

# Women Who have the Blues

Despondency in women is a mental condition directly traceable to some distinctly female ill. Well women don't have the blues, but comparatively few people understand that the right medicine will drive them away.

Lydia E. Pinkham's Vegetable Compound

overcomes the blues, because it is the safeguard of woman's health.

It regulates the entire female organism as nothing else does. When the dragging sensation and the backache go, the blues will go also.

Read the letters from women appearing in this paper who have tried it and know. There are a million such women.

Colors Used by Royalty.

It is very interesting to know what colors are used or selected by the royal families as being their very own. To England, the only royal family of modern times, which has selected it, belongs scarlet, which is very effective. The royal houses of Portugal, Prussia, Sweden and some of the German princes wear blue. Russia chooses dark green and Austria, light blue and yellow. Most people imagine scarlet was selected on account of the red robe of the Plantagenets, but this is not true. It was adopted from the field rules of the royal standard and from Henry's adoption of the scarlet dress of the women of the guard.—N. Y. Journal.

## CRANBERRY CROP.

First Actual Returns for the Twelfth Census Give the Statistics of the Fruit Produced.

The first actual returns on statistics for the twelfth census are now coming in. They relate to cranberry culture and give the average, tenure, quantity of fruit produced, cost of labor and fertilizers, area of new plantings, value of crop and losses from disease, insects and other natural causes for each bog or plantation.

In January, 1900, preliminary schedules relating to the cranberry yield of 1899 were sent out to all the growers whose names and addresses could be obtained. The number of commercial growers in the United States is over 2,000. They are found mainly in the states of Massachusetts, New Jersey, Maine, Connecticut, Michigan and Wisconsin, but Minnesota, Oregon, Rhode Island, Washington and New York reported bogs. The number in Michigan and Wisconsin is on the increase despite a temporary set-back by forest fires.

The growers are well organized, the national association having its headquarters at Trenton, New Jersey, and local organizations existing in Massachusetts and possibly elsewhere.

Annual "Pom Pom."

The Indians residing along the river near Topsham, a short distance from North Yarmouth, Wash., are having their annual "pom pom" dance. Numerous toques are used for this occasion, and the inmates spend the time in singing, dancing, feasting and making merry. They began last week, while the snow was on the ground, to give a Chinook dance, as their ponies were getting poor, and the indications were winter had set in, but a sudden change in the temperature made also a change in the dance programme, and the "pom pom" or "grass dance" was instituted. This peculiar dance is observed in the same manner as Chinese new year, and lasts a week or ten days. The Indians array themselves in gorgeous costumes and congregate at different times, where a general feast is prepared. It is the season for making new friends, and old animosities are buried. The tribe as a whole has ceased to observe this sacred annual festival, the educated members thinking it beneath their notice, but the isolated members continue to dance every spring when the winter is over and grass begins to show on the range.

Chehalis Sawmill.

The Doerflinger Manufacturing Company, of Chehalis, Wash., which is preparing to move the furniture manufacturing business to Portland, Or., in the early spring, yesterday sold the Chehalis buildings of the company to the West brothers, of Chehalis, who are going to put a saw mill into the buildings. The sale included all of the buildings and the three dry kilns, with the fans, etc., as well as the boilers of the main engine. The mill will be put in just as quick as the furniture factory people move out, and the mill engine will be used to furnish power to run the city electric light plant, Harry West being the city light contractor.

Sale of Timber Land.

The Charles K. Spaulding Lumber Company, of Newberg, Or., has closed a deal with the Southern Pacific Company for 5,000 acres of valuable timber land on the headwaters of the Luckia river, in the coast range. This is about the last large body of timber tributary to the Willamette river not previously bought up by corporations, and this company is considered fortunate in being able to secure it.

Northwest Notes.

Ellensburg, Wash., is soon to have a telephone exchange.

George W. Hopp, of Tumwater, Wash., has been appointed postmaster at Cape York, Alaska.

Aberdeen, Wash., has declared war on hobos, and given them the alternative of going to work, going on the road or going to jail.

The Spokane Sunday School Association is about to make a census of the city, to ascertain the number of children who do not attend Sunday school.

T. J. Tjomsen & Son, whose flouring mill is situated near Ellensburg, Wash., entailing a loss of \$17,000, will rebuild, and expect to have the new mill in operation in June.

