

# The Turn of Life

This is a critical period in the life of every woman and no mistakes should be made.

The one recognized and reliable help for women who are approaching and passing through this wonderful change is

Lydia E. Pinkham's Vegetable Compound

That the most reliable can be placed upon this great medicine is testified to by an army of grateful women who have been helped by it.

Mrs. Pinkham, who has the greatest and most successful experience in the world to qualify her, will advise you free of charge. Her address is Lynn, Mass. Write to her.

President's Succession of British King, Kansas, says, in the Sheldon edition of the Topka Capital: "The American saloon, open by law and license, is our greatest single enemy of decency, morality and religion. Our prohibition laws close that saloon and kill that foe. What greater praise can they offer?"

Try Allen's Foot Ease, A powder to be shaken into the shoes. At this season your feet feel swollen, sore and hot, and get tired easily. If you have smarting feet or tight shoes, try Allen's Foot Ease. It cures the feet and makes walking easy. Cures ingrown nails, swollen and swollen feet, blisters and callous spots. Relieves corns and bunions of all pain and gives rest and comfort. We have 30,000 testimonials. Try it today. Sold by all druggists and shoe dealers. For the Trial Package FREE. Address: Allen R. Olmstead, LeRoy, N. Y.

According to Mr. Wu Tung Fang, the Chinese minister, the proper name of the organization referred to as "Boxers" is the "The Society of the Righteousness and Harmony, known as the Middle Kingdom, means 'righteousness, harmony and faith.'"

Look Tired Today, Perhaps you can't sleep or cannot sleep at all. You feel nervous, irritable, and your head aches. You are tired, and your eyes are sore. You are nervous, and your nerves are on edge. You are tired, and your nerves are on edge. You are nervous, and your nerves are on edge.

A woman should remember that with the average man the quality of her voice counts more than what she says.—Chicago Democrat.

Louis Froebel, widow of Friedrich Froebel, founder of the kindergarten system, died in Hamburg at the age of 85. Beware of Quackery for Catarrh That Weakens Memory. An remedy will speedily destroy the cause of mental and complete derangement of the whole system. Such a remedy should never be used except on a scientific basis. It is a scientific fact that the brain is the seat of the mind. It is a scientific fact that the brain is the seat of the mind. It is a scientific fact that the brain is the seat of the mind.

The season for mowing will cause farmers to be busy and it seems that just as this work is to be hurried some accident occurs. This does not always happen, but many such drawbacks might be avoided if farmers will clear their fields of stones, sticks and other obstructions to the machines before the grass is too high to see them. An injury to a mower knife may cause costly delay.

Venison Steak. This is very easily made by taking ramp or fillet steak free from skin, bones, etc., and mincing it very finely. It is then dusted with flour, pepper and salt, with, if liked, a very little minced parsley or chives, shaped into flat cakes, and fried, or saute, in hot fat, carefully turned to brown it equally on both sides, and then served with clear gravy or demi-glace, or with sour cream.—Philadelphia Press.

Mining News and Gossip. Several large nuggets have been found on the Mary Ann placers in the saw camp, Wash. A stir is reported on West Fisher creek, 30 miles from Libby, Mont., where \$500 ore is reported in an old claim.

It is reported in Ferguson, B. C., that a rich strike has been made in the Nettie L. A vein three to four feet wide of solid galena, carrying more copper than usual, was exposed.

In the Madison group, near Belcher, 12 miles east of Republic, Wash., a strike in copper is reported, made in a 240-foot tunnel. A strike is reported on a claim between Delta and Carbon Center, Idaho. The ore is high grade milling, and was found near the surface. No assays have been made.

The extent of the Sloan, B. C., camp is remarkable. Every mountain side for a distance of 25 miles long and nearly as wide is dotted with mines and prospects producing in paying quantities gold, silver, lead and copper.

Very small and as easy to take as sugar. FOR HEADACHE. FOR DIZZINESS. FOR NERVOUSNESS. FOR TORPID LIVER. FOR CONSTIPATION. FOR SALLOW SKIN. FOR THE COMPLEXION. CURE SICK HEADACHE. NOLLYN'S CURE FOR PILES. NOLLYN'S CURE FOR PILES.

