Electricizing Water Power.

Clear lake, 75 miles north of San Francisco and 1,317 feet above the sea level, having its outlet at Cache creek, a stream supplying 327,000,000 gallons of water daily, is to have its forces translated into electricity, sent on overhead copper wires, 20,000 horse-power and upward, to the motors at San Francisco, besides doing lots of work all around the region and on the line of transit. On the way the waste water is to irrigate hundreds of thousands of acres of land, making it bud and blossom like the rose. The water will be shot through Pelton wheels, which will be connected directly with the dynamos, the latter being among the largest and most powerful known. The transmission of electricity under the waters of the bay has been an intricate and difficult problem, but has found its solution, and now presents no obstacle of serious character.

Force of a Bird's Flight.

Some idea of the terrific force with which a bird passes through the air may be gained from the fact that a short time ago a common curlew flew right through a piece of plate glass a quarter of an inch thick at Turnberry lighthouse, Ayrshire.

EDITORIAL HASH

"In the beginning God created the heavens and the earth, then the editor and liberal advertiser and prompt paying subcriber—which was all very good. Next day it snowed and he created the man who does not believe in advertising: an other who does not take the home paper—then he rested. Then the devil got into the moulding room and created the man who takes the paper for years and fails to pay for it. After he had completed that sorry job and having a few lumps of mud left, he created the excuse of a man who settles his subscription by instructing the postmaster to mark his paper "refused."—Milton Eagle.

If the editor makes a mistake the entire country knows of it at once, while a preacher's mistakes are often forgotten, a lawyer's are killed by the stenographer, a baker's is eaten, a coal dealer's is burned, and a doctor's buried—the poor editor's are in sight every time some one comes in to look over the blamed old file. People, at least some of them, seem to forget that a country editor may change his mind as the time rolls, just like an ordinary white man.—Exchange.

A Kansas editor insists that a "patched pair of pants often cover a warm heart." That editor needs a few lessons an anatomy or some kindred study.

A Profitable Investment.

"I was troubled for about seven years with my stomach and in bed half my time," says E. Demick, Somerville Ind. "I spent about $1,000 and never could get anything to help me until I tried Kodol Dyspepsia Cure. I have taken a few bottles and am entirely well." You don't live by what you eat, but by what you digest and assimilate. If your stomach does'nt digest your food you are really starving. Kodol Dyspepsia Cure does the stomach's work by digesting the food. You don't have to diet. Eat all you want. Kodol Dyspepsia Cure cures all stomach troubles. Peery & Peery.

To Register Voters.

The various county clerks of this state are now engaged in getting or looking after supplies for the registration department of their offices. The registration of voters begins in January and continues until May. A registration book is required for each election precinct, of which there are from 15 to 20 in the smaller counties to 70 in Multnomah, and various blanks and affidavit forms are also necessary. Voters must register for each general election, and consequently all those who registered in 1900 must come forward again. Young man who have just become of age, and now residents, all must register, Precinct maps must be prepared so the clerk may able to register each voter in the precinct in which he resides. There are 33 precincts in Linn county. The voters may register either in the precinct beford a notary or justice of the peace or with the county clerk at his office.

Child Worth Millions.

"My child is worth millions to me says Mrs Mary Bird of Harrisburg, Pa., "yet I would have lost her by croup had I not purchased a bottle of One Minute Cough Cure. 'One Minute Cough Cure is sure cure for coughs, croup and throat and lung trouqles. An absolutely safe cough cure which acts immediately. The youngest child can take it with entire safety. The little ones like the taste and remember how it helped them. Every family should have a bottle of One Minute Cough Cure handy. At this season especially it may be needed suddenly. Peery & Peery.

Signs of Longevity.

The primary conditions of longevity are that the heart, lungs and digestive organs, as well as the brain, should be large. If these organs are large, the trunk will be long and the limbs comparatively short. The person will appear tall in sitting and short in standing. The hand will have a long and somewhat heavy palm and short fingers. The brain will be deeply seated, as shown by the orifice of the ear being low. The blue hazel or brown hazel eye is a favorable indication. The nostrils being large, open and free, indicates large lungs. A pinched and half-closed nostril indicates small or weak lungs.—San Francisco Argonaut.

A Deep Mytiery.

It is a mystery why women endure backache, headache, nervousness, sleepnessness, melancholy, fainting and dizzy spells when thousands have proved that Electric Bitters will quickly cure such troubles. "I suffered for years with kidney trouble," writes Mrs. Phebe Cherley, of Peterson, Ia., and a lame back pained me so I could not dress myself, but Electric Bitters wholly cured me, and although 73 years old, I now am able to do my housework." It overcomes constipation, improves appetite, gives perfect health. Only 50c at Peery & Peery's drug store.

The Farmers Short Course.

The farmers short course at the Oregon Agricultural College at Corvallis during the month from Jan. 14th to Feb. 14th, 190 , is an opportunity that no young man on a farm who can spare the time should allow to pass unimproxed. Notice of this course of instruction should be more extensively given than heretofore, as many farmers do not know that tney and their sons can get it free for the asking.

Cataract Victims.

Four of the most eminent men in Europe are at the present time suffering from partial blindness. In all cases the nature of the ailment is the same, namely, cataract, and all the illustrious patients are hopefully seeking relief in the resources of medical science. Mr. Gladstone has had several operations performed upon one of his eyes, the result of which, it is believed, will be almost fully to restore his vision, while the other eye is still sound enough to enable him to read and write. Sir William Harcourt's eyes are both much obscured, and must soon have relief or be altogether darkened. He will presently place himself in a surgeon's hands. M. Jules Simon is in a like plight, but hopes to have the opaque veil entirely removed. And Sig. Crispi, in whose case the ailment has not proceeded quite so far as in the others, has already sought the services of a skilled oculist.

—Stories of the ravages of termites, or "white ants," come from the curator of the Australian museum at Sydney. Some time ago they destroyed the roof of the museum building, and it had to be replaced with a covering composed largely of steel and copper. Their work, being carried on in the interior of the timber, does not reveal itself until the structure is about ready to fall to pieces, and so it was only recently that the fact came out that the ants had also destroyed the underpinning of one of the important floors of the museum.

Don't Live Together.
