It cost the state nothing to accept the gift. Now the legislature is proposing to appropriate \$1000 to make improvements at these springs. This having been accomplished, it is proposed that the state will be asked to make further improvement at that place, and within a decade the state would have established at Sotaville a pleasure resort that would cost the people at large several thousand dollars annually, and benefit the residents of a small community to the same extent." As a matter of fact the Sotaville springs are free to the public, and the people from all parts of the state Sotaville is a fine health resort, and the expenditure of the small sum of \$1000 by the state to improve the springs is money well spent.

Monday morning of this week Geo Brock, who lives just south of the Allison bridge, had the misfortune to be visited by a destructive fire, which resulted in the total loss of his dwelling and part of its contents. He had just made a fire in the

kitchen stove, and was in the act of kindling a fire in the other part of the house when his attention was attracted by the roar of flames, and looking toward the kitchen he was astonished to find that portion of the house a mass of flames. He closed the doors and awoke the other members of the family, and all set to work to remove the contents of the house, which was done with great haste, but none too quick, for the entire house was soon a heap of ashes. Mr Brock is at a loss to know just what caused the fire as the house was almost new, having been completed less than a year. The building was insured for \$250, and the contents for \$200, but notwithstanding this fact the loss is a heavy one to Mr. and Mrs. Brock for they had worked hard to build a little home, and just as they were getting comfortably settled it was taken from them by the destructive flames.

The flag was hoisted Marshall day. Many do not know why John Marshall should be especially honored at this time and it can be more clearly seen that Marshall was chief justice during a period in the history of the United States when it needed an incorruptible man on the supreme bench. He rendered decisions interpreting the constitution at a time when interested parties would make every effort to bring about a change in the constitution, but Marshall took it upon himself to decide that it was the supreme law of the land and must be obeyed. He came in contact with Jackson, Thomas Jefferson, Alexander Hamilton and others. It matters not to be Republican, Democrat or Whig, Marshall had the tenacity to battle with all the attempts to distort his meaning. Decisions made by him on constitutional points are numerous and conclusive, so much so, that there is no controversy left. The Civil war, perhaps, settled two disturbing elements of a constitutional nature, but Marshall brought out its full meaning from time to time so clearly and so forcibly that his decisions are quoted by judges and lawyers with almost as much confidence as they have in the law itself. He was undoubtedly the greatest chief justice of our land.

His home was in Richmond, Virginia, and the citizens of that city have seen passed in his memory which is a worthy move—and greatly to be commended.