John G. McMillan, a prominent citizen of Hoquiam, Wash., and well known throughout the state, accidentally shot himself at Spokane, while showing a revolver to a friend. He died shortly after the accident.

Stuck river farmers blew up a log jam that had dammed the stream near its junction with White river, and the water in the stuck was lowered a foot at the same time White river farmers were trying more completely to obstruct the channel of the Stock so as to get relief from flood on their own lands.

Ground has been purchased and laid out by a horticulturist at Cle Elum, Wash., and hothouses will soon be erected. The industry is to be carried on at Cle Elum as Puget Sound cannot furnish enough sunshine to supply the demand made by the florists, for without sunshine the flowers lack fragrance and rich coloring.

The rural delivery along the Elgin branch shows a gain of over 50 per cent over the first few months of its existence, handling last month nearly 4,000 pieces of mail.

O. C. Applegate, the Indian agent at the Lamah reservation, is considering the building of a portable saw mill for work on the reservation. There is considerable demand for lumber out there, and the magnificent forests of sugar and bull pine furnish an unlimited source of raw material to work up.

A saw mill with 150,000 feet daily capacity is to be built at Coles station, on the Oregon-California state line.

Henry Loretz delivered to Millerton Bros., of Junction City, Or., the other day, 2,100 pounds of bacon. Farmers are getting ahead when they can bring in a load that amounts to over \$2.

The Dalles, Or., business men have guaranteed a loan of \$20,000 to be made to J. M. Russell for two years at 8 per cent, in consideration of which he is to establish a wool scouring mill there, putting in \$5,000 cash himself to start the building.

## SPRING TRADE ENLARGING.

General Distribution Is of Fairly Good Volume.

Bradstreet's review of trade says: General distribution of trade is of fairly good volume, although affected by weather conditions and holidays. Spring business is enlarging at many markets East and West, the presence of buyers being encouraged by special passenger rates. A softening of prices of speculative dealing staples is to be noted, but the reactions are of narrow extent.

Foreign demand for wheat remains small, American stocks are large, and farmers are reported holding supplies hard, it is argued, largely about a discount by mild weather. The strength of corn has been a feature, foreign demand being of good proportions, and this has furnished a supporting element in the wheat market.

There is a larger volume of business in pig iron at some markets, but less at others, and prices of that product are quite steady.

Structural iron continues active, indicating heavy building operations the coming spring and summer. Foreign iron markets retain all their old strength, and lower ocean freight would, it is argued, bring about a great enlargement of our export trade. Copper is quieter, but steady in price and tin notes a further advance in sympathy with foreign speculation. Hardware is improving in distribution at the West.

Business failures for the week number 167, as compared with 192 a week ago, and 220 in 1909.

The strength of staple values is a feature of Canadian trade. Retailers will carry over some stocks of winter clothing. Industrial activity is very marked, Canadian factories running to their fullest capacity. Business failures for the week number 28, against 25 last week, and 29 in this week a year ago.

## Science and Invention

It is said that in the case of heavy carver would make but a handful.

The Agricultural Department has constructed a new building at Washington to be used solely for testing seeds of all kinds, in order to afford protection against dishonest dealers. Recent tests gave remarkable results. Meadow fescue seed, from Germany, costing 55 cents a pound, was adulterated more than 70 per cent, with seed worth only 10 cents a pound. Orchard grass, purchased in the open market, was more than half bad. Some crimson clover, similarly purchased, was 98 per cent bad.

As it was known, the soldier's risk of death in battle is not nearly as great as of finding a grave as the result of disease. The most competent authorities state that on the average it takes a box of shot to kill one man. For instance, it has been estimated that in the Crimean war the British and French troops died between 100,000 and 150,000 from disease, resulting in the death of only 50,000 Russians, while on their side the Czar's adherents killed some 40,000 of the allies, with an expenditure of over 50,000,000 projectiles, this representing a death for every 1,087 shots fired.

After an experimental study of more than five years at the psychological laboratory of the University of Michigan, a white bird, against a black background, he evolves his picture by removing all that portion of the white stratum remaining after the head has been completed. Sapphire blocks are used, carnelian, turquoise, amethyst and numerous other stones. It takes about one month to execute a portrait on ivory, while much less time is consumed if the work is done on shell. There is always great danger of the latter breaking, and its durability, too, is not great, so that shell, as a rule, is not as desirable as the harder materials. A portrait on ivory will cost \$200, while one in shell may be had for \$50. The inquiries for these are rare, and building up a patronage is slow and unaccomplished mainly by satisfied customers influencing others.—New York Evening Post.

