A MOVEMENT FOR THE SANTIAM FAIR

Share Holders of The Santiam Agricultural Association Elect a Temporary Organization.

Pursuant to a call, the share subscribers of the Santiam Agricultural Association met at the Firemen's hall, in this city, last Saturday afternoon.
Mayor A. G. Prill called the meeting to order and after stating the object of the fair proposed or drop the matter entirely. After some little discussion it was voted to elect temporary organization. Mayor Prill stated that 62 shares had been subscribed for, leaving 38 shares to be provided for.
The following temporary officers were selected: A. G. Prill, president; T. M. H. H., vice president; T. L. Dugger, secretary; M. C. Gaines, treasurer.

It being deemed advisable by a motion, the chairman appointed the following committees: Committee to look up grounds, J. A. Bilyeu, T. M. H. H. and T. M. Holt.
Permanent Organization by laws, etc., T. L. Dugger, L. E. Miller and A. E. Randall.
Soliciting committee, L. Bilyeu, C. H. Wain, J. A. Bilyeu, M. C. Gaines and Carl Middlestad.

Meeting adjourned to meet four weeks from date of first meeting, January 19.
The fair proposition is now in the hands of the farmers. It depends now just upon the amount of interest manifested. With a united endeavor, in which everyone is willing to do his part, the fair is bound to be a splendid success. If even a few are disposed to pull back and disagree with any plan proposed, yet not proposing a better plan, the enterprise is doomed. The balance of the subscription to the capital stock can be easily obtained and grounds conveniently situated can be secured at moderate cost. Just a unit of action in which everyone is willing to give his or her aid and be willing to submit to the rule of the majority, no matter whether the plan may be just to your liking or not, all that is necessary to make the first annual fair of the Santiam Agricultural Association a splendid success.

J. H. Pundexter, while working in the woods lately came across a large ash tree that has evidently succumbed to the heavy wind. The tree being hollow had been appropriated as the home of a large colony of bees, as could be seen from two stiff rent holes. Joe thought he could see just as well at a distance, so did not exert to how much honey was in the hollow.
