

The Mission

Of those corpuses in your blood that have been called "Little Soldiers," is to fight for you against the disease germs that constantly endanger your health. These corpuses are made healthy and strong by the use of **Mood's Sarsaparilla.**

This medicine is a combination of more than 20 different remedies in proportions and by a process known only to ourselves and it has for thirty years been constantly proving its worth. No substitute, none "just-as-good."

On a Pinch.
"For the present," said the political magnate, "you will have to be satisfied with filling some temporary vacancy from time to time."
"I'll be more than satisfied," faltered the despairing officeholder, "with anything that will fill the vacancy in my stomach from time to time!"

FITS Dr. Vitar's Dose and Instructions permanently cured by Dr. J. J. Moore's Great Nerve Restorer. Sold for \$2.00 per bottle and treated by Dr. R. H. Kline, 141 Arch St., Philadelphia, Pa.

Strung!
Nan—the trouble with Billy is that he's awkward when he's in company. He doesn't know what to do with his hands.
Fan—Oh, yes, he does; he told me once that you were too many pins in your belt.—Chicago Tribune.

Typewriters "New York Times" All make result like new, at second-hand prices. Two Smiths, three Remingtons, four Underwoods, five Monotypes. Machines rented, \$2 to \$10 monthly. The Typewriter Exchange, 20 Montgomery, San Francisco.

Looked Suspicious.
Captain (of baseball nine)—You think Stumpy is getting sort of weak in his mind? Why?

Manager—He renewed his contract for this season without making a kick for a higher salary.—Chicago Tribune.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy for their children during the teething period.

What was it Priscilla said to John Alden?
"You mean, 'Speak for yourself, John?'"
"Yes; what did she mean?"
"I don't know what she meant, but I know it must have been before she and John were married that she said it."—Houston Post.

C. Gee Wo
The Chinese Doctor
This wonderful man has made a life study of the properties of Roots, Herbs, and Barks, and is giving the world the benefit of his services.
No Mercury, Poisons or Drugs Used.
Operations or Cutting Guaranteed to cure Catarrh, Asthma, Lung, Stomach and Kidney troubles, and all Private Diseases of Men and Women.
A SURE CURE
Just received from Peking, China—safe, sure and reliable. U. falling in its works.
If you cannot call, write for symptoms blank and circular. Inclosure 4 cents in stamps.
CONSULTATION FREE

W.L. DOUGLAS
\$3.00 SHOES \$3.50
The Reason I Make and Sell More Men's \$3.00 & \$3.50 Shoes Than Any Other Manufacturer is because I give the wearer the benefit of the most complete experience in shoe-making industry. If I could show you how carefully W. L. Douglas shoes are made, you would understand why they hold their shape, fit better, and wear longer than any other make.
My Method of Tanning the Soles makes them More Flexible and Longer Wearing than any other.
Shoes for Every Member of the Family, Men, Boys, Women, Misses and Children.
CAUTION! Some persons without W. L. Douglas's name and price stamped on bottom. Feet Color Exploit Used Exclusively. Catalog mailed free.
W. L. DOUGLAS, 187 Spark St., Brockton, Mass.

MAPLEINE
A favoring used the same as lemon or vanilla. By dissolving granulated sugar in water and adding Mapleine, a delicious syrup is made and a syrup better than maple. Mapleine is sold by grocers. If not used for 25¢ per bottle and recipe book. Crescent Mfg. Co., Seattle, Wa.
KC BAKING POWDER
COMPLIES WITH ALL PURE FOOD LAWS
Makes the Baking Sweeter, Lighter
Always works right NO FAILURES Costs YOU Less NO TRUST PRICES
25 Ounces for 25 Cents BEST AT ANY PRICE or your money back

FAIR IS COMPLETE.

First Japanese Stowaway.
The first Japanese stowaway ever brought to Boston arrived on a steamer from London the other day. He gave his name as Tansu Nakamura, aged 30, and claimed to have been a member of the crew of an American sailing vessel.

