Geo. Bilyeu, an old resident of the Jordan neighborhood, died Monday at the advanced age of 74 years. He had been a resident of this section for many years, and had a host of friends and a large number of relatives hereabouts. The remains were buried at the Jordan cemetery Tuesday.

E. E. Larimore, formerly manager of the Flax Mill, has removed to Portland, where he is employed by the most genial of theatre managers, "Jno. F. Cordray," in capacity of book-keeper and correspondence clerk. During his residence here, Mr. Larimore made a host of friends, who were sorry to see him move away, but all wish him success in his new vocation. There is no danger of "Gene" making a failure, for he is built of the sort of timber that makes success in almost any calling, a success.

No person can conduct a business without money, and the newspaper is no exception to the rule. We must either collect what is due us or quit business. Our creditors will not permit us to stand them off much longer, and therefore we must ask those owing us to call and settle as soon as possible. A few dollars in a few hundred pockets make quite a sum when all put together, and that is just the shape we are in now. We have several hundred dollars due us on subscriptions, and it is useless for us to try to continue doing business unless we can collect pay for what we have done.

Thursday part of the machinery which was burned with the flax mill last fall was taken to J. J. Byrnes & Son's machine shop and repairs made on it preparitory to working up some of the straw at the flax mill. The company has about 140 tons of straw on hand, and it is their intention to work this up before the new crop comes in. The work will be under the supervision of Mr. James Bright, who has been actively engaged in fibre manufacture for several years past, and we are assured that the mill will be operated in earnest just as soon as the necessary repairs can be made.

J. R. Young has this week received six sheep shearing machines, which show in many respects the benefits of inventions. They comprise a large pair of clippers, the same as are used in barber shops, which are attached to a flexable shaft, and operated by a large gear wheel, which is turned by hand. Two men are required to operate the machine, and with it as many as 300 sheep have been sheared in a single day. The work done with the machine is much better than can possibly be done by hand, and it is impossible to cut a sheep in shearing. Those having sheep to shear should not fail to see these machines.

We were informed this week by Joseph Wessly that he had just received a letter from Mr. Hansel, in which he states that Mr. Leibert, who was in this state last fall in the interest of a party who were looking for a location for a linen mill, would be here again within a couple of weeks, and that it was his intention to further investigate the possibility of establishing a mill in this valley for the manufacture of linen goods from flax fibre. We should be pleased to see such an enterprise established right here in Scio. We have here a flax mill turning out a superior quality of fibre, and the country around here is particularly adapted to flax culture, and we should be pleased to see a linen mill established here.
