

TAFT TO TOUR WEST

Plans for Extensive Trip to Pacific Coast This Fall.

GOING DIRECT TO SEATTLE FAIR

Executive Will Visit Portland and Go on South to California and Gulf States.

Washington, July 10.—President Taft today gave an outline of the tentative plans for his trip through the West and South this fall.

The president has abandoned all idea of visiting Alaska this year, largely because Mrs. Taft will not be able to go with him. Upon his arrival here today the president received word from Beverly that Mrs. Taft was rapidly improving in health. He feels, however, that she is hardly strong enough to take the long Western trip this fall, which will occupy about two months.

As soon as the tariff bill is out of the way the president will leave Washington for Beverly, to remain until September 17, his 52d birthday—when he hopes to begin his Western trip. The president will go directly to Seattle, stopping for brief visits en route at Denver, Salt Lake and Spokane.

After visiting the Alaska-Yukon-Pacific exposition, the president will swing down to the Southwest, stopping for a time at Portland, Or., where he will be the guest of Senator Jonathan Bourne, and proceeding thence to San Francisco.

Leaving San Francisco, the president will go to Los Angeles, where he will stop for several days with his sister. From Los Angeles the president will go to San Diego and then into Arizona and New Mexico. If the weather is pleasant and his arrangements permit, Mr. Taft hopes to visit the Yosemite valley before going to Los Angeles.

Coming out of Mexico, the president will stop for a time at El Paso, where he expects to meet President Diaz, of Mexico.

After his stop at El Paso the president will visit San Antonio, where he will inspect Fort Sam Houston, which he was instrumental in building up.

After visiting Austin and Dallas, the president expects to spend several days on the ranch of his brother, C. P. Taft, at Corpus Christi, Tex.

Continuing East, the president will stop at Houston and go to New Orleans to attend the meeting of the Deep Waterways convention. After attending the convention, Mr. Taft wants to stop for a time in the Bayou Teche country of Louisiana, the land of Evangeline and Arcadia.

From there the president will proceed to Jackson, Miss., thence to Montgomery, Birmingham and Macon. From Macon the president will go to Augusta.

Leaving Augusta the president goes to Savannah and thence begins his northward trip to Washington, stopping at Wilmington, N. C., and Richmond, Va.

DAM THREATENS VALLEY.

Great Pathfinder Structure Said to Be in Perilous Shape.

Cheyenne, Wyo., July 10.—Reports received here tonight indicate that conditions at the Pathfinder dam at Alcova, said to be the largest in the world, are most serious. The dam is held only by a temporary dike built on gravel foundations. Seventy men are working day and night to strengthen the dike.

The government geological survey has a force of men scattered along the river for more than 100 miles above the dam, taking measurements of the river's flow to give indications of any sudden rise in the stream. Preparations have been made to dynamite the dam if the water carries away the temporary dike. Arrangements have also been made toward warning the people living in the valley below in case of danger.

Man Convicted by Proxy.

San Francisco, July 10.—An extradition case with unusual features came up for hearing this afternoon before United States Commissioner Hancock. Moyses don Amaral, arrested on a State department warrant, was accused of murder committed on one of the Azores islands, and though he had fled from the country, was tried and convicted, a man appointed by the Portuguese court representing him at the trial. Recently he was captured at San Luis Obispo in this state, and now is resisting the attempt of extradition.

Chinese Honor Traveler.

Pekin, July 10.—Prince Chun, the regent of China, today received Tang Shao Yi, who has just returned to the capital from a tour of the world, which included in extended visit to the United States. An imperial edict was issued today making Tang Shao Yi expectant vice president of one of the imperial boards, which is interpreted as meaning that his services are to be recognized by the Chinese government.

To Guard Mexican Border.

El Paso, Tex., July 10.—Daniel J. Keefe, commissioner general of immigration, accompanied by F. W. Berkshire, chief inspector for Texas, reached this city today on a tour of inspection of the entire Rio Grande border, preliminary to establishing stringent regulations to prevent smuggling of Chinese across from Mexico.

