EDITORIAL.

Most of the big sawmills of the Booth Kelly Lumbsr Co., and the mills of the Pacific Timber Co. have been closed for an indefinate period on account of lack of cars for shipping their product. Nearly all the sawmills along the line of railroads in Western Oregon are seriously affected from the same cause, so it is stated. The railroad company cannot be to severely censured for this existing state of affairs. Besides being a great inconvenience and loss to present established enterprises, it is a great detriment to the establishment of other industries, as no manufactoring concern is going to up not knowing whether it can dispose of its products or not.

A special session of the Oregon legislature will convene in Salem at 10 o'clock A. M. Monday, Dec., 21. The session was called in a proclamation issued by Governor Chamberlain. The purpose of the session is to correct the defect in the tax law arising from the amendments made by the passage of the Pheips bill last winter. The law as it stands now, does not authorize a tax levy in January, and without a change in the law the state, most all of the counties, and all the cities and school districts, would be without funds and would be paying interest on warrants for several years to come. The interest expense from this cause would be from $100,000 to $250,000. The cost of a special session, if brief, will not be more than $20,000.

Governor Chamberlain also ordered a special election in the Nineteenth Senatorial district, compse of Clatsop county, to fill the vacancy caused by the election of C. W. Fulton to the United States senate, and in the Ninth senatorial district composed of Crook, Grant, Kalamath and Lake counties, to fill the vacancy caused by tde election of J. M. Williamson to congress. The special session will be held Dec. 16,

Oh, Dear, No!

She had just commenced housekeeping, with the laudable intention of paying ready money upon all occasions, and she entered a high-class poulterer's shop in a London suburb to purchase a spring chicken.

She selected one, and while she was fumbling in her pocket for her purse the shapman politely inquired: "Trussed, madam?"

"Oh, dear, no!" she indignantly replied, "I wish to pay for it now!"—London Spare Moments.

ALL GIVE HIM THE ROAD.

One Driver for Whom Every Other Teamster on the City's Streets Quickly Makes Way.

Perennial in its power of attraction is the fire engine dashing along the city's streets on the way to a fire, and it fascinates all. And every driver and every motorman, every man handling anything on wheels gives the fireman the right of way and he does so spontaneously and gladly, says the New York Sun.

And often many drivers hold up all at once to give the driver of the fire engine his choice of ways, as they would where two streets cross, and they do this before they see the engine at all. But they know it's coming and they hear its whistle.

Here was an engine coming along a cross street to Broadway, whistle a calling. At the first note of it every motorman or driver who chanced at the moment to be near the junction of Broadway and this street, stopped short, leaving the central space unoccupied, and leaving clear channels away from it in every direction.

None of these drivers could know which way the fire driver would want to turn when he got to the corner, so they all stopped, to give him a free road in whichever way he wanted to go and when he had come and gone dashing round the corner they all started up again on their several ways. But so far as they could they had given the whole earth to him.

AUTOMOBILE SEA SCOUTS.

A Suggestion Which Might Be Adopted by Naval Powers to Their Advantage.

As military motor-bicycles have already proved themselves to be of value in scouting, it is probable that in nearly every civilized country they will be largely used in future land warfare. Why, if the fast land scout prove so useful, should not the navy adopt the same methods? A boat, 60 feet long, with two 25-horse power engines, built very light, to carry, say, four persons and to be capable of considerable speed, would be a most useful addition to a battleship of a fleet, says the London Star. The ordinary torpedo boat is too long and draws too much water for scouting near shore or in shallow water, but a launch might be made to draw less than three feet of water, and yet have a speed of upwards of 30 knots. There would be no funnels or smoke to attract the notice of the enemy, and with underwater exhaust the boat might be made almost silent. If built low in the water, or with the power of semi-submersion, it would be difficult to hit. Probably such a craft would be more useful than anything yet invented in the way of a scout for sea purposes.

MOUNTAIN PEAK MAY FALL.

Tourists Are in Great Danger from Threatening Mountain Top in the Alps.

Although it has been rumored throughout the Alpine region for some time that the Altels—the great mountain peak which rears itself high above the famous Gemmi pass—was in a more or less shaky condition, no one expected to hear that there was any danger of its falling. Now, however, it is definitely stated that the Altels is on the point of splitting in two and may come thundering down almost any time, says a report from Neuchatel, Switzerland.

Damage enough will be done if the famous peak does fall in any case, but it is to be hoped that the crash will come before the next tourist season begins, for the Gemmi, above which the Altels towers, is used to a greater extent than any other Alpine pass. The inhabitant of the region can imagine what will be the result if the Altels should come crashing down, having experienced such an occurrence on a smaller scale when glaciers from this particular peak have descended upon them. The last one fell in September, 1895, and many peasants were killed.

A CHICAGO "QUICK LUNCH."

It Took Only an Hour, But the Chicagoans Must Have Been "Joshing" the New Yorkers.

"Where can we get a quick lunch?" asked one of the official stenographers of the National Civic Federation who came on from Chicago to report the proceedings of the executive committee of the industrial department of that organization, reports the New York Times.

Before the reporter to whom the question was addressed could tell of the neighboring "beef-and" places which met his idea of a "quick lunch," the Chicago stenographer asked how far it was to ——'s, mentioning a place where a New Yorker would not go unless he had several dollars to spare for luncheon and a couple of hours to devote to gustatory delights.

The stenographers compromised on one of the best downtown restaurants.

"We had a good, quick lunch," said one of the stenographers on their return. "And it only took us an hour."

"Do you call that a 'quick lunch' in Chicago?" asked the reporter. "Anything over 15 minutes we call a dinner in New York."

Miss Ida M. Snyder,
Treasurer of the Brooklyn East End Art Club.

"If women would pay more attention to their health we would have more happy wives, mothers and daughters, and if they would observe results they would find that the doctors' prescriptions do not perform the many cures they are given credit for.

"In consulting with my druggist he advised McElree's Wine of Cardui and Thedford's Black-Draught, and so I took it and have every reason to thank him for a new life opened up to me with restored health, and it only took three months to cure me."

Wine of Cardui is a regulator of the menstrual functions and is a most astonishing tonic for women. It cures scanty, suppressed, too frequent, irregular and painful menstruation, falling of the womb, whites and flooding. It is helpful when approaching womanhood, during pregnancy, after childbirth and in change of life. It frequently brings a dear baby to homes that have been barren for years. All druggists have $1.00 bottles of Wine of Cardui.
