

# WOMEN OF THE UNITED STATES

## Regard Peruna as Their Shield Against Catarrh, Coughs, Colds, Grip and Catarrhal Diseases.

MRS. BELVA A. LOCKWOOD, LATE CANDIDATE FOR THE PRESIDENCY.

Mrs. Belva Lockwood, the eminent barrister of Washington, D. C., is the only woman who has ever been a candidate for the Presidency of the United States. She is the best known woman in America. As the pioneer of her sex in the legal profession she has gathered fame and fortune. In a letter to The Peruna Medicine Company, she says:

"I have used your Peruna both for myself and my mother, Mrs. Hannah J. Bennett, now in her 83th year, and I find it an invaluable remedy for cold, catarrh, hay fever and kindred diseases; also a good tonic for feeble and old people, or those run down, and with nerves unstrung." Yours truly, BELVA A. LOCKWOOD.

Catarrh may attack any organ of the body. Women are especially liable to catarrh of the pelvic organs. There are one hundred cases of catarrh of the pelvic organs in one case of catarrh of the head. Most people think, because they have no catarrh of the head, they have no catarrh at all. This is a great mistake, and is the cause of many cases of sickness and death. "Health and Beauty" sent free to women only, by The Peruna Medicine Co., Columbus, Ohio.

### The Ark Not Found.

Little might it be thought that the Emerald Isle was suspected of entombing any relic of Bible times. But the imagination of some one has been more active and eccentric. In County Meath there is a loyal mound of the kind of Tara, on which, for 1,000 years the kings of Ireland were crowned. A gentleman named Glover, who has obviously developed some strong symptoms of British Israelism, was convinced that the Ark of the Covenant lay buried beneath the mound, and, consequently, proceeded on a subterranean expedition in search of the lost treasure. But, after extensive excavations, which the landlord permitted and the board of works had no legal power to prevent, and after weeks of fruitless search, the fancied explorer gave up his quest.

### The Holographic Fashion.

The clergyman had finished and the organ was pealing forth the sonorous strains of the Mendelssohn march. "One moment, George," said the radiant bride, and facing the audience, she raised her exquisitely bound though somewhat bulky prayer book in her daintily gloved hands and pointed it directly at the brilliant audience. There was a sharp click.

"All right, George," said the bride, "come along."

And as they marched down the aisle she showed him that the supposed prayer book was a paper book at all. It was a camera!

"It's my own idea, George," she whispered. "Clever, isn't it?"—Cleveland Plain Dealer.

According to a chemical analysis 15 parts of the flesh of fish have about the same nutritive value as 12 parts of leanest beef.

## FLORICULTURE.

### The Census Bureau Desires of Preparing Returns of Last Year's Statistics.

Owing to the unusual intelligence of florists as a class, and the fact that the statistics of their business which the census office requires, relate almost entirely to the year 1909, a plan has been formed for taking an early census of floriculture by mail, on special schedules, and to tabulate and publish the returns thereof early, while other branches of the great work of enumeration are in progress.

There are approximately 10,500 florists in the United States. The names and addresses of a majority of them have been secured and classified by the division of agriculture in the census office, and each known proprietor will soon receive a copy of the special schedule devoted to this interest. It will be accompanied by a list (so far as ascertainable) of all the florists in his section, to be by him corrected, added to and returned to the department for use in making the record complete and reliable.

This special schedule is not elaborate or complicated. It may be filled out easily and quickly by any florist who keeps a reasonably accurate record of his business. It asks for the 1909 acreage devoted to floriculture and of each crop or variety of plants and flowers; the total area in square feet under glass and the area of each crop or variety of flower or plant raised thereunder; the number of persons employed and the total wages paid to them; the amount expended for catalogues, postage and fertilizers, respectively, and the gross receipts from the sales in each subdivision of the business.

No private individuals will be permitted to have access to the schedules after they have been filled out and returned, nor will the names of persons or firms giving information be published in the census report. Figures only will be used and published, and the entire process and record of gathering information will be confidential. As the law requires the regular enumerators to obtain certain information as to tenor value, etc., during their visits in June, the next census of floriculture, if the florists themselves shall be prompt and conscientious in filling out and returning the special schedules soon to be sent to them, will be the most perfect in history.

They will be put to no expense, as the necessary stationery, with envelopes properly franked, will be provided for their use.

### Dawson to Skagway on a Wheel.

The second man from Dawson to Skagway over the ice with a wheel arrived in Skagway, and is related over the prospects of the hike for us on the trail, says the Alaskan. He says the automobile is being talked of in Dawson for use on the interior roads, one advantage over horses is it is hoped it may have in the land being the elimination of fuel bills. H. B. McLennan is the man who brings the news.

Mr. McLennan rode a great part of the distance on the wheel, and predicts the hike will be a big factor in winter travel on the Yukon. He recommends it to any one wishing to make a quick trip without freight or much baggage.

He was 14 days making the trip, but predicts that after the lakes are all frozen and the roads are packed well and the roughness worn off the trip between Dawson and Bennett should be made without any great effort in from five to six days.

The first 100 miles out from Dawson, says Mr. McLennan, "was a good traveling. Then on either side of Selkirk for 20 miles the road was very rough. This side or that the road was very good, save for 10 miles of the Dominion cut-off. The Canadian Development Company is cutting down with axes and mattocks the 10 miles of rough road along this side of Selkirk, and Thamberton is cutting down the other side, thus making the stretch on both sides suitable for double teams. Sledding is good from Caribou through to Dawson, and the road in all places, except those mentioned as rough, is a rule packed hard and smooth as a pavement. All freight on wheels is blocked now. Thamberton and Stewart is being moved to Dawson in sleds, also some from Five Fingers. The Klondike will be a greater producer next season than ever, as much dear work done in primary development last year will count next. Steam thawsers will help, and sulphur, gold run and Dominion promise to rank among the star crooks."

