FIRE STILL BURNING

But Has Lost Its Fury and Is Now Slowly Dying Out.

NATION COMING NOBLY TO RELIEF

Foreign Countries Stand Ready With Help, But Their Aid Will Not Be Needed.

San Francisco, April 20. — Plunged into absolute darkness tonight at 10 o'clock, San Francisco has not seen the conclusion of the devastating work of the fire that started at Nob Hill and worked its way to the North Beach section, sweeping that section clear of buildings, was later veered around by a fierce wind and made its way southward to the immense wall sheds and grain warehouses. The flames were heading directly for the terminal point of all central overland and local trains of the Southern Pacific road. The darkness and the wind, which at times amounted to a gale, added fresh terrors to the situation.

DEATH LIST LARGE

Will Probably Exceed Even the First Estimates Made.

San Francisco, April 22. — Now that the extinction of the fire allows of inquiry, it has become known that hundreds, if not thousands, of people lost their lives, either in the collapse of buildings due to the earthquakes or in the fire which consumed the ruins in which they were imprisoned alive, but injured and powerless to flee. A merely partial estimate places the total at over 700 in the lodging houses and a few adjoining buildings.

South of Market street the loss of life was chiefly brought about by the collapsing of many cheap lodging houses. Among others, the caving in of the Royal, corner of Fourth and Minna streets, added to the horror of the situation by the shrieks of its many scores of victims embedded in the ruins.

The collapsing of the Portland house, Alhambra, on the corner of Sixth and Market, came about in a similar manner.

Probable Republican Ticket. Senator, short term, F. W. Mulkey. Senator, long term, H. M. Calk. Congressman, First District, W. C. Hawley. Congressman, Second District, W. R. Ellis.

Governor, James Withycombe. Treasurer, G. A. Steel. State Supreme Judge, Robert Eakin. Superintendent Public Instruction, J. H. Ackerman.

State Printer, W. S. Dunaway. Attorney General, A. M. Caswell. Labor Commissioner, O. P. Hoff.

ner. Fully 60 persons were entombed. Many of these were saved before the fire eventually crept to the scene.

The large five-story Frankwick lodging house, with its 300 rooms filled with guests, on the corner of Sixth and Howard streets, collapsed to the ground entirely and fire started amid the ruins scarcely five minutes later. It is estimated that over 100 persons lost their lives in this building.

Part of the large Cosmopolitan house, corner Fifth and Mission streets, collapsed at the very first tremor. Many of the sleepers were buried in the ruins, others escaping in their night clothing.

At 775 Mission street, the Wilson house, with its four stories and 80 rooms, fell to the ground a mass of ruins. As far as known very few of the inmates escaped.

RESTORING WATER SERVICE. Within Four Days City Will Have Half Normal Quantity.

San Francisco, April 22.—Experts of the Spring Valley Water company who have been engaged in making a thorough examination of the mains and reservoirs in the system have reported that the company has in its reservoirs enough water to supply the city at the regular rate of 30,000,000 gallons per day for a period of 600 days.

The only immediate problem is that of getting this supply into the city. Already pipes have been repaired in certain sections, and a supply of 7,000,000 gallons per day is coming in through Ocean View from Lake Merced. Along with this supply into the city is being consumed daily by Ocean View and the other towns along the pipe lines, but 6,000,000 gallons daily is reaching and will continue to reach the city proper.

Within a few hours another supply of 6,000,000 gallons daily will be poured into the city from College Hill station. This will furnish water to the southern section of the city. Already water is being supplied to the Black Point and Pacific Heights districts, and with an additional supply of 4,000,000 gallons daily, which is assured from lines that will be repaired within a day or two, the city will within four days be receiving a daily supply of between 16,000,000 and 17,000,000 gallons, which is practically equivalent to half the amount that was being furnished to the entire city prior to the earthquake.

This, however, is certain that the city will be habitable again almost immediately. A food supply has already been assured.

Earthquakes at Grants Pass. Grants Pass, Or., April 23.—An earthquake shook Grants Pass some windows and awake sleeping citizens was felt here at 1:11 this morning. The shock lasted between 15 and 20 seconds and was accompanied by a distinct rumbling noise. The motion of the undulation was from east to west and the oscillation was sufficient to sway hanging lamps and pictures to setting. Mayor George Good states that the shock was felt over a wide area, which is a structure 75 feet in length and two stories high.

