### Excursion Rates To and From the Coast

The Trans-Missouri Committee of the Western Passenger Association is holding its annual meeting at the Brown Palace hotel. A surprise was sprung on the committee at the morning session by General Passenger Agent Sebastian, of the Rock Island. Beginning about June 20, the Rock Island will run four excursions from Chicago, St. Louis, Kansas City and Omaha to Corvallis, common points, making a rate of one fare plus \$2 for the round trip and return limit of October 31st on the tickets. These excursions will be run as special excursions from Denver, Colorado Springs and Pueblo to the Eastern points, the same rate prevailing, thus giving Colorado people desiring to do so to make tourist trips East during the summer, with the same advantages granted Eastern tourists who come West—Denver (Colo.) Times.

### Never Sell Chickens by the Pound Unless they are Phenomenally Large

I am paying 8 to 9 cents per pound for chickens, but don't be deceived into thinking that that is a better price than \$4 and \$5, for it is not, but instead it is from 15 cents to \$1.00 per pound. He who advises you to sell by the pound is working directly for his own profit, and with much gull, for it is so plain. So, believe me when I tell you that you sell by the dozen unless your chickens are phenomenally large. Chickens are sold universally in our market by the dozen, not by the pound.

ROSS E. HIBLER.

### Will Have No Opposition.

It now seems that Judge C. E. Wolverton, who is now chief justice of the Oregon Supreme Court will have no opposition for re-election for that tribunal. He was nominated by the republicans at their convention at Portland, on April 12, and on the next day the fusion convention nominated Judge W. M. Ramsey of McMinnville and the middle-of-the-road named H. E. Courtney of Baker City. Both of the last named have declined to run for the office and have called to file their acceptance, and the time for doing so has expired. The only way now for any one to run against Judge Wolverton would be by petition.

There was a man who owed another man a dollar and had only 75 cents. So he went to a pawnbroker and pawned the 75 cents for 50 cents and went out. He met a friend and sold him the pawn ticket, calling for 75 cents, for 50 cents. Thus he had two 50-cent pieces, \$1 in fact, and he went and paid his bill. Was any body out and how much.

This city was full of farmers the first of the week, who had come in with mohair, having sold last week in the pool, purchased by E. E. Hibler. There is a large amount of good wool sold in this section each year, and each season Mr. Hibler succeeds in getting the best of the wool, owing to the fact that he generally pays from a quarter to a cent more for it than other buyers.

A peculiarity of the Oregon registry law is that no opportunity is afforded for registration for the November election after the books been closed for the June election. Every one, therefore, who wishes to vote for President this fall must register before May 15. The only provision under which voters not registered can vote in November is the section authorizing "swearing in" of votes, which is uncertain and at best troublesome.

A little boy was required to write an essay the other day. "The Newspaper" was the subject, and here was the result: "I don't know how newspapers came to be in the world. I don't think I'd do for He has had nothing to say about them, and editors is not in the Bible. I think the editor is one of the missing links you hear about, and stayed in the bush till after the flood, then came out and wrote the thing up, and has been here ever since. I don't think he ever died; I never saw a dead one and never heard of one getting locked. Our paper is a mighty good one; the editor goes through the papers all winter, don't wear no socks, and he hasn't sold his subscription in five years."

Wednesday morning of this week a very delicate surgical operation was performed on Mrs. E. J. This is indeed welcome news to the people of Scio, when they take into consideration the fact that the mill and flume will in all probability be followed by the establishment of one or more shingle mills in this city besides a very extensive wood yard. There is an unlimited supply of cord wood in that section that will in years to come find a way to the outside markets through the flume to this city. This as well as all the lumber that comes out of that country will all have to be handled and it will require the services of quite a number of men to do the work. The employment of men means the distribution of a good deal of money with our people, and every dollar that is turned loose in the city will help us all. Encourage the enterprise, and see what a great change it will bring forth for our town and our people.

### Festively No More Credit.

Hereafter I will CREDIT out, NO MORE GOODS, unless I get a BANKABLE NOTE for the amount you want to trade. I will sell that way, or for CASH and PRODUCE. But, I am doing now-a-days I CAN'T possibly SELL ON CREDIT.

Last week we spoke of a gentleman being here from the east, looking over the ground with a view to starting a saw mill. This gentleman was E. Rowe, of the firm of Miller & Rowe, of Portland, and is from Maine, where he has been engaged in the lumbering business for many years past. His visit here was to look over the timber on upper Roaring river, and after spending a couple of days in the woods returned to Portland to consult with other interested parties before deciding finally upon a plan of action. In conversation with Mr. Rowe we were made to understand that if all things could be satisfactorily arranged he would have a mill in operation in the timber about the headwaters of Roaring river within three months, and would immediately begin the work of building a lumber flume from the mill to Scio, for the transportation of the product of his mill to this city, where it would be shipped to other and larger markets. He says that the timber in that section is fine as any he has seen on the coast, and is worth a good round sum of money. He added that the natural advantages for operating mills and getting the lumber out of the woods and on the market could not be exceeded. With the flume to this city a large amount of lumber can be brought out at a very low cost, and all the cord wood and shingle timber in that section could also be laid down at the railroad in this city at figures that would not amount to but little on a cord of wood or a thousand shingles.

### Poultry.

At a recent meeting of the Corvallis Grange, Mr. H. B. Thompson spoke on the subject of "The Most Profitable Breed of Poultry for the Farm." Mr. Thompson said in part: "The question of feed is an important consideration, and of course will vary according to market conditions, but will ordinarily range from 50c to \$1. The average the past year was 75c. Good hens with ordinary care show an increase 150 eggs annually. Last year the price of eggs averaged 10c per dozen, hence the receipts per hen was about \$1.57; deduct 75c for feed, and we have a net profit of \$1.12 and the hens besides and with extra care more eggs per hen could be secured.

The price for chicks ranges from \$1.50 to \$2 per dozen depending on size and market conditions. Little profit can be made on live poultry after the birds are six months old if feed costs much.

"There is a laying type and a meat type of the hen just as there is a milk type and a beef type of the cow. The dual purpose chick has not as yet been a success. There is no breed that successfully covers both conditions. I have tried Barred and White Plymouth Rocks, Brown and White Leghorns, Silver and Laced Wyandottes, Black Minorcas, and Black Hamburgs.

The Minorcas, Leghorns and Hamburgs are the best layers. The Minorcas are the largest of the laying type and lay the largest eggs of any breed. They also lay very evenly all the year around. Most any old hen will lay plentifully in the spring of the year, but the Minorcas can be depended upon in winter as in summer if given good care. They are also good producers of live birds, when the market conditions are best. That is with the birds from three to five months old the Minorcas are as large as the Plymouth Rocks because they are quicker growers, and this condition continues until they are from five to seven months.

"The mortality among the young chicks is greater with the Plymouth Rocks, and I find my older Minorcas more healthy than the Plymouth Rocks.

"Have been able to secure two to five cents per dozen more for well selected Minorcas eggs than was the market price for mixed eggs.

Have you tried our Fairy Road Coffee, 15 cents per pound. We sell a barrel a week of it. It is always fresh and much better than package coffee. Ross E. Hibler.