## WHAT THE MINES ARE DOING

### THE LOWER YUKON NEWS THE JOHN DAY VALLEY

#### American Mining Camps in That Section Are Doing Well. Many Locations Reported on Dixie and Strawberry Spurs.

Seattle, July 4.—The Post-Intelligencer has the following special news from Skagway: The first news of the season from the remote American mining camps of the lower Yukon has just come out to Skagway. Latest arrivals report a new strike 100 miles back of Circle City, on three creeks known as Faith, Hope and Charity, which empty into the Tanana. A new strike is also reported on Walker's fork of the Forty-Mile, which was once before staked. A stampede has resulted, and others have rushed in and re-staked the country.

Flint has been struck on a number of claims not heretofore considered payers. Eureka, struck last summer, has proved a wonder so far, and has a pay streak 80 feet wide and four feet deep. It is expected Eureka will this year yield \$1,500,000.

The Rampart Camp. Col. Wiggin believes the Rampart camp is as good as the creek camp of Nome, and thinks many of the overlook at Nome will push up the river to Rampart and help make it a big producer. He has the belief there is gold in Koyukuk, but feels that the developments are scarcely enough yet to warrant great faith in the camp. However, from all sources come the report that many are rushing into Koyukuk.

E. O. Lenont, who has just arrived from Forty-Mile and other promising American camps, reports the clean-up on Jack Wade this spring has been demonstrative of a good camp. The strike occurred in the west fork of the lower upper discovery yielded \$50,000 at this year's clean-up. Lenont predicts a great future for the creek, and estimates the output for next season at \$2,000,000. He is going after thawing machinery for the creek. He has a suggestion from the creek weighing six tons and worth \$116. Gold of Jack Wade, also of Rampart, is worth \$19 an ounce. Jack Wade gold is mostly in nuggets.

McGraw's Rich Claim. Of those who have been among the most successful is the man who is working the claim of ex-governor John H. McGraw, of Washington, known as No. 8, on Little Manok. It yielded the last winter \$80,000 of which \$8,000 or \$9,000 was nuggets picked out from the pay dirt by hand. Last year McGraw thought he had worked out the pay streak.

No. 6, on Little Manok, this winter yielded \$60,000. No. 7, on the same creek, gave \$40,000. Nos. 21, 22 and 23, Little Manok, jr., produced \$60,000. Hooser and Big Manok have also proved rich. Hillside property on Big Manok has yielded as high as \$9 to the pan.

Idaho bar, on which a rich discovery was made in 1899, was all staked at that time, but not much was taken out and the dump was not washed because of scarcity of water, but has been re-staked.

RICH COPPER STRIKE. Good Values on Old Claim in a British Columbia Camp. Phoenix, B. C., July 9.—An important ore strike has been made on the War Eagle claim in this camp. The strike occurred in the west fork of the 100-foot level, about 175 feet from the shaft, where a raise was being driven. The ore body dipped a little to the east and was followed 11 feet, when the workmen went back and continued work on the raise. Up to date the men have gone through 25 feet of clean chalcopite ore and have not reached the further wall. The width of the ore body, therefore, has not been determined. Resident Manager Buck has had an average test made of the new strike, and received satisfactory returns, the ore running over \$20 in copper and \$1.50 gold.

COMING TO THE FRONT. Toronto Creek Mines Again Attracting Attention. Republic, Wash., July 9.—Toronto creek mines are again attracting attention. Seven companies are working and some of them expect to cut their ledges within a few days. Some of the ledges have shown large values on the surface, and it was this that turned the attention of mining men in that direction. Among the mines that had fine surface showings and carried extremely high values was the Oxford. As high as 255 ounces of silver and \$15 in gold per ton were obtained from the ore near the surface. The owners decided to run a tunnel and now have it in 85 feet. A few days since a stringer 12 inches in width was cut in the tunnel, which is believed to be an almost pure ledge. The ore carries about 200 ounces of silver per ton and from \$10 to \$12 in gold.

The tunnel will have to be extended about 40 feet to cut the ledge. There is also a parallel ledge that can be cut by the tunnel by extending it another 100 feet. The ledges vary from 7 to 9 feet in width.