It was learned that he was a sailor on board the ship Johanna, which arrived at Falmouth, Eng., some months ago. He was starving in London when he determined to come to this country. He wandered about the docks in the Thames and stole on board the Philadelphia and hid in the coal bunkers.

Nakamura said he was all through the Russian-Japanese war, having been one of the crew of a cruiser in the Japanese fleet.
Inspector Root examined the man and ordered that he be sent back on the Philadelphia when she leaves on her return trip.

Those who keep Hamlin's Wizard Oil in the house do not have to buy any other remedy for sore throat. No other remedy will cure this trouble so quickly or so surely. Remember this.

Declined the Part.
Percy—Emeralda, will you marry me?
Emeralda—No; Gwendolen refused you last night, and I'm not acting as first aid to the injured.

Cautiously They Are.
"Professor, what is the meaning of the word 'monologue'?"
"My dear sir, consider the derivation of it. 'Mon' is slang for 'money,' and 'logue' means 'a word.' 'Monologue, words for money.'"

Good for Sore Eyes.
For over 100 years PETTIT'S EYE SALVE has positively cured eye diseases everywhere. All druggists or Howard Bros., Buffalo, N. Y.

The chimney swift is truly a bird of the air, for it never alights on a fence or building. It drops into the top of some wide-mouthed chimney and clings to its rough sides with tiny feet.

The Luckiest Man.
Eben—So Miss Antique is going to get married at last. Who is the lucky man?
Flo—the clergyman. He's going to get paid for it and assumes no responsibility.

Shake Into Your Shoes
Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting, sweating feet. Makes new shoes easy. Sold by all Druggists and Shoe Stores. Don't accept any substitute. Sample FREE. Address A. B. Gustaf, Le Roy, N. Y.

Probably Not.
Provoked Mother—Tommy, you're the plague of my life!
Tommy (sneezing up to her)—You wouldn't talk that way if somebody'd kidnap me, would you, mamma?

In a Different Class.
"I hear, Mike, that your wife has gone into society. Has she become a clubwoman yet?"
"Indeed, no; she has not got into that class; she still uses a flatiron."—New York Times.

States May Lose.
Appropriations for Rivers and Harbors May Revert to Government.
Washington, May 10.—Unless congress takes specific action at the special session now in progress, nearly \$1,000,000 appropriated for river and harbor improvements in various sections of the United States will be turned back into the national treasury, much to the chagrin of many congressmen and senators.

This situation arises over the "covering back" section of the sundry civil bill, approved March 4. This section provides that all unexpended balances of appropriations that remained on the treasury books June 1, 1904, except permanent specified appropriations, judgments and findings of courts and trust funds and appropriations for fulfilling treaty obligations with the Indians be carried to the surplus fund and covered back into the treasury, "provided that the money is not needed to pay existing treaties."

To meet the situation, Senator Burton has introduced a resolution providing that the section of the sundry civil bill in question shall not be construed as applying to the unexpended balances in river and harbor appropriations which may be essential, in the judgment of the secretary of war, for the maintenance and prosecution of the work for which it was appropriated.

Among the appropriations that will revert are:
Mouth of Columbia river, Oregon, \$24,000; entrance to Coos bay, Oregon, \$23,000; restraining barriers Sacramento and Feather rivers, California, \$14,000; and harbor at Tacoma, Washington, \$11,000.

West Rich; Stones Go Up.
New York, May 10.—Because of the demand of the West and Southwest for precious stones the price of diamonds and pearls is to be increased soon. Prosperity in those sections is credited by the Maiden Lane dealers with causing them to do more than 100 per cent more business in precious stones last April than during the same month last year. A leading importer is quoted as saying that as soon as the tariff question is settled there will be an increased price on diamonds at least, if not on other precious stones.

