The creamery is turning out some cheese, and if the farmers would only furnish a larger supply of milk the output would be large enough to pay much better prices for milk. About the neatest thing in the advertising line that we have seen lately is a pamphlet issued by the C. & E. railroad setting forth the advantages of Yopuna Bay as a summer resort. It is replete with just such information as is wanted by prospective visitors and contains several illustrations of this famous summer resort. Close connections are now made between the trains of the S. P. and the C. & E., and one can go from any point in the valley to Seaside in a single day. The trains from Detroit will begin running to Albany in the morning and return in the evening this week.

Six of Scio's citizens went out to the Elliotts lane Tuesday afternoon to meet with the members of the county court and the road master and numerous citizens of the vicinity to decide upon some permanent improvement of this famous piece of road. It was finally decided to gravel the line its full length—act

ing on about 2500 loads of gravel. A slight change will be made at the eastern end and the bridge changed so that people will not drive into deep water as has been done in the past during the winter by those who were not familiar with the road. This lane has been a source of much expense to the county owing to the fact that no mode of permanent improvement has yet been made. The road would be improved each year, but during the winter months the improvement would all wash out together with the roadbed, and then the work would all have to be done over again, and there is not sufficient work in the district to make the needed improvements. Some of the citizens have taken hold of the matter and have about \$350 subscribed and the county will now give an equal amount and with this it is thought that the road can be built so that it will stay.

**Death of a Pioneer.**  
C. A. Titus died at his home northeast of this city Monday of this week, and was buried at the Miller cemetery Wednesday. He was an honored pioneer and leaves a wife and four grown children, besides a large circle of friends. He was a neat, eighty-year-old man, and had been in poor health for some time past, although he was able to be around among his neighbors and friends most of the time, and often even to Scio. His death takes from us one more of those honored, hard working citizens who are responsible for the development of this country and for the pleasant homes that their children are now enjoying.

He was married to Miss Margaret Vale in 1846, who died in 1877. They have children were born to them, five of whom have preceded their honored parent to the silent grave. Mr. Brock was a man highly respected by all who knew him. He was an intelligent and industrious citizen, and had traveled in many parts of the world. He had always been in excellent health until the past three or four years, his death being caused by cancer on the face.

The funeral services were held Thursday and the remains were laid to rest in the Providence cemetery.

**Card of Thanks.**  
I wish to sincerely thank those who so kindly assisted me during the illness and death of my father, by both acts and words of sympathy, and trust that when similar afflictions are thrust upon them, that they may receive the same kind treatment that has been shown all of us in the loss of a dear parent.  
JOHN T. BROCK.

**They Are Seen Every Day.**  
Here are some questions about things you have seen every day and all your life says the Washington Star. If you are a wonder you may possibly answer one or two of the queries offered. Otherwise not.

What are the exact words in a two cent stamp and in what direction is the face on it turned?

In what direction is the face turned on a cent? On a quarter? On a dime?

How many toes has a cat on each fore foot? On each hind foot?

Which way does the crescent moon turn?

What color are your employer's eyes? The eyes of the man at the next desk?

Write down, offhand, the figures on the face of your watch. The odds are that you will make at least two mistakes in doing this.

Your watch has some words written or printed on its face. You have seen these words a thousand times. Write them out correctly. Few can do this. Also what is the number of the case of your watch?

How high (in inches) is a silk hat?

How many teeth have you?

What are the words on a policeman's shield?

How many buttons has the vest or shirt waist you are wearing?

How many stairs are there in the first flight at your house?

How many steps lead from the street to the front door of your house or flat?

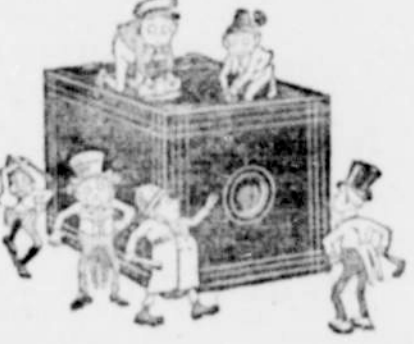

What is the name, signed in facsimile on any \$1, \$2, \$5 or \$10 bill you ever saw? You've read dozens of those names. Can you remember one?