FARM AND GARDEN

Farm Telephones.

In some parts of the country telephones are becoming very common. It seems that once a telephone is established in the family it is there to stay. Other sections of the country are very much behind the times in this respect, probably because no one has gone ahead with the preliminary arrangements.

A farm telephone is not only a great luxury, but it is fast becoming an absolute necessity. With the addition of more business to the farm every year and the scarcity of labor anything that saves steps is worth money. When you get accustomed to doing business over the telephone you realize its great value.

A short time ago I heard a farmer order 100 bushels of seed oats by phone from another farmer about ten miles away. He had seen a sample at the fair last fall and made the negotiations accordingly. The business was transacted in about five minutes while the farmer was sitting at his desk after reading his morning mail left at the box by the rural delivery man. It would have taken him all day to get his mail and drive to the other farmer and buy his seed oats.

But there is a social side to farm life that is fostered by the telephone. It often happens that a woman is left alone for the day and she can easily make arrangements to have a neighbor call and spend the time pleasantly, instead of feeling lonely. Then it is so easy to make social arrangements for evenings or to meet friends as occasion requires.

There are always people in a neighborhood who are public-spirited enough to go ahead with the necessary arrangements to establish a telephone service. Others should encourage them promptly by subscribing to the fund required. Everybody is benefited, because the arrangement is mutual in the neighborhood. — Agricultural Epitomist.

A Trap Nest.

The accompanying plan of trap nest is quite simple and can be made from a box of suitable size. It should be 12 or 14 inches square by 20 or 24

inches long. The slats should be nailed to a crosspiece about one-quarter the distance from the top. A couple of nails are driven through the box and into the crosspiece to swing on. Half way back, on the inside, a narrow piece of board is nailed, back of which the nest is made.

To set the trap simply raise the slats inward from the bottom 8 or 9 inches high and place a small stick under, one of the slats. As the hen enters the door is raised off the stick, which falls to the floor. There should be about five slats for a box 12 or 14 inches in width, slats close against inch strip at bottom.

When Vegetables Mature.

The following list will show the gardener how long after planting the various common vegetables will mature their growth and be ready for use:

Bush beans	40 to 65 days
Pole beans	50 to 80 days
Peas	60 to 80 days
Early cabbage	10 to 130 days
Carrots	75 to 100 days
Squash	100 to 120 days
Celery	120 to 150 days
Sweet corn	60 to 100 days
Cucumbers	60 to 80 days
Eggplants	100 to 140 days
Onion sets	130 to 150 days
Onion sets	90 to 120 days
Parsley	30 to 120 days
Parsnips	125 to 150 days
Peas	40 to 80 days
Peppers	100 to 140 days
White potatoes	80 to 140 days
Pumpkins	100 to 140 days
Radishes	20 to 40 days
Spinach	30 to 60 days
Bush squashes	60 to 80 days
Late squashes	120 to 160 days
Tomatoes	100 to 140 days
Turnips	110 to 140 days

Study Fertilizer.

A few simple fertilizer maxims are so important that they should be fixed in the mind. Per cent is only another way for saying parts in 100. Fertilizers may be direct or indirect in action. The former contains needed plant food, the latter enables the plant to get food from soil or air. Lime is not plant food under common conditions; it corrects a bad condition of soil—sourness—and unlocks soil materials. Sulphate of iron (copperas), sulphate of copper (blue stone), sulphate of magnesia (Epsom salts) and sulphate of lime (gypsum) are among these indirect fertilizers.

To Sharpen a Lawn Mower.

First remove the handle, to get it out of the way. Take a flat file and file the edges of the revolving blades, being careful to file each blade alike, and evenly, so all parts will strike the horizontal or stationary blade evenly and alike at its entire length. File also the horizontal blade, then adjust the revolving blades so they will slightly rub on the horizontal blade.