Mining News and Gossip. Several large nuggets have been found on the Mary Ann placers in the saw camp, Wash. A stir is reported on West Fisher creek, 30 miles from Libby, Mont., where \$500 ore is reported in an old claim.

It is reported in Ferguson, B. C., that a rich strike has been made in the Nettie L. A vein three to four feet wide of solid galena, carrying more copper than usual, was exposed.

In the Madison group, near Belcher, 12 miles east of Republic, Wash., a strike in copper is reported, made in a 240-foot tunnel. A strike is reported on a claim between Delta and Carbon Center, Idaho. The ore is high grade milling, and was found near the surface. No assays have been made.

The extent of the Sloan, B. C., camp is remarkable. Every mountain side for a distance of 25 miles long and nearly as wide is dotted with mines and prospects producing in paying quantities gold, silver, lead and copper.

## BRADSTREET'S REPORT.

### The Distributive Trade Is Seasonably Dull.

Bradstreet's says: Distributive trade is dull, seasonably so in most instances, and prices of manufactured products are generally weak, but exceptions to the former are found where crop conditions are exceptionally promising and in the case of prices where the readjusting movement has been overdue on the down side.

The upward rush of wheat prices culminated at the close of last week and the reactions and irregularities since, mainly due to heavy realizing, would mainly point to the movement having been temporarily at least overdone. Advice from the North area of little more than half a crop of wheat, but estimates as to the output in bushels vary as follows: as the government reports of \$16,000,000 bushels, or the commercial estimate of 200,000,000 bushels in yield last year in the three states are used as a basis.

Sugar is at the highest price reached in this time for 10 years past, owing to the active canning demand and the strengthened demand of raw. The war in China is chargeable with the advance in price, not only from the former country, but from Japan, some interruption in transportation being apparently looked for if the Asiatic trade is to be maintained.

Heavy rains are complained of in the entire cotton belt east of the Mississippi river, and the crop is generally "in the grass." Reports from the iron and steel trade are as pessimistic as ever. Nominally quotations at Pittsburg are unchanged. Wheat including flour, shipments for the week aggregate 3,184,144 bushels, against 4,642,180 bushels last week.

Failures for the week number 185, as compared with 167 last week. Failures in the Dominion of Canada number 18, as compared with 25 last week.