Suggests Gambling Antidote.
Butte, Mont., May 10.—"Go after the fellows who own the buildings where gambling is conducted," said District Judge Donlan this morning to Assistant County Attorney Baldwin. "They're the people to prosecute. I want to see you get some of them. And I want to say right now that gamblers will get no more continuances in this court. These fellows have been petted around as if they were useful citizens, but it doesn't go any more."

1,000 Cabdrivers Strike.
Chicago, May 10.—One thousand cab drivers went on strike tonight, following a conference between the liverymen's association and the union. The drivers demanded \$14 a week, and refused to compromise for \$13. Tomorrow 100 funerals are scheduled to take place. The police refuse to give funeral processions right of way.

HELLO! PARIS.

Uniting France and America by Wireless Phone.
"Hello, Paris! This is New York." To start a conversation like this across the universe seems like an achievement beyond the dream of a Jules Verne or the imaginative picture of a Bellamy Storer, yet in the busiest city of the world, New York, such an experiment will take place shortly, with every assurance of success.

On this occasion, when science announces its triumph to the world, society of the nations will offer its congratulations in a unique and unrivaled manner, and will feature on its social calendar a luncheon at which Frederick Townsend Martin will preside, that for interest and charm will make all past society events seem commonplace, when the first wireless luncheon will take place in the salon of the Hotel Plaza.

While this luncheon is being served a voice will speak uniting two of the greatest nations of history. It will be the voice of America's most prominent society man, reading a message of President Taft to President Fallieres of France. It will be transmitted to Mrs. Nora Blatch DeForest in the Metropolitan tower, the talented pioneer of her sex in this field and foremost woman civil engineer in the world, who will receive this message from the Plaza and send it over a radio wireless telephone at the rate of 186,000 miles a second, to a fair daughter of France in the Eiffel tower.

The salon will be decorated to resemble a forest. Trees will be in full bloom and birds singing from their branches. Presiding at this table will be Mr. Frederick Townsend Martin who will be the guest of the American Wireless association of which Dr. DeForest is president. The guests will be leading society people and scientific men of note. Mons. Etienne Lissac, consul general of France, representing the French government and one of its guests of honor, has said that if wireless telephony is brought to a state of perfection it will become a political and diplomatic time saver.

The table will represent the Atlantic ocean. At one end will be the Metropolitan tower, architecturally raised in candor; at the other end will be the Eiffel tower. On this miniature ocean will be small ships of various nations sailing back and forth. The shore landings of both France and America will be appropriately represented.

The menus will be small telephone directories, and the dishes will be listed as telephone numbers. The place cards will be wireless messages sent from the Ritz Carleton in France to the guests assembled at the Plaza in America. These messages will be received through wireless table phones permitting the guests at both tables to converse with each other, although separated by half a world.

The waiters will be summoned by wireless telephone and at the end of the luncheon will be called by this means. The favors will be small radio sparkless wireless telephone outfits of very light weight and will be utilized by the guests in the ceremonies attending the luncheon and carried away to commemorate the latest gigantic feat of modern science.

It will take just one fortieth of a second for the message to travel across the Atlantic and about one-seventh of a second to go around the world. Following this, mutual toasts will be given by the guests of this wireless luncheon who will be separated by an ocean, yet able to converse as if face to face.

The value of this marvelous scientific and mechanical feat, can hardly be estimated, and will stand among the first half dozen scientific wonders of all time. Its effect upon the transmission of commercial business will be revolutionary, and will mean that we can communicate with Europe at the cost now prevailing for a domestic telegram.

The great station in the Metropolitan tower is now being rushed to a stage of completion. This will be absolutely the finest wireless station in the world. Its cost is not comparable to that of other equipments, as the station comprises all sorts of experimenting apparatus. It is thought that \$300,000 would not cover the outlay if a structure as high as the Metropolitan tower had to be erected especially for this work. As long as the tower has already been constructed, the cost, outside of the apparatus, will be negligible.

The workings of the radio wireless phone are wonderfully simple when the complex problems involved and overcome in its creation are considered.

