A WORTHY SUCCESSOR!

Something New Under the Sun.

All Doctors have tried to cure CATARRH by the use of powders, acid gases, inhalers and drugs in paste form. Their powders dry up the mucous membranes causing them to crack open and bleed. The powerful acids used in the inhalers have entirely eaten away the same membranes that their makers have aimed to cure, while pastes and ointments cannot reach the disease. An old and experienced practitioner who has for many years made a close study and specialty of the treatment of CATARRH, has at last perfected a Treatment which when faithfully used, not only relieves at once, but permanently cures CATARRH, by removing the cause, stopping the discharges, and curing all inflammation. It is the only remedy known to science that actually reaches the afflicted parts. This wonderful remedy is known as "SANTIFLEX" the GUARANTEED CATARRH CURE and is sold at the extremely low price of One Dollar each package containing internal and external medicine sufficient for a full month's treatment and everything necessary to its perfect use.

"SANTIFLEX" is the only perfect CATARRH CURE ever made and is now recognized as the only safe and positive cure for that annoying disease. It cures all inflammation quickly and permanently and is also wonderfully quick to relieve RAY FEVER or COUGHS IN THE HEAD.

CATARRH when neglected often leads to CONSUMPTION—"SANTIFLEX" will save you if you use it at once. It is no ordinary remedy, but a complete treatment which is positively guaranteed to cure CATARRH in any form or stage if used according to the directions which accompany each package. Don't delay but send for it at once, and write full particulars as to your condition, and you will receive special advice from the discoverer of this wonderful remedy regarding your case without cost to you beyond the regular price of "SANTIFLEX" the "GUARANTEED CATARRH CURE."

Sent prepaid to any address in the United States of Canada on receipt of One Dollar. Address Dept. E 425, W. B. GILES & COMPANY, 2330 and 2332 Market Street, Philadelphia.

Summer complaint is unusually prevalent among children this season. A well developed case in the writer's family was cured last week by the timely use of Chamberlain's Colic, Cholera and Diarrhoea Remedy—one of the best patent medicines manufactured and which is always kept on hand at the home of your doctor. This is not intended as a free puff for the company, who do not advertise with us, but to benefit little sufferers who may not be in easy access of a physician. No family should be without a bottle of this medicine in the house, especially in summer time.—Lansing, Iowa, Journal. For sale by Peery & Peery, druggists.

Preparations are being completed for a "way up" time at the picnic in this city tomorrow (Saturday). Several bands are arranging to set up for business at the grove, and a big crowd is expected.

At the rate that gravel hauling has been going on for the past couple of weeks the street will soon be completed, and the job is a good one. The improvement is not appreciated very much at the present time, but will be when the water runs have got in their work for two or three months.

There are quite a number of sidewalks within the corporate limits which need attention, and the work of repairing them should not be left until the rains set in in the coming fall. Good walks are a good advertisement for a town, and Scio should see to it that her walks are kept in first-class condition.

There has been a change made in the running time of the S. P., and now the afternoon train arrives at

While unloading some heavy timbers for William Brenner's new barn, one day last week, Prince Lucas had the misfortune to get his arm caught by one of the timbers, breaking the arm near the wrist, and dislocating the wrist. He was taken to Dr. Prill's office and the fracture reduced, and was then taken home, where he is improving as well as could be expected.

Bill Brenner is just about the luckiest man in town at the present writing. While at work cleaning out where his old barn had been torn down he picked up a \$20 gold piece, which had laid in the dirt for a number of years. It was under one of the sills, and had evidently been dropped on the floor and rolled through a crack and landed under the sill, where it has lain for a period of time unknown.

RICH IN FOSSILS.

The Bad Lands & Bonanza to the Dertog Geological Student.

"The Bad Lands," said Horatio Garrett, one of the most earnest rock delvers of the party from Princeton college that recently visited the Bad Lands of North Dakota and Montana to collect fossils, to a northwest magazine representative, "are a strange combination of desolation, horror and incomprehensible freaks of the primeval world. There are lofty peaks, bare and brown—baked into spires of burning rock by the hot suns of millions of years. The valleys between are white deserts, covered with bitter, dusty and blinding alkali that has made all that country a desert worse than Sahara ever was said to be.

"The rivers run wide or turbid with this alkaline concretion in winter, and are dry and dusty channels in the summer. The peaks, the valleys, and every feature of the whole region, in fact, seems to be thrown down upon the earth in nature's angriest mood—a hideous conglomeration, in which even the geological strata are displaced and entangled. This strange region was once the salt-washed bottom of a sea, and the traces of the receding waves are visible on every hand. The fossils, which were now our main pursuit, are mostly aquatic animals. Few birds, and those mostly of the semi-reptilian character, are found among them, while innumerable bones of gigantic saurians dot the shale and sandstone of the valleys. Mingled with them are remains of bats, antelope and buffalo, and relics of an intermediate age, the bones of the mastodons and elephants—not mammoths—and of a three-toed equine, one of the ancestors of the present horse.

"Some of the saurians of the eocene and miocene periods were indescribably hideous. Looking upon the remains of these monsters and gazing on the awful scenery of the country, a bit of hide upturned to view, one might say—is it any wonder that the Indians shunned the Bad Lands and said they were the haunts of ghosts and the home of evil demons?"

Cataract Victims.

Four of the most eminent men in Europe are at the present time suffering from partial blindness. In all cases the nature of the ailment is the same, namely, cataract, and all the cautious patients are hopefully seeking relief in the resources of medical science. Mr. Gladstone has had several operations performed upon one of his eyes, the result of which, it is believed, will be almost fully to restore his vision, while the other eye is still sound enough to enable him to read and write. Sir William Harcourt's eyes are both much obscured, and must soon have relief or be altogether darkened. He will presently place himself in a surgeon's hands. M. Jules Simon is in a like plight, but hopes to have the opaque veil entirely removed. And Sig. Crispi, in whose case the ailment has not proceeded quite so far as in the others, has already sought the services of a skilled oculist.

The king of the Belgians went out for a walk the other day, and ordered a farm to ask for a glass of milk. When he had made a remark in English to his companion, he heard the hostess say to her husband in Flemish: "I wonder what that long-nosed Englishman will give us for the milk!" Whereupon the king took out a five-franc piece and gave it to the woman, saying in Flemish: "Allow me to offer you the portrait of the long-nosed Englishman."