PACIFIC COAST TRADE. Seattle Markets. Onions, new, 1 1/2c. Lettuce, house, \$1 per crate. Potatoes, new, 10c. Beets, per sack, 90c@95c. Turnips, per sack, 75c. Carrots, per sack, \$1. Parsnips, per sack, 50c@75c. Cauliflower, California 90c@95c. Strawberries, \$1 per case. Cabbage, native, 10c. California, \$1.00@1.25 per 100 pounds. Tomatoes—\$1.50 per case. Butter—Creamery, 22c; Eastern 22c; dairy, 17c@22c; ranch, 10c@15c per lb. Eggs—19c. Cheese—12c. Poultry—14c; dressed, 14c@15c; spring, \$2.50. Hay—Puguet Sound timothy, \$11.00 @12.00; choice Eastern Washington timothy, \$19.00. Corn—Whole, \$23.00; cracked, \$23; feed meal, \$23. Barley—Rolled or ground, per ton, \$14. Flour—Patent, per barrel, \$3.25; blended straight, \$3.00; California, \$3.25; buckwheat flour, \$4.00; graham, per barrel, \$3.00; whole wheat flour, \$3.00; rye flour, \$3.50@4.00. Millet—\$14.00 per ton. Feed—Chopped feed, \$18.00 per ton; middlings, per ton, \$20; oil cake meal, per ton, \$30.00. Fresh Meats—Choice dressed beef steers, 8c; cows, 7c; mutton 8c; pork, 8c; trimmed, 9c; veal, 8 1/2c @ 10c. Hams—Large, 13c; small, 13 1/2c; breakfast ham, 12 1/2c; dry salt sides, 8c. Portland Market. Wheat—Walla Walla, 57@58c; Valley, 58c; Bluestem, 60c per bushel. Flour—Best grades, \$3.35; graham, \$2.85; superior, \$2.10 per barrel. Oats—Choice white, 35c; choice gray, 33c per bushel. Barley—Feed barley, \$14.00@15.00; brewing, \$16.00 per ton. Millet—\$14.00 per ton. Middlings, \$19; shorts, \$13; chop, \$14 per ton. Hay—Timothy, \$10@11; clover, \$7@7.50; Oregon wild hay, \$6@7 per ton. Butter—Fancy creamery, 35@40c; store, 25c. Eggs—16c per dozen. Cheese—Oregon full cream, 13c; Young America, 14c; new cheese 10c per pound. Poultry—Chickens, mixed, \$3.00@4.00 per dozen; hens, \$5.00; springs, \$2.50@4.00; geese, \$4.00@5.00 for old; \$4.50@6.50; ducks, \$5.00@4.00 per dozen. Turkeys, live, 14@15c per pound. Potatoes—40@50c per sack; sweets, 2@2 1/2c per pound. Vegetables—Beets, \$1; turnips, 75c; per sack; garlic, 7c per pound; cabbage, 1 1/2c per pound; parsnips, 1c; onions, 1 1/2c per pound; carrots, \$1. Wool—Valley, 15@16c per pound; Eastern Oregon, 10@15c; mohair, 25c per pound. Mutton—Gross, best sheep, wethers and ewes, 3 1/2c; dressed, 7@7 1/2c per pound; lambs, 5 1/2c. Hogs—Gross, choice heavy, \$5.00; light and feeders, \$4.50; dressed, \$5.00@6.50 per 100 pounds. Beef—Gross, top steers, \$4.00@4.50; cows, \$3.50@4.00; dressed beef, 6 1/2c @ 7 1/2c per pound. Veal—Large, 6 1/2c @ 7 1/2c; small, 6 @ 8 1/2c per pound.

San Francisco Market. Wool—Spring-Nevada, 18@15c per pound; Eastern Oregon, 10@15c; Valley, 15@30c; Northern, 10@12c. Hops—1899 crop, 11@12c per pound. Butter—Fancy creamery 18@19c; do seconds, 17 1/2c; fancy dairy, 17c; do seconds, 15@16 1/2c per pound. Eggs—Store, 13 1/2c; fancy ranch, 17c. Middlings—Middlings, \$17.00 @ 20.00; bran, \$12.50@13.50. Hay—Wheat \$6.50@10; wheat and oat \$6.00@9.50; best barley \$5.00@7.00; alfalfa, \$5.00@6.00 per ton; traw, 25@40c per bale. Potatoes—Early Rose, 60@65c; Oregon Burbanks, 80c@90c; river Burbanks, 35@65c; new, 70c@85c. Citrus Fruits—Oranges, Valencia, \$2.75@3.25; Mexican lemons, \$4.00@5.00; California lemons 75c@85c. Tropical Fruits—Bananas, \$1.50@2.50 per bunch; pineapples, nominal. Versian dates, 6@6 1/2c per pound.

## FACTS FOR FARMERS

### REMARKABLE SWORN STATEMENT ABOUT WOOD PRESERVATIVE.

Fence Post Impregnated With Avenarius Carbolineum Endures Twenty Years and Still Sound.

In an age when wild, exaggerated statements of the efficiency of all kinds of articles, from patent medicines to patent wood preservatives, are being made for advertising purposes only, it is peculiarly fitting that a household name should be given to a wood preservative which has been proved beyond the power of detractors to injure or invalidate to compete with.

Such is Avenarius Carbolineum, the celebrated German wood preservative of the 18th century, whose fame is destined to outlast the 20th. It is not only the greatest preservative known for protecting the decay of any kind of woodwork, above or below ground, from the ravages of climate, fungus or vermin, but it may be truthfully described as the only preservative whose utility has been practically tested and not found wanting. Since the discovery of Avenarius Carbolineum it has been employed for the treatment of wood used in shipbuilding, government use, telegraph poles, fence posts, house supports and hundreds of other constructions, and in not a single case out of thousands has it failed to render articles impregnable and immune against rot and decay, whether the attacking agencies were climate and frost or salt water, termites, ants, boring worms or other hostiles, singly or in combination, when properly applied.

