The constant steady hum of the Scio Milling Co's machinery is a sound pleasant to hear. Manager Warner tells of an increasing local flour trade. He thinks he will be compelled to get out among the farmers next year and solicit wheat, in order to have enough to supply the trade with flour and feed.

Now that election is past and prosperity assured, citizens of Scio, should be up and doing. We need a jay roll here. We want manufacturing enterprises of every kind. The Corvallis Times says "Men Cannot Worship behind a Merry Widow." Of course not brother, he is thinking about how he may take the title "Merry Widow" in out of the wet. Again yes. Does not Holy Writ say something about going in to a closet "When thou prayest." If these modern head gear creations do not form an ideal closet they make one think about one, any way, or something else.

The County Court has concluded that all this talk about codlin moths and San Jose scale is mere balderdash and our apples are not wormy, etc. This being the conclusion, the court could see no earthly reason for the employment of a fruit inspector. So at the late session, the Court gave E. C. R. Berta, who has been looking after the fruit pest for the past year, the g. b. It is now in order for the afore-said codlin moths and the scale, which hies from our neighbor on the South, to tender the court a vote of thanks.

**ALBANY'S APPLE FAIR**

On Tuesday the NEWS man spent a few hours in Albany, looking at the big old apples. And say! Hood River, some river nor no other locality on the Pacific Coast, or any where else for that matter, can furnish apples superior to those there shown. There were Spitzenbergs, kings, jonathans, northern spits, waxens, balsam apples, headlaxs, bell-liners (two varieties) and numerous other varieties, each variety of uniform size and without a blemish. What utter could one expect to find grown in the fancy priced lands of Hood River? And these apples were grown in the comparatively cheap Willamette Valley land of which there are thousands of acres. As a matter of course, the fruit on exhibition at Albany had been taken care of while growing, just the same as Hood River orchardists give their orchards.

The Apple Fair is proving to be an eye opener to many of our farmers whose fruit, plentiful as it is, is valueless as a market fruit. These splendid specimens of the apple family demonstrate the difference between care and neglect. Oregon is the best fruit country in the world; but she will not grow prize fruit, with out care and the fair is pointing out this fact in a most forcible manner. As a result farmers will no longer neglect their orchards. What one fruit grower can do others can do if they will. Clean up your trees. Cultivate them. Manure them and give them a fair show and they will do the rest.

Another feature of the day at the county seat, was the dedication of the new depot building. Large delegations from points North to and including Portland and to Eugene in the South helped to swell the crowd. The exercises occurred in the afternoon and consisted of music by the elegantly uniformed R. P. O. E. band, of Albany, and the Eugene band, followed by short addresses by Mayor Wallace, Manager J. P. O'Brien, Mr. W. W. Coates, C. A. Malburn and others.

Albany has a very neat and substantial depot building, situated on the extreme North side of the rail yard and, though having a somewhat square appearance, when completed, will add materially to the safety and convenience of the traveling public. The location of the station buildings on the town side of the track, is a matter which Albany citizens have been calling for, for years and, though somewhat belated, the public will no doubt be glad to see to whom thanks are due.
