Shawknit Hose!

The Question of Dyes

Used by manufacturers of hosiery is of great importance. You should know about it, for cheap dyes are poisonous and are used frequently to make a larger profit at the wearers expense.

We guarantee all dyes used in all Shawknit half-hose for men, and ribbed hose for children, to be the costliest and purest dyes made. Our dyes are chemically tested by our own experts and are positively free from all injurious matter.

Our products are not affected by perspiration, never fade, stain, or run. Our colors will stand acid test—the most absolute test known.

Considerable dressed poultry is being shipped from this city at the present time, and the shipments will increase as the holidays approach. Our merchants pay the top price for poultry, and this fact brings a good many people here from neighboring towns with poultry, and while here they take advantage of the low prices prevailing at all our stores on merchandise of every kind.

Right at the present time our local columns are pretty well crowded with advertisements, but as soon as the holidays are over this state of affairs will not in all probability exist and then we shall be able to give our readers more local news. The advertisements, however are the life of a paper, and when its columns are well filled with it is an indication that the advertiser is getting good returns for his money.

Already "Feeling Their way."

The time of the year is fast approaching when political canidates will be coming forth from the brush and avowing their willingness to serve the public. Already several different parties are "feeling their way" toward a nomination on the county ticket. The rivalry promises to be equally spirited in the republican and democratic conventions. At this time it is generaly conceded that chances on either ticket will be about equal. Although no candidates have yet annouced themselves, Lebanon will in due time have full quota.—Lebanon Criterion.

The high wind of Tuesday night did a great deal of damage to telephone and telegraph wires throughout the valley.

"FORMALDEHYDE"

Used and recommended by the State Agricultural College—and every farmer who has tried it—as better, cheaper, and handier to use than blue vitriol to prevent smut in grain. A pint, costing 50c, to 48 gallons of water will effectually treat 150 bushels of wheat or 100 bushels of oats.