The value of such a specific on a farm, where almost all the constructive work from houses and barns to wire poles and fence posts, is chiefly of entirely wood, cannot be overestimated. No farmer who appreciates practical economy can afford to do without it. An additional incentive for the use of Avenarius Carbolineum may be stated that the preparation is inexpensive and a few gallons go a long way, while application is as easy and simple as that of common household preservatives. A few strokes of the brush do the work, and the article treated is insured against decay of any kind.

As an illustration of the efficiency of Avenarius Carbolineum we publish the following photograph reproduction of two pieces of wood which stood side by side partly in and partly out of the ground, together with a sworn statement concerning the same attached, as seen in the picture.

These two boards perfectly sound after twenty years exposure on account of being impregnated with "Carbolineum Avenarius." At a Chapel, January 12 1898. We certify that the above is a true and correct copy of a sworn statement made by the farmer who owned the same, and we placed it five years ago along with the Carbolineum, and both together in their above condition.

SIEMENSK & COUMONT. The above testimonial was signed by the farmer who owned the same, and we placed it five years ago along with the Carbolineum, and both together in their above condition.

Japan alarmed over the migration of many of her residents to this country who are lured here by misrepresentation. This is like the misrepresentation which deludes people into believing that cheap medicines equal to Hostetter's Stomach Bitters for stomach disorders. It will cure indigestion, constipation and dyspepsia.

Any article that is grown, whether of the best or not, costs something, and the grower must receive at least the cost or he will suffer a loss. The larger the difference between the cost and the price received the greater the profit. It should be the object, therefore, to grow the best, rather than the aim for large yields, as the market may be overstocked with inferior goods, while a demand may exist for the best.

An attractive-looking, delicious and simple dessert is made by lining a mould with lady fingers, sticking each one to the side of the dish with a little melted gelatine. The center is then filled with boiled custard flavored with black coffee and stiffened with a little gelatine. A cupful of whipped cream stirred in just as the custard is poured into the mould is an improvement.

An excellent plan to get two crops on the same land and at the same time, is to drop seeds of winter corn in the same rows with the peas, placing the seeds of corn several inches apart, thinning to a foot apart after the plants are up. The corn will finish its main growth after the peas have ceased growing, though for taller kinds the corn serves as supports.

Some notion of the coming deluge of books on the South African war may be had from the fact that an American publisher now in London was within a week of his arrival offered the American rights in 25 war books.

## Just a Little Out of Sorts

That is the way many serious troubles begin. The stomach gets a little out of order, is neglected, and chronic dyspepsia follows. The blood becomes a little impure, as occasional pimples testify, and in time a long array of blood diseases attack the system. It is safest to cure these troubles at once by thoroughly purifying the blood with Hood's Sarsaparilla. It maintains the health and cures disease.

Hood's Sarsaparilla is America's Greatest Medicine. Price 50c.

The planting of waste land to trees for timber is receiving more attention than formerly. Farmers who planted trees 20 years ago now find that they then made good investments. It is claimed that cherry and hickory trees require about 30 years before they are valuable for timber; maple trees 20 years and black walnut 15 years. A black walnut tree is said to stain from 12 to 15 inches in diameter in 10 years from the seed. Nuts are also a source of profit with some growers of timber.

Carter's Ink Is Used by the greatest railway systems of the United States. They would not use it if it was not the best. The land for late potatoes should be plowed deep and harrowed fine. The land should never be allowed to form a crust before the plants are up. Run a harrow over the field, both before and after the potatoes are up. The deep and given level culture instead of hilling. Clover sod land is excellent for potatoes, and to avoid disease it is best not to plant potatoes on the same land twice in succession. Frequent and shallow cultivation rather than deep should be given.

Room corn is scarce and high. The main crop is grown in Illinois. The brush is the salable portion, but some farmers also value the seed as an important crop. The labor required for room corn is about the same as for corn.

Alfalfa seeded on light sandy soil in New Jersey during the month of August three years ago has given several crops of hay per year, and the fallowing is declared a success, although the recommendation has been to sow the seed in the spring.