### Pacific Coast Chat.

Lake county, Oregon, pays \$4.25 a week each for the keep of its paupers. The Lake county court last week put its O. K. on 721 bounty scapes—one cougar, 47 wildcats and 673 coyotes.

What was Watson postoffice receipts were \$10,355.43, and in 1909, \$12,732.10.

The quarterly report of Pierce county shows receipts of \$326,000, of which \$100,000 goes to Tacoma as its share of the taxes.

There is talk of putting in two new salmon canneries at Blaine. One of the plants, if built, will be operated by Oregon men.

A San Francisco firm advertises in some Eastern Oregon papers for "50,000 rabbit and hare-skins during the winter months."

The Walla Walla News thinks that "when wool can be produced profitably at 8 cents a pound," sheepmen are "doing fairly well at 16 cents."

A Stellacome farmer last week picked raspberries from bushes growing on his farm. The berries ripened perfectly and tasted as well as any gathered in the summer.

Several county newspapers have had occasion to notify delinquent subscribers that the office woodpile is getting low, even if the winter is mild.

A good-sized herring run was on last week, and the Pacific American Fish Company put up 15 barrels for the Eastern markets.

The state board will soon meet to consider plans for repairing and enlarging the building for defective youth at Vancouver. The present structure is too small to accommodate the pupils, and many children have been refused admission.

## DEMAND IS QUIET.

### Freeze, However, Cautious Steady in Nearly All Lines of Trade.

Bradstreet's says: Quietness as to domestic buying and stock trading as to prices is still the leading feature in trade lines, a condition it might be remarked not uncommon at this stage of the year, which is a sort of middle ground between stock-taking and inventory time and the actual opening of the spring season.

Aggressive strength in prices is confined to few staples, such as pork products, which are firmly held on a rather tardy recognition of the fact that supplies, both of live hogs and dead meats, are far from burdensome. Tallow, cotton-seed oil and similar products are sympathetically strong. Raw and refined sugars have both advanced this week, but apparently because of the war between the refiners being settled, but really because supplies of raw are limited.

What few lines of next season's woolen goods have been reported are at advances ranging from 25 to 35 per cent.

Iron and steel are extremely quiet, but signs of weakness are not numerous, the shading in pig iron being confined to a few grades and markets.

The demand for lumber is naturally light, but the length of supplies is notable, as evidenced by the fact that white pine stocks are 25 per cent smaller than a year ago.

Hides are dull at the East, but considerable buying is reported in West, and quotations are fairly firm. Wheat including flour shipments for the week aggregate 4,248,928 bushels against 3,509,682 bushels last week.

The current week's failure returns reflect the annual clearing out of delinquent traders in a total for the week of 795, as compared with 229 last week. In this week's year ago, 323 in 1898, 478 in 1897 and 412 in 1896.

## SALT LAKE CITY.

### An Important Factor in Transcontinental Travel.

No one crossing the continent can afford to cut Salt Lake City from his route. The attractions of the place, including the Mormon Temple, Tabernacle and Church institutions, the Great Salt Lake—deader and denser than the Dead Sea in the Holy Land—the picturesque environment and the warm sulphur and hot springs, are greater to the square yard than any locality on the American continent.

The Rio Grande Western Railway, connecting on the East with the Denver & Rio Grande and Colorado Midland Railways and on the West with the Southern Pacific (Central Route) and Oregon Short Line, is the only transcontinental line passing directly through Salt Lake City. The route through Salt Lake City via the Rio Grande Western Railway is famous all the year round. On account of the equable climate of Utah and Colorado it is just as popular in winter as in summer. Send 2c to J. D. Mansfield, 223 Washington St., Portland, or vice versa, W. Helms, Acting General Passenger Agent, Salt Lake City, for a copy of "Salt Lake City—the City of the Saints."

Paralysis of the mouth resulting from the chewing gum habit, has caused a school girl in Wabash, Ind., to renounce this practice.

Followed the Crowd.

The innocent, uninitiated guest does not always escape so easily as the Indianapolis man named by the Seattle. This man, being in London on a bright afternoon, saw many well-dressed people going through the iron gates opposite his boarding-house. Accordingly he "dressed up" and joined the procession. He found himself inside a park, and sat on the seats and enjoyed the music. A young lady came and gave him a cup of tea and he had a good time generally. The next day at the table some one asked what was going on across the way the day before. "Mr. Humphrey Ward gave a large garden party," said the laundress.

"Waiter, I asked for a roast chicken, but I did not wish one with legs as large as a teaspoon!"  
"Yes, sah, sah, sah, sah, but dese yere chickens is roasted in a special way, sah. Yo' see, they're hatched in one of dese yere ink-batters. Whiter they grow a little, sah, they're whiter to one end of the instrument 'n' baked. So when we have a great many orders we has to take 'em earlier, and they don't get so much chance for grow, sah. That was the case with youhah, sah."

"Waiter, it is with great solemnity that I affirm that you happen to be the greatest prevaricator I have ever met. Bring me a half-dozen more of those chickens that go to roost early. See?"—Philadelphia Call.

No Longer a Competitor.

He—Don't you think that girl over there is beautiful?  
She (coldly critical)—Oh, I don't know. Who is she?  
He—Mrs. Nater. Just been married.

She—Yes, I think she is—quite beautiful.—Detroit Free Press.
