Scio would be a first-class location for a milk condensing plant. The dairy industry is growing among our farmers. Daily there are several thousand pounds of cream shipped to the various creameries. We are informed that a condensing concern can pay more than a creamery can afford to pay for milk. If so the thousand or more cows in this locality would supply milk sufficient to keep a condenser in operation.

A very interesting game of base ball was played at Jefferson last Sunday evening. The teams purported to be Jefferson vs Turner, but we were told that but very few of the blayers belonged in either town. Players from all over the valley were on the diamond. At all events the game was a good one and while there were several errors on either side, there were several very pretty and skillful plays. Marvin Turner, of Albany, handled the indicator. The score as announced at the close of the game: Turner 5, Jefferson 2. A large crowd was in attendance; from Albany, Stayton, Turner and Scio. The game for a wonder, was free from wrangles and disputes.

PRACTICALLY A FAILURE.

The experiment that is being made in this vicinity in raising hemp, owing to the unfavorable season seems destined to prove a failure. Out of the 120 acres of hemp seeded by our ten or twelve farmers, but two or three crops will be worth harvesting. The conditions during seed time and for a short time thereafter, gave promise of an abundant crop. Then came the month of unprecedented cold rains, followed almost immediately by excessively and continued hot weather, proving most unfavorable for the successful growth of the plant. Mr. Hansen, who is foreman for Mr. Bosse in matters pertaining to the culture of flax and hemp, was up from Salem last week and visited the various hemp fields. He found but few fields that would pay to harvest. Mr. Bosse certainly deserves sympathy for the efforts he has made to establish the fiber industry in Oregon. Rare and unfavorable conditions, with which he has had to contend, are certainly enough to discourage the most sanguine operator. Mr. Bosse has spent several thousand dollars in attempting to establish this industry in the valley. What his future movements may be, we have not heard, but we do know that his stock of pluck and perseverance, under most discouraging conditions, have been worthy of success. We know that flax can be successfully grown here and that the quality of the fiber is equal if not superior to that of any other locality. We also believe, with a favorable season, that hemp will do equally well.

Chased the Rabbit.

R. Shelton, Johnny Gill, Rev. Richmond, T. J. Munkers, and several hounds were out jackrabbit chasing Wednesday morning. Mr. Rabbit was raised and gave the aforesaid chasers an hour or two's diversion. Jack finally concluded he was tired of such nonsense and accordingly struck out South at a gait that paralyzed both men and hounds with astonishment; all but T. J. Munkers who was mounted on horseback and who started to follow the rabbit as fast as his horse could go, at the same time pointing in the direction the rabbit had gone and beckoning to men and hounds to come on. The party returned to town considerably blown, as if the exercise had been rather vigorous. The rabbit probably thought the bunch were great chumps to think that they could even give him exercise, and as he passed over Cemetery Hill he, figuratively, waved his hand and exclaimed, "So long, boys!"

New Naturalization Law.

Governor Chamberlain is in receipt of a copy of the new naturalization law as enacted by the last session of Congress, which provides that the Federal government, through an executive office, is charged with the general control of the naturalization of aliens. Only the courts of states and territories which have a seal, a clerk and a jurisdiction in actions at law or equity, or law and equity in which the amount in controversy is unlimited, can hereafter entertain applications for naturalization. This law has the effect of taking the issuance of naturalization papers to aliens out of the County Courts in this State, and the duty devolves upon the Circuit Courts of the State, the clerks of which must apply for the necessary blanks.

Scio Needs Capital

To manufacture the billions of feet of lumber our forests can supply; to manufacture the thousands of tons of mineral paint that lies in the ground near our city; to establish a creamery, cheese factory or a condensed milk plant, and to establish a furniture or chair manufactory. We can supply the raw material in abundance for any or all manufacturies indicated above. Any person or company which has the capital and technical knowledge in these lines, who is seeking a field for investment, would receive all the encouragement our people can give. The field in either case is worthy of investigation.

Requisition Secured.

Deputy Sheriff Stellmacher, who on account of the absence of both the Governor and private secretary, was unable to secure papers for the requisition of Stephen Hartgrove, on Saturday, returned to Salem this morning and obtained the necessary papers, coming home this noon. He will leave on the Overland tonight for Pasadena, Cal., stopping on the way at Sacramento for the necessary papers from California. It requires a good deal of red tape, but the case justifies it. An example should be made of forgery cases.—Democrat, Monday.

Engines Repaired.

I hereby announce that I am prepared to repair and put in running order threshing or other engines. Don't wait until you want to commence threshing before looking after your engines. I will, also, during harvest, be ready night or day to repair break downs. Charges reasonable.
