TAILOR MADE SUITS

3000 Samples to Choose From.

You can get any style you want.

You can have any price you want—nearly, and your choice from more different goods than you ever saw in your life before.

If course you know that every body no matter what they dress well buys TAILOR MADE SUITS. That is a natural consequence, who would spend good money on hand-me-down clothing—sweat shop product—when they can get perfect fitting tailors made suits for about the same price?

You may be sure that nobody does who has ever worn one of our tailor made suits, for "once a customer always a customer." He never changes back to wearing the fringed, antiquated ready-to-wear, clothes—which no kind of glaring head bonnet talk will help to sell.

You see our tailor clothes look so extremely fine on a fellow that he feels satisfied with himself and all the world. But how different with the poor unfortunate who wears the shabby, worn-out suits. He feels a sad pity for himself, and nothing but scorn for the one who sold it to him.

The 4 different firms of whom I get tailor-made suits say that they get better results if a single ready-made suit can be found on their premises.

A FEW FARM NOTES

A meeting of the hop growers' association will be held at Woodburn on June 26th.

There are 1,000,000 pounds of wool in the Pendleton warehouses, and not a pound has yet been sold.

Some 700 or 800 Yakima Indian ponies arrived at North Dalles recently for shipment to the Linton packery.

Five carloads of fat hogs were bought in the Grande Ronde valley at 5 cents a pound, gross, on board the cars.

Seven hundred and fifty Angora goats were sold at auction near Monroe this week at prices ranging from \$2 to \$5 per head.

A farmers' institute will be held at Grand Prairie Grange hall, near Albany, Oregon, Friday and Saturday, June 29 and 30.

Kansas has 300 creameries, Minnesota 550 and Iowa 1000. The cow and her product have brought great prosperity to those dairy states.

I Idaho range horses sold at Sioux City recently at from \$21 to \$65 per head; mares and colts \$22.75 to \$28.00; yearlings, \$17.50; colts, \$14.50 to \$17.50.

The Corvallis Times reports that John Smith, of Benton county, Oregon, secured a clip of 3000 pounds of wool this season from his flock of sheep. He sold the wool for 16 cents per pound.

Oregon can beat the world in producing Angora goats and it will not be many years until our breeders here will be shipping the best bred ones across the continent to supply the growing demand.

There is no such thing as a standing ready-to-wear suit. If one wishes to develop something extra in the cow he can never do it successfully unless he begins with that cow before she is a cow. We must do our level best with the cow.

There is a handsome cash premium for every breed of live stock at the Oregon state fair this year and a great effort is being made to make the live stock exhibit a show within itself. Every breeder is requested to bring something in this show.

Barbed wire is a great invention, and the number of Eastern Oregon horses raised by it would make quite a procession, tells the Heppner Gazette. Senator Morrow lost two the past week; one is dead and the other with a foot heavily sawed off.

A correspondent of the Country Gentleman says an "egg producer" which has had a large sale in his neighborhood is made up of sifted ashes, salt, sulphur and bone meal. It costs about three cents per pound for the ingredients and packing, and sells at 50 cents for a pound package.

In a recent bulletin of the United States Weather Bureau at San Francisco, it is said that injury from frost depends almost as much upon the condition of the tree as upon the severity of the weather. This observation is in very close accord with the conclusion reached by most of the growers of Italian prunes in the Northwest.

The Statesman reports that T. S. Townsend's Clover Leaf Creamery in Salem made 19,345 pounds of butter in May. M. McKinney, of Tangent, Oregon, is to hereafter have charge of the Salem creamery in place of L. Ziemer, who goes to Shelton, Oregon, to take charge of the creamery Mr. Townsend is about to establish there.

The Salem cannery is paying for cherries from 1 1/2 to 3c per pound for the best Royal Anne alone bringing the latter figure for good light cherries. Raspberries bring 3c per pound. Raspberries are 3c for choice canning fruit. Work on pears will begin next week. The cannery will take all it can get, besides what are contracted at \$20 a ton.

A most successful dairyman is Sam Douglas, whose farm is located about five miles east of Eugene. Mr. Douglas is now milking 60 cows and promptly rejects from the herd any animal which will not produce 30 pounds of butter per annum. He is a thorough up-to-date dairymen, and makes it a rule never to sell what unless he can get 50 cents a bushel, figuring that it is worth more to feed to his stock than to sell for a less figure.