## PERSIAN RUGS OF IRISH MAKE.

Deft Weavers of the Old Sod Turn Out a Perfect Imitation.

Just a year ago some manufacturers of artistic textiles touring in Donegal resolved on establishing a place for the making of hand-tufted carpets of the designs generally known as "Turkish" or "Persian." The peculiarities of this fabric is that from its nature it must be a hand production. The tufts are tied by the fingers in knots in longitudinal rows, which are stretched between two long parallel beams. The carpets are made to the size and shape of any room. The design is placed in front, and the girls, from three to a dozen, according to the size of the carpet, select the colors indicated row by row, which are tied, then bound down by "shoots" of woollen web drawn across the entire width and beaten firm by small iron-toothed hammers. There is interesting variety and pleasure in the work, and it is such that individual skill and workmanship come largely into play. Altogether, it is just such an industry as is suited to the rural districts of Ireland. No steam power is required, and there is therefore no handicap on the commercial side by the absence of coal.

The first year's experiment with the Irish girls has proved that they are admirably adapted for the work. The girls show a suppleness of fingers and sharpness of eye for color and form that have quite astonished their teachers, and they take to the work with a spirit and cheerfulness quite refreshing. So convinced are the promoters of its ultimate success that they have planned out a broad scheme that will spread the work all over the west of Ireland and give employment to many hundreds of girls and boys.—London Furniture Record.

## AN ODD C-S-E.

It Will Linger Long in the Memory of a Surgeon.

"What was the strangest case I ever had?" said one of the surgeons in attendance at the late convention, repeating the question of a reporter with whom he was chatting. "Well, let me see. I believe the oddest incident of my career occurred in—but hold on a second thought I don't care to give any names or dates. The facts, if you like, were these: I was called by messenger to a cheap boarding house one evening to attend a man who was said to have been hurt in a fight. I found a young fellow of 25 or thereabouts, half-dressed with a bloody contusion on one of his cheeks and a badly broken nose. The bridge was smashed almost flat with the face, and I saw at once that the case would need very careful handling to prevent great disfigurement. Not to bother you with technical details, I confined myself to righting the patient, a surgical dressing, and deferred further proceedings until next day. When I called the following morning the young man had quite recovered his senses, and although his clothes were shabby and all his surroundings poor and mean, it was evident from his hands, talk and bearing that he had never done any hard work and was a person of education and refinement. I took him for the black sheep of some good family, but made no comments, and explained briefly that I would try to restore his nose as far as possible by performing a simple operation and inserting an artificial support. To my astonishment he objected flatly, and insisted on letting it heal exactly as it was. 'But you will be frightfully disfigured,' I protested; 'I doubt if your best friends would recognize you.' Strange to say, that as I continued to endeavor to render him firmer, and I was compelled to let him have his way. It was nearly three weeks before he was well, and, as I anticipated, he looked exactly like some battered bruiser of the prize ring. I never saw the man again, but six months later I was shown the photograph of a handsome young chap who was badly wanted for a big embezzlement. I put my finger over the nose and recognized my late patient. He had walked aboard ship right under the eyes of the detectives and sailed for the Argentine Republic. They had his photo, but never dreamed of connecting it with the card in connection with that particular passenger." "Did he get somebody to break his nose

## SALT LAKE CITY.

An Important Factor in Transcontinental Travel.

No one crossing the continent can afford to cut Salt Lake City from his route. The attractions of the place, including the Mormon Temple, Tabernacle and Church institutions, the Great Salt Lake—desert and denser than the Dead Sea in the Holy Land—the picturesque environment and the warm sulphur and hot springs, are greater to the square yard than any locality on the American continent.

The Rio Grande Western Railway, connecting on the East with the Denver & Rio Grande and Colorado Midland Railways and on the West with the Southern Pacific (Central Route) and Oregon Short Line, is the only transcontinental line passing directly through Salt Lake City. The route through Salt Lake City via the Rio Grande Western Railway is famous all the year round. On account of the equable climate of Utah and Colorado it is just as popular in winter as in summer. Send to J. D. Mansfield, 253 Washington Street, Portland, or George W. Heintz, General Passenger Agent, Salt Lake City, for a copy of "Salt Lake City—the City of the Saints."
