A Remarkable Cure of Dropsy by Dodd's Kidney Pills.

Sedgwick. Ark., July 11 .- The case of W. S. Taylor's little son is looked upon by those interested in medical matters as one of the most wonderful on secord. In this connection his father makes the following statement:

"Last September, my little boy had dropsy; his feet and limbs were swollen to such an extent that he could not walk or put his shoes on. The treatment that the doctors were giving him seemed to do him no good and two or three people said his days were short, even the doctors, two of the best in the country told me he would not get better. I stopped their medicine and at once sent for Dodd's Kidney Pills. I gave him three pills a day, one morning, noon and night for eight being usually based on experience and days; at the end of the eighth day the swelling was all gone, but to give the ful. Therefore we are not at all surmedicine justice, I gave him eleven prised to have received from a medimore pills. TRAVELING KITCHEN USED BY RUSSIANS.

Russia's soldiers in Manchuria are supplied with what is called a traveling kitchen. It consists of a cylindrical boiler having a cajacity of forty gallons and has a collapsible chimney. The boiler is mounted on a cart and a mule or pony draws it about with the troops. The soldiers pick up fowls, pigs and other edibles on the march. These are thrown into the boiler to simmer as the column proceeds. Tea and soup are always ready to be served. Thus it will be seen that troops that are successful in foraging can always have plenty of fresh meat in actual warfare.