We may have a short crop in wheat this year, but we are going to have an immense crop of apples, a big crop of butter, lots of hams and eggs, heads of cattle and more horses than usual. Besides numerous other things the farmer has been making up his mind he has to raise in order to get along.

When six or seven cows will produce milk for a large family, raise five or six calves and bring \$20 to \$30 per month for the milk taken to the creamery there is no use trying to make the average farmer believe that there is no profit in dairying. Anyone can make a good living on a small farm with a few good cows, and there are very few who can do the same with a large farm sown to wheat. Why not give up the grain raising idea and try a few cows and note the difference.

makes the required rate. As a matter of fact, all towns are about alike. There is a place for a worker in every community. If a man is capable of doing the best job in town, he will get it, ultimately. But the kid glove jobs go mostly to the men who have worn overalls and hickory shirts. There is no bicycle track along the road to shore hours and a fat salary. It is all walking and mostly up hill. The attention of young men who feel that environments are cramping them is called to the foregoing slabs of truth.

Scio is going to have a pretty good time on the Fourth of July. Everything is being done to make our celebration a great success, and when you hear the boom of the cannon which will probably be a couple of anvil you want to get up and get ready to help make the eagle scream. The music committee are making elaborate preparations for a fine program, and the Jefferson City band will do the occasion justice by an abundance of excellent brass music. The committee who were looking after a speaker have secured the services of Tom George W. Swopes, of Oregon City, who comes to us well recommended as a very interesting talker, and we may look for something good in that line. There will be amusements galore, including fine races program, for which prizes have been being up, and will have the effect of drawing a large crowd. For the bicycle races good purses will be given, and it is expected that a good many first-class wheelmen will be here to compete for them. Come to Scio and help us celebrate, and you will never regret it. We are going to have a good time, and plenty of it.

Jim Keen, once the milk peddler of Shasta, now "the czar of Wall street, the unchallenged king of speculation," is making a little political history in New York. Keen was for McKinley in 1896, and gave \$100,000 toward his campaign. Now he is for Bryan, and bet \$7,500 to \$10,000 that the Nebraska would be elected. The Redding searchlight says of him in the early days of his country Keen peddled milk in the streets of Shasta. He made a small sum dealing in Humboldt mining shares and moved to San Francisco. There he made a fortune of about \$20,000 and then lost it all. He was finally able to leave San Francisco for the East with \$5,000, 000. There he went broke again, but to day he is worth \$25,000,000.

Death of a Pioneer

Peter O. Smith died at his home in this city Tuesday, June 19, 1900, aged 65 years, nine months and eleven days.

Mr. Smith was born in Michigan in 1831, and came to Oregon in 1850 being at that time a small boy. He settled near this city, and has made his home here continually since that time, most of the time he has been engaged in business here, the greater part of it in the livery business. He was a great lover of horses, and was a good business man. In 1860 he was married to Mary J. Snodery and to them five children were born, all of whom have preceded him to the silent grave save one, Mrs. Frank Meek, who lives with her husband at Alo, Marion county. Mrs. Smith died in 1880, and four years after her death Mr. Smith again married, his second wife being Mrs. Mary C. Meyer, of Paik county, who survives him.

Mr. Smith was a member of the Cumberland Presbyterian church, of this city, and was also a member of the Masonic, Odd Fellows and A. O. U. W. organizations, and had an insurance of \$2000 in the last named order. He was one of those sturdy old pioneers who came to this country when it was a wilderness, and without the trails and hardships of making a home in such a country and while doing so made a host of friends, whose friendship followed him to the very brink of the dark river. Many of his early companions went over before him, but those who to follow a new northwester of a true friend and kind husband and neighbor.

In the early days Mr. Smith spent considerable time in the mines, and also took part in the Cayuse Indian war, and was always in the lead in all matters of public interest, and was ever ready to look out for the interests of his friends and neighbors, in time of sickness and distress.

The funeral occurred Wednesday at three o'clock and was conducted by the O. B. Fellows and Masons, Rev. Longbottom of Albany preaching the funeral sermon, and the remains were laid to rest in the Masonic cemetery, followed by a host of sorrowing friends who will long mourn his departure.