South San Francisco Burns. Oakland, April 22.—A report reached here from San Francisco at midnight that a brisk fire is burning in South San Francisco. The illumination can readily be seen from this side of San Francisco bay, a distance of eight miles. It is believed that the fire broke out fresh from smoldering embers that could not be subdued on account of the lack of water. When the fire was pronounced to be practically out in San Francisco, several frame buildings were standing in South San Francisco.

Docks Still Do Business. San Francisco, April 22.—South of Market street the loss on the water front proper is comparatively small. Several sheds have been entirely reconstructed and small repairs will have to be made to one or two of the docks, but beyond this the property loss is insignificant. There is nothing to interfere with the unloading of ships and steamers at any of the docks south of the ferry building, save at pier No. 2 of Mission dock.

Glendale is Badly Shaken. Glendale, Or., April 23.—A distinct shock of earthquake was felt in this city at 11 minutes after 1 o'clock this morning. The shock was apparently heavier than the one of April 18, causing buildings to rock and rattle.

SKIN DISEASES

ACNE, TETTER, ECZEMA, PSORIASIS, SALT RHEUM.

There is nothing more distressing than an itching, burning skin disease, and upon the return of warm weather those who are afflicted with skin troubles find the symptoms appearing and know that they will be tormented through the hot summer months. The blood is heated with humors and acrid matter, and as they are forced to the surface the skin seems to be on fire. The treatment of skin diseases with external applications is all wrong, because they do not reach the trouble which is in the blood. The most such treatment can be expected to do is, allay the itching and burning and cover up the trouble for awhile, but as soon as it is left off the disease returns.

All food taken into the body contains, in some form, the elements necessary to sustain the different parts. One portion is used for the making of blood, another for muscle, one for bone, still another for fat, and so on. After these different properties are extracted from the food there still remains a portion that is useless, or waste matter, which is intended to be disposed of through the natural channels of bodily waste, the Liver, Kidneys and Bowels. At this season of the year, however, these organs become torpid, dull and sluggish, and fail to perform this duty, and these accumulations remain in the system and are absorbed by the blood to ferment and sour, producing burning acids and acrid humors. The blood cannot properly nourish the system while in this impure condition, and begins to throw off these acids through the pores and glands of the skin, producing Acne, Eczema, Tetter, Psoriasis, Salt Rheum and skin diseases of every description.

EOZEMA appears usually with a slight redness of the skin, followed by pustules from which there flows a sticky fluid that dries and forms a crust, and the itching is intense. It is generally on the back, breast, arms, legs and face, though other parts of the body may be afflicted. In TETTER the skin dries, cracks and bleeds, and is often very painful. The acid in the blood dries up the natural oils of the skin, causing a dry, feverish, hardened condition and giving it a leathery appearance. AONE makes its appearance on the face in the form of pimples and black-heads, and is particularly disagreeable because of its unsightly appearance, while PSORIASIS, a scaly disease, comes in patches on different parts of the body. One of the worst forms of skin disease is SALT RHEUM. It discharges a watery fluid, forming sores and producing intense itching. The head and face are the parts usually affected, and sometimes the hair falls out and a mass of sores forms on the scalp.

These and all skin diseases are due to the same cause—burning acids and humors in the blood, and until this vital fluid is cleansed and made pure they will continue. The best treatment for all skin diseases is S. S. S., a remedy that is purely vegetable, being made entirely from roots, herbs and barks, and acts directly on the blood with a cleansing, healing effect. It neutralizes the acids and purifies the blood so that the skin, instead of being blistered and burned by the fiery fluids, is nourished by a supply of cooling, healthy blood. It goes down into the circulation and forces out every particle of waste or foreign matter, builds up the blood and cures all skin diseases promptly and permanently. S. S. S. does not leave the least particle of the poison for future outbreaks, but entirely rids the blood of the cause for all skin diseases.

S. S. S. tones up the system and regulates the Liver, Kidneys and Bowels so that they will carry off the natural waste and refuse matter through the proper channels, instead of leaving it to be absorbed by the blood. Nothing equals S. S. S. in the treatment of these troubles and for building up the general health. Write for our treatise on skin diseases and any medical advice you wish. We make no charge for either.
