**NEWS OF THE WEEK**  
MANY TO MEET AT BOISE.

Interest High in Coming Session of  
Irrigation Congress.

North Yakima, Wash., Aug. 7.—  
During the first week of September the  
National Irrigation congress will be in  
session at Boise Idaho, with an attendance  
of several thousand delegates. Exhibits  
of fruit and honey are being prepared  
by different localities and states. The  
premises are liberal. It is expected that  
the governor of Washington will appoint  
25 delegates, that each board of county  
commissioners will appoint five. It is  
believed that if a full delegation attends  
the convention it will be able to do much  
for the national congress at some point  
in this state. It is hoped that the various  
fruitgrowers' associations and the  
State Beekeepers' association will have  
each the fairest representation at some  
point in this state. It is hoped that the  
various fruitgrowers' associations and the  
State Beekeepers' association will have  
each the fairest representation at some  
point in this state. It is hoped that the  
various fruitgrowers' associations and the  
State Beekeepers' association will have  
each the fairest representation at some  
point in this state.

**HAPPENINGS OF TWO CONTINENTS**  
A Resume of the Less Important but  
Not Less Interesting Events  
of the Past Week.

Russian Radicals have issued a new  
strike manifesto.

The Iowa Democratic convention will  
declare for Bryan.

Many deaths from heat stroke reported  
on the Atlantic coast.

Three negroes have been lynched by  
mob at Salisbury, N. C.

An outbreak of Palaujan and Igorotes  
has occurred in the Philippines.

The general strike in Russia will be  
a success unless the railroad men join it.

The Pan-American congress, in session  
at Rio de Janeiro, voted for universal  
arbitration.

**REPORT ON OREGON.**  
Irrigation Expert Investigates State  
and Issues Circular.

Washington—Oregon farmers who re-  
spond to irrigation, will be deeply inter-  
ested in a 30-page circular just issued  
by the department of Agriculture, en-  
titled "Investigations of Irrigation Prac-  
tice in Oregon." The book is written  
by A. F. Stover, irrigation engineer,  
who spent last season in Oregon making  
a study of irrigation as it is practiced,  
so as to find out the errors that have  
been made and gather data which would  
be helpful in instructing the irrigators  
how to avoid mistakes of the past. The  
report is not as comprehensive as might  
be desired, but contains a great many  
valuable suggestions, and is worth the  
purchase of every farmer who is obliged  
to irrigate his lands.

Mr. Stover made a study of the pre-  
paration in various parts of the state,  
and to a limited extent gathered data  
on the discharge of the principal  
streams that can be utilized for irrigation.  
He states, in opening his report, that  
the greater part of the arable land  
of Oregon lies in the arid section and  
can be brought under intensive culti-  
vation only by irrigation. He found  
that the low water flow of most of the  
streams of Eastern Oregon has already  
been appropriated for private irrigation,  
but as yet practically no steps have  
been taken to conserve the winter  
floods.

He finds that little of the water now  
being diverted is used economically, so  
that there is a large supply for future  
development.

Because of its comparatively low ele-  
vation and consequent mild climate,  
Mr. Stover says that Northwestern Ore-  
gon has advantages over the south east.  
The practice of winter irrigation,  
now practiced along the Umatilla river,  
is described, and the value of this prac-  
tice is indicated. It is shown that  
these Umatilla lands, under the Max-  
well flood water canal, yields a net  
profit of \$24 an acre, when planted in  
alfalfa. It seems that the Umatilla  
valley, however, is exceptionally well  
adapted for this sort of irrigation, be-  
cause of the unusual formation of the  
soil and the underlying bed rock. Few  
localities will be found where winter  
irrigation is as successful as that of the  
Butter creek, where winter irrigation  
has reached the highest stage of perfec-  
tion, fruits are successfully grown by  
combining the principles of winter ir-  
rigation with the use of the water out-  
let of Three-Mile, Galt and Rock creeks,  
thus shutting off the supply of the settlers  
for household and stock use. They want  
to know whether the governor can start  
the machinery of the state government  
in proceedings to protect their rights.

