss are streets, squares, and a chapel where religious worship is held.

It appears that they are to have a new form of field sport in England, as several gentlemen are buying themselves in the process of training man-hunting bloodhounds. As the sport is followed on horseback it will probably be supplementary to—if not a substitute for—fox-hunting.

It is apparently almost as difficult for a tradesman to gain entrance to Marlborough house, the London residence of the prince of Wales, as it is to get within the lines of an armed camp. A narrow glass door in the right wing of the palace is reserved for such visitors, and only those having an appointment previously arranged for by the prince's valets are admitted.

The Light That Failed. Yawper now keeps a grocery, but he loves to tell how near he came to being a great actor. "In a natural election," he tells, "I was elected for the reason I found it pretty easy to get a good part in a fair theatrical organization. I went through all rehearsals like a star and the manager predicted all kinds of success for me.

PACIFIC COAST NEWS

Commercial and Financial Happenings of Interest to the Growing Western States.

To Control the Market.

There are negotiations on foot at Vancouver, B. C., for a very large beef deal, which, it is said, may result in a combine and a subsequent rise in prices. The sale will affect Victoria and Vancouver, and will tend to bring the most business of both cities under the control of one company. The lead of the alleged negotiations is F. Burns, whose headquarters are at Nelson, B. C. It is stated by business men who are on the inside of these negotiations that it is the intention of Mr. Burns to control the market of the coast.

A new phase in the salmon-canning operations has just cropped up at Vancouver, B. C., and may result in a completion of affairs which was unlooked for. Every indication points to the run of sockeyes being large, but if it is, the canners will be unable to cope with it, owing to the shortage of tin plate. Not a single box of tin plate can be found on the Pacific coast. Across the line it has been very scarce, and the market is now depleted.

Idaho Wool Sales. The following wool sales have been made at Mountain Home during the past few days: representative of Eastern, Hays & Chittin, 110,000 pounds; J. C. Costa, 60,000 pounds; William Kunnecke, 80,000 pounds; J. L. Gray, 20,000 pounds; Fred Halverson, 8,000 pounds; Mrs. Nettie Pinkston, 14,000 pounds. The prices paid ranged from 9 to 11 cents, or 2 cents less per pound than was paid last summer.

To Sell Farming Mills. A company has been organized and incorporated at Moscow, Idaho, called the Idaho Grain & Seed Cleaning Company, to handle the grain-cleaning mill which has lately been introduced. This company has bought the right to sell this machine in the three states of Idaho, Montana and Wyoming. The mills will be manufactured at Walla Walla, but the sales of these mills will be made from Moscow.

New Brickyard. A new industry has been established at Trail, B. C. A. C. Luff and Richards have installed at that place a brick-making plant, which is in complete running order and is turning out 20,000 bricks a day. There is a great demand for brick that the availability of adding machinery sufficient to increase the plant to a capacity of 40,000 per day is being considered.

New Gas Plant. The gas company at Butte, Mont., will at once put in the best and newest plant that money can buy, thereby doubling the capacity of the present plant. The new plant will also produce a higher candle-power gas. The plant is so planned that it can be extended as the city grows without requiring reconstruction, as is the case with the present outfit.

New Incorporation. The Montana Snacks Condensing Company, of Missoula, Mont., has been incorporated by Charles Eaton, H. W. McLaughlin and William F. Hughes. The capital stock is fixed at \$100,000. There is a great demand for brick that the availability of adding machinery sufficient to increase the plant to a capacity of 40,000 per day is being considered.

Creamery in Operation. The Union creamery and cheese factory at Union has been completed and is now in operation. The plant is situated in the eastern part of the city and is very conveniently located for the creamery business. It has a capacity for handling the milk from 300 to 500 cows, and will no doubt prove of great benefit to the farmers and dairymen of that vicinity.

Estimates Being Made. James Pyle, representing a Minneapolis manufacturing firm, is in Lewiston, Idaho, making estimates for the machinery for the new 125-barrel mill. It is the intention of the proprietors to let the contract for the building as soon as the machinery is decided upon. The new mill will probably be in operation by the middle of September.

Bond Election. The special school election at Sand Coulee, Mont., resulted in the bonding proposition being defeated. It was for the issuance of bonds in the sum of \$2,000, bearing interest at the rate of 6 per cent, redeemable in seven years, payable in five years. The money was to be used for the improvements to the schoolhouse at that place.

Northwest Notes. Chinook is to have a band. Oregon Woolgrowers' Association is flourishing. Southern Oregon has had a much-needed rain. The Spokane Exchange bank has change hands. Tillamook county complains of "awful" roads. The Roseburg Soldiers' Home is filled to its capacity. Some wheat near Umatilla is over three feet high. A saloon at Everett, Wash., was robbed of \$100. The Albany postoffice will become a second-class one. Wet weather is killing the young Chinese peasannts. An 11-year-old has been settled in Hupper courts. Marion county wool has been sold for 13 and 14 cents. Astoria wants the annual encampment of the O. N. G. There is said to be plenty of time yet for a flood in the Columbia river. Railroad agents are thick at the Dalles to solicit stock shipments. The little schooner-rigged boat Coke, about 30 feet long and of only five tons measurement, has sailed for Manila from San Francisco. Captain Freitch, the sole occupant of the vessel, proposes to make a tour of the world in the apparently frail cockle-shell which he constructed with his own hands. He claims to have crossed the Atlantic in a vessel of even smaller dimensions.

THE BEAUTIFUL YET-TO-BE

Sometimes, in hours of solitude, The soul can bear a song From nature's sweet eyes have viewed A world devoid of wrong. A world devoid of wrong. In the absence of the night, In dreams we seem to see The dawn of right and glorious light Of the beautiful yet-to-be.

It baffles the soul with heavenly bliss, Unmixed with earthly ill, And gladly as a mother's kiss It clothes its parting soul. Beyond the gloom of present days We fancy we can see The peaceful haze and pleasant ways Of the beautiful yet-to-be.

We see a world where virtue thrives; We hear the grand refrain From the harmony of happy lives, And catch the sweeter strain Of the melody of honest worth. The music of innocent glee And childish mirth that will gladden the earth In the beautiful yet-to-be.

Where youth and maid will be free to woo And win the crown of life, And whisper the secret, ever new, Of the melody of honest worth. Mid-singing birds and fragrant flowers, While white's young dream is free From hostile powers in lovely bowers Of the beautiful yet-to-be. —Chicago Chronicle.
