### IF YOU WANT

The News is in receipt of a communication from Railroad Commissioner Oswald West, in which the Commissioner advises a mode of procedure to govern shippers and make their interests more fully protected. Mr. West says:  
"Shippers are advised to make their application for cars in writing, and to specify in their orders the items lettered 'a' to 'f' inclusive in paragraph 1 of the regulations. This will enable a complete record to be kept, which will show at all times the actual condition as to cars ordered and supplied, applications unfilled, and will disclose the presence or absence of discrimination in filling shippers' requisitions. The records are to be public. Any shipper will be entitled to inspect the record at his station, or the dispatcher's office at any time during business hours. If the record is not kept at any station, or if access is denied to bona fide shippers, this Commission will not take to see the practice is corrected if the facts are reported to it at Salem."

### WILL HAVE MILK CONDENSER.

An Albany special to Monday's Oregonian says:  
A milk condensing plant, to cost at least \$40,000, is assured for Albany. The stock for the milk plant has been subscribed, and stockholders will meet in this city at 2 o'clock Tuesday afternoon to form the company to manage it. It is planned to erect the plant this summer.  
The establishment of this industry has been promoted by H. H. Olmstead, representing Eastern manufacturing interests. For the past month he has been securing subscriptions of stock and enlisting farmers to furnish milk for the enterprise. Most of the stock for the plant has been subscribed by Linn County people.  
The plant, as it is proposed to erect it, will utilize 80,000 pounds of milk a day, and to furnish this milk 5000 Linn County cows have been listed. Farmers in the vicinity of Albany, Lebanon and Scio have agreed to furnish a certain number of cows each, bringing the total up to 5000 for the first year. If the plant is founded and succeeds, these farmers have promised to double the number of cows for the second year, making a list of 10,000 cows to supply milk for the plant.