In telephoning, the operator talks into the mouthpiece exactly as with the wire telephone and listens for a reply through a head phone instead of a receiver. In order to get into communication with a wireless telephone station, it becomes necessary to get the instrument to the known tune of the other station and then press the buzzer key which calls the person to the phone at the other end. The conversation is then carried on as if the two operators were face to face.

The mechanical principles upon which the radio wireless telephone depend are simple enough, although there is a great difference of opinion upon the actual explanation of the phenomenon of wireless telephony. Speech is the forming of very rapid and every-varying series of vibrations in the air, and their measurement by the nerves of the ear. Owing to the resistance of the atmosphere, these vibrations grow weaker and at last disappear as we get farther from the source of disturbance. Telephony is the art of translating these vibrations into vibrations of other whose lesser resistance enables them to be carried to great distances for the translation into air vibrations again, as only the air vibrations can be measured by the ear. In the wireless tele-

CASTORIA

The Kind You Have Always Bought has borne the signature of Chas. H. Fletcher, and has been made under his personal supervision for over 30 years. Allow no one to deceive you in this. Counterfeits, Imitations and "Just-as-good" are but Experiments, and endanger the health of Children—Experience against Experiment.

What is CASTORIA?
Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

The Kind You Have Always Bought Bears the Signature of

Chas. H. Fletcher.
In Use For Over 30 Years.

THE CENTRAL LABORATORY, 27 MURRAY STREET, NEW YORK CITY.

phone the air waves are translated into the vibrations of an electrical discharge which oscillates the ether.

The ether waves, sent out by transmitting station, having been there modified by the human voice, are changed back at the receiving station into such form as to effect the receiver and cause the exact air vibrations which were made to modulate the transmitting current, and therefore, the words of the speaker are heard exactly as spoken.

Dr. DeForest bases his claims for success on his past experiments with the wireless telephone at the suggestion of Admiral Evans, who conducted the experiments on board his flagship, the Connecticut, and another vessel. Every battleship, cruiser or torpedo boat of the great Pacific fleet was equipped with radio wireless telephones before setting out on the memorable cruise. These instruments were given a thorough trial in inter-ship communication and in conversation with several wireless stations on the Pacific coast.

In the meantime, the young inventor has not been content to rest on the laurels obtained from his successful work in the navy and has carried on many experiments, both at home and abroad. In May, 1908, from the Eiffel tower, wireless messages were sent by the radio telephone to every wireless station in France. A warship off Marseilles, nearly 600 miles away, heard the transmitted messages just as distinctly as did the stations near Paris. While doing this, Dr. DeForest had equipped several of the vessels of the Italian navy and the instruments met with such decided success that an arrangement has been practically concluded for the equipment of the entire navy.

Mrs. DeForest is quite as interesting as her inventor husband. She graduated from Cornell university in the difficult science of civil engineering. She was the first and only woman to graduate from an Eastern college in this profession. After her graduation honors were heaped upon her until she stood before the world as its foremost woman hydraulic engineer, and a remarkable example of woman's intellectual equality with man.

She was the first woman ever elected to membership in the American Society of Civil Engineers. She helped to build the greatest water works system in the world's history, being on the engineering staff charged with the building of the \$161,000,000 Catskill system. In June, 1907, she was elected fellow of Cornell university, an honor rarely conferred upon women. While at Cornell she proved herself to be the peer of any of the male athletes. She is a leader in the equal rights movement and various movements designed to improve the social condition of all women. And now she further distinguishes herself by being the first woman to engage in wireless telephony.

A CURE FOR FITS
The Treatment Is to Accomplish What Science Has Been Struggling to Attain for Centuries

The intense interest that has been manifested throughout the country by the wonderful cures that are being accomplished daily by epileptics, still continues. It is really surprising the vast number of people who have already been cured of fits and nervousness. In order that everybody may have a chance to test the medicine, large trial bottles, valuable literature, History of Epilepsy and testimonials, will be sent by mail absolutely free to all who write to the Dr. May Laboratory, 548 Pearl Street, New York City.