Dog Cholera.

In the way of treatment the United States Bureau of Animal Industry has discovered a vaccine which saves about 80-odd per cent after cholera appears in a herd, and a larger per cent if vaccinated before the disease is introduced. Time will demonstrate the practicability of this method. The bacteriology department of the Kansas State Agricultural College is also working along these lines, but is not yet ready to announce anything but progress.

When symptoms of cholera appear in a herd, it is wise to dip the whole herd, disinfect their quarters thoroughly, give them a slight change in feed, and add to this about five drops of tincture of prickly ash for each hundred pounds of hog once or twice a day. The old remedy of wood ashes and salt is good in many instances. A little powdered sulphate of copper, dried sulphate of iron or charcoal given daily when the animals are not perfectly healthy frequently does much good. After all, the old adage, an ounce of prevention is worth a pound of cure, holds good here.

Saves the Fertilizer.

Fertilizer is expensive. By the old method of distributing it there was usually enough wasted to represent a pretty penny. Then came along a Virginia man and invented the hand fertilizer dropper. This device consists of an odd-shaped bucket, running to a point at the bottom and having a small opening there, through which the contents filters. A hinged valve, operated by a rod that leads to the handle of the bucket, controls the flow. The top of the rod is connected to a crossbar, which runs under the handle of the bucket. This bar is in close reach, and, when resting on the top of the bucket the valve is open. To close the valve the operator merely extends a finger and lifts the bar, thus shutting off the fertilizer. The valve fares at the bottom, spreading the fertilizer in a broad, fine stream. For small farms, gardens and lawns this device is of great convenience, and is a money-saver.

Water for the Chickens.

Take an ordinary baking pan and have the tinmith rivet on an "ear" on one side for nailing to a tree. Have him also make a hole in the bottom in one corner, that the water can be let out every day and the pan be kept clean. Nail the pan to a tree about twelve inches from the ground, so the chicks can drink without getting into it with their feet. The birds will soon discover that it is a fine place from which to get a drink on hot days. Sometimes they find, too, that it is a convenient place for a bath, and this of course makes the water dirty. But it is not much trouble to refill the pan with clean water, and this should be done two or three times a day. Chickens and birds require a great deal of water, and they often suffer for lack of it. Don't neglect them.—Boston Herald.

The King System of Ventilation.

Ventilation for stables and barns is now regarded as one of the essentials to be provided for in construction. The King system as illustrated in the dia-

SHOWING THE VENTILATING FLUES.

gram consists of two sets of flues, one set to admit the fresh air, the other to furnish an escape for the vitiated air. The inlet or fresh air flues should be placed not more than ten feet apart and located in the exterior walls of the barn. The outlet may include one or more flues.

As Usual.

He bought a hoe, a rake, a spade, Some little seeds to sow, At last he got the garden made And saw the green things grow.

He worked the rows and beds each day; Each little plant he knew, And as he smiled and sweat away "Oh, joy! how fast they grew."

No floods came down to wash things out, No frosts to kill or blight; No neighbor's chickens scratched about; No kite strayed in at night.

Each seed he planted did its best And not a one did rot—No other garden, East or West, Such vegetables begot.

But still this man did not enjoy These vegetables so new, For every night a neighbor's boy Stole what the garden grew.

Spraying to Kill Weeds.

Kill weeds by spraying. To make the spraying solution, empty a hundred pound sack of sulphate of iron into a fifty-gallon barrel; fill to the chime with water and stir with a hoe for a few minutes until dissolved. Strain through several thicknesses of cheesecloth tacked over the manhole of the spraying machine. Apply with a powerful spraying machine, producing a real mist, free from drops. Use about fifty gallons to the acre, and spray on a bright, warm day, or on a dark, damp day; it does not matter, so long as rain does not come within eighteen or twenty hours. This spray will not harm grain crops and will kill wild mustard and various other weeds.

