A FEW FARM NOTES

Jessie D. Carr, of Salinas, sold a span of carriage horses to a San Francisco dealer the other day for $400 that will be a $1000 pair when they are shaped up.—Breeder and Sportsman.

Last spring a citizen of Forest Grove paid $2.50 for a couple of pigs. Last week they were butchered and shipped to Portland and a check for $31 was received on Monday in payment therefor. There seems to be money in hogs.—Times.

R. O. Jones, of Amity, has no kick coming. From seventeen ewes he has an increase of thirty five lambs. Sixteen ewes have twins and one has triplets. Over 200 per cent isnt a bad increase in the sheep business. His sheep are paying better than potatoes, of which he has shipped four car loads within a month. These sell at 50 cents per 100 pounds.—McMinnville Reporter.

Last week Milt Barnett, of Monroe, bought 125 head of sheep for which he paid $625, or a round sum of $5 per head. The animal purchased were, however, choice ewes, picked from three herds comprising in the aggregate about 400 head Barnett figures the wool and the increase will return him not only original investment, but yield a profit, even at $5 per head.—Corvallis Times.

The Lostine Ledger says that by July 1 next there will be sent from Wallowa valley to the outside market 3000 head of fat hogs, aggregating nearly $30,000 at contract prices. Of this number, the country adjacent to Lostine will furnish about 2000 head, or nearly two-thirds of the amount. This item in itself is not a small one, and causes a good many dollars to be circulated among local farmers.

Prunes are, without exception the healthiest fruit known to mankind. Their medical properties act upon the nerve centers, soothing and curing all nervous disorders. One cannot eat too many prunes. Because they are inexpensive, the wealthy class have banished them from their table; giving place to rich preserves. Prunes must be washed and put to soak over night; in the morning put them to cook, covered with cold water; stew slowly for three or four hours; add a little sugar if not sweet enough. Let the children eat them twice a day.—Exchange.

Never Sell Chickens by the Pound Unless they are Phenominally Large.

I am paying 8 to 9 cents per pound for chickens, but don't be deceived into thinking that that is a better price then $4 and $5, for it is not, but instead it is from 50 cents to $1.50 dozen less. He who advises you to sell by the pound is working directly for his own profit, and with much gall, for it is so plain.

So, believe me when I tell you that you best sell by the dozen unless your chickens are phenominally large.

Chickens are sold universally in our market by the dozen, not by the pound.

Salem Sentinel: It seems that Linn county republicans are solid for Hon. H. H. Hewitt for congress. The Linn delegation will send none but Hewitt delegates to the Yamhill convention. This is a neat compliment to a deserving man. Judge Hewitt will have friends in this convention and if Mr. Tongues renomination does not come with the first ballot no one need besurprised at the nomination of Judge Hewitt.

Politics and the price of wheat caused quite a lively discussion on our streets one day last week. There is just as much reason in stating that politics regulate the price of wheat as there is in the statement that a man's watch regulated the price of beans.

August Katerman, who is employed at W. F. John Vsetecka who purchased the Chas. Jeffrey farm last fall this week purchaced what is known as the Houston farm, owned by Hewitt and Bryant, containing 160 acres, for which he paid $3,200. Mr. Vsetecka is one of our wide awake Bohemian farmers, and we hope to see him meet with success, which undoubtedly he will.

George McHargue, of Brownsville who is a candidate for sheriff, subject to the decission of the democratic convention, was a very pleasant caller Saturday of last week. Mr. McHargue has several opponants in his political race, but as he was a candidate two years ago he has hopes of being favored with the nomination this time. He is doing considerable work in that direction, and informs us that he is meeting with good success.

Real estate in the vicinity of Scio is cheaper than in any other section of the valley, and it is this fact that is attracting the attention of those who are coming to this coast from the blizzard swept sections of the east. It will not be long, however, until the cheap land will all be disposed of, and then those who get homes in this section will be compelled to pay more for them than at this time. The real estate market in this section of the valley, is good, and almost daily sales are being made. Hardly a week passes that some new comers do not arrive with the intention of settling, and Scio is indeed getting her share of the emmigration.

W. M. Brown, of Lebanon, was among the political callers at this office during the latter part of last week. Mr. Brown is candidate for county judge, subject to the wish republican convention and his friends are pretty certain of his nomination. His election by the people is an after consideration, and one that we can tell nothing about at this time, but whoever is successful in the end should be a man thoroughly competent; and his political color should not hamper his success provided he proves himself the best man to handle the affairs of the county. This proof should be forthcoming prior to election, and should be set forth in a manner satisfactory to the people, and the promises made should be so made that their fulfillment would be certain.

Prof. L. H. Baker, principal of the Lebanon schools, was in Scio Saturday last, interviewing our republican citizens regarding the nomination for county school superintendent. Mr. Baker is a man highly qualified for the position he seeks, and the writer is personally acquainted with his work while filling a similar position in Yamhill county, whose schools under his direction were brought up to as high a standard as any in the state, and we have no doubt that if he should be successful in the coming convention and election he will do as well by the schools of this county. The position of school superintendent, while ordinarily though to be one of very little importance, is just the opposite and should be filled by a man thoroughly competent and qualified to bring our schools up to the highest possible standard. There are many important questions to come before him every year, and he should be able to handle them in a competent manner.

Judge Whitney and B. F. Ramp, of Albany, were in Scio Wednesday evening of last week, and addressed the citizens at the city hall relative to the political outlook in this county, from both democratic and populist standpoints. Their work is on the line of union, but just how well they are succeeding we were not informed. The union, however, is not going to be as satisfactory to either party this year as it was two years ago, but there is an absence of reasons for the dissatisfaction, and if all the reform forces were to unite harmoniously they would perhaps be more certain of success, but the politics of Linn county are at the present time in an unsettled condition, and it is no partys election. Politics in county affairs is uncalled for, and should not cut much figure but a systematic economical administration of the county should be demanded, and any man who will not pledge himself to these principals or who is known to be the opposite in his everyday life should not receive the support of the people of the county. With state and nation it is different, and every man has a right to his own opinions, and no one should be restrained from advocating them and voting as he pleases.

I am going to give a PREMIUM for CASH and PRODUCE TRADE. Come and see what it is.

SEEDS SEEDS SEEDS

We haven't all the seeds in town. But we have seeds from three different seed houses—Ferry, Bowen and Lamberson. You can have your choice. But one thing we have got, that is, positively new, fresh seeds. One brand of our seeds we buy outright—don't sell them on commission. These seeds are sold to us with a guarantee that they are fresh and new this year. And to prove this all the seeds we have left in the fall are destroyed by us instead of being shipped back to the firm as commonly done. So you see these seeds are bound to be fresh, and surely ought to grow.