is described, and the value of this prac-  
tice is indicated. It is shown that  
these Umatilla lands, under the Max-  
well flood water canal, yields a net  
profit of \$24 an acre, when planted in  
alfalfa. It seems that the Umatilla  
valley, however, is exceptionally well  
adapted for this sort of irrigation, be-  
cause of the unusual formation of the  
soil and the underlying bed rock. Few  
localities will be found where winter  
irrigation is as successful as that of the  
Butter creek, where winter irrigation  
has reached the highest stage of perfec-  
tion, fruits are successfully grown by  
combining the principles of winter ir-  
rigation with the use of the water out-  
let of Three-Mile, Galt and Rock creeks,  
thus shutting off the supply of the settlers  
for household and stock use. They want  
to know whether the governor can start  
the machinery of the state government  
in proceedings to protect their rights.

**DARK HOUR IN RUSSIA.**  
New Mutinies Break Out as Fast as  
Others Are Suppressed.

St. Petersburg, Aug. 3.—Nearly 3,000  
sappers, sailors, pioneers and miners  
at Cronstadt mutinied about 11 o'clock  
last night. They planned to seize the  
forts and the bridge leading to Fort  
Cronstadt, but their plans were foiled  
by the precautions taken by the com-  
mander. After a severe fight the loyal  
troops opened fire on them with  
machine guns, and as they had no at-  
tillery available and the arsenal had  
been stripped before they could seize it,  
they had no alternative but surrender.  
A court martial began sitting this  
morning, and is sentencing the mutin-  
eers to death by hundreds.

St. Petersburg, Aug. 3.—The crew of  
the armored cruiser Pamyat Azova  
mutinied off the Estonian coast and is  
now in full possession of the ship,  
which has sailed northward in the di-  
rection of the Finnish gulf.

St. Petersburg, Aug. 3.—The crew of  
the Russian cruiser Asia, which was  
sent to Aho, has hoisted the red flag.  
The vessel has left in the direction of  
Sevastopol.

The ministry of marine has confirmed  
the report that Admiral Birlikoff had  
gone to Helsinki on board the school ship  
Asia, whose crew has mutinied.

St. Petersburg, Aug. 3.—Military  
disorders have broken out at Revel.  
Details cannot be obtained.

St. Petersburg, Aug. 3.—Although  
the mutinies at Sevastopol have been  
ended and the one at Cronstadt has  
been practically put down, the outlook  
is still black. The revolutionists,  
whose hands were suddenly forced by  
the premature rising at Sevastopol,  
apparently are undaunted at these initial  
reverses and intend to persist in their  
program of calling a general strike on  
Saturday or Monday.

St. Petersburg, Aug. 3.—On the heels  
of the other had news come of the  
startling statement that the emperor  
has daily tried to arrange conditions  
to which Premier Stolypin agreed in  
his negotiations with Count Heydon,  
Alexander Guichouff, Prince Nicholas  
Loff, Paul Vinogradoff and Senator  
Kont for the reorganization of the  
cabinet.

There is an increasing apprehension  
that the emperor proposes to take the  
final step of turning the country over  
to the military dictatorship of Grand  
Duke Nicholas.

The streets of St. Petersburg are  
again filled with patrols.

**PACIFIC AID ASSOCIATION**  
Of Portland, Oregon  
**Pays Sick, Accident, Death Benefits**  
DUES \$1.00 PER MONTH  
NO MEDICAL EXAMINATION

For particulars see  
GROVER POMEROY T. L. DUGGER  
Agent SCIO, OREGON Collector

**LUMBER! LUMBER!**  
H. D. Landon, of the Bilyen Den Sawmill, is prepared  
to fill orders for  
**Common or Finishing Lumber**

Orders taken at the yards in Scio or at the mills in Bilyen Den.  
His lumber is the best of mountain fir, and prices are reasonable.

**LANDON! LANDON!**

**SCIO LIVERY & FEED STABLES**  
Irvine & Myer, Props.

Hack connects with all trains at West Scio  
and morning train at Munkers.

Our rigs are first-class and our horses good  
drivers. Prices reasonable.