What is Castoria.

CASTORIA is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The children's Panacea—The Mother's Friend.

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher, and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr. F. Gerald Blattner, of Buffalo, N. Y., says: "Your Castoria is good for children and I frequently prescribe it, always obtaining the desired results."

Dr. Gustave A. Elsengraeber, of St. Paul, Minn., says: "I have used your Castoria repeatedly in my practice with good results, and can recommend it as an excellent, mild and harmless remedy for children."

Dr. E. J. Dennis, of St. Louis, Mo., says: "I have used and prescribed your Castoria in my sanitarium and outside practice for a number of years and find it to be an excellent remedy for children."

Dr. S. A. Buchanan, of Philadelphia, Pa., says: "I have used your Castoria in the case of my own baby and find it pleasant to take, and have obtained excellent results from its use."

Dr. J. E. Simpson, of Chicago, Ill., says: "I have used your Castoria in cases of colic in children and have found it the best medicine of its kind on the market."

Dr. R. E. Eskildson, of Omaha, Neb., says: "I find your Castoria to be a standard family remedy. It is the best thing for infants and children I have ever known and I recommend it."

Dr. L. R. Robinson, of Kansas City, Mo., says: "Your Castoria certainly has merit. Is not its age, its continued use by mothers through all these years, and the many attempts to imitate it, sufficient recommendation? What can a physician add? Leave it to the mothers."

Dr. Edwin F. Pardee, of New York City, says: "For several years I have recommended your Castoria and shall always continue to do so, as it has invariably produced beneficial results."

Dr. N. B. Sizer, of Brooklyn, N. Y., says: "I object to what are called patent medicines, where maker alone knows what ingredients are put in them, but I know the formula of your Castoria and advise its use."

GENUINE CASTORIA ALWAYS Bears the Signature of

Diplomacy.

"Isn't there some talk that Gringo is going to enter the ministry?"
"The ministry? Why—O, I see. That's what he really wants, but he intends to try for a consulship first."—Chicago Tribune.

His Speedometer.

Inquisitive Person—How do you tell how fast you are going?
Chauffeur—I watch the expression of the faces of the policemen as I whip past them.

Averages All Right.

Tenant (of flat)—One of the radiators in that large room of mine is always cold, winter and summer.
Janitor (with a scowl)—Well, I've heard you say that the other one is always hot, winter and summer. Ain't it a standard?

His Usual Way.

The new waitress sidled up to a dapper young man at the breakfast table, who, after glancing at the bill, opened his mouth, and a noise issued forth that sounded like the ripping off of all the coops on one of the wheels in the power house. The new waitress made her escape to the kitchen. "Follow out there insulted me," she said. The head waiter looked at him. "I'll get it," he said. "That's just the train caller ordering his breakfast."—Argonaut.

A Late Train.

"Jones says that he always gets to the bottom of anything he undertakes."
"Don't doubt it. At school he was always at the foot of the class."—Baltimore American.

A Point at Large.

"Let me see—the census gives your town about 6,000 doesn't it?"
"No, sir; our town gives the census 5,000."

Innocent.

"Clifford" asked the teacher, "who wrote the Junius letters?"
"I—I don't know, ma'am," answered the terrified little boy. "I didn't!"

Where They Don't Muzzle 'Em.

Suburbanite—You are half an hour late this morning.
Letter Carrier—Yes, ma'am; the sections of stoppage I have to wear inside my trousers legs on account of the dogs you keep along this street hamper my movements, ma'am.—Chicago Tribune.

Escaping by a Technicality.

Teacher—Tommy, what is an improper fraction?
Tommy—You don't expect me to mention it 'fore all these people, do you?

There Are Others.

"Blings is afraid that he may be prosecuted for polygamy."
"Why, he is married to only one person, ain't he?"
"That is what he thought for a while, but now it appears that he married her whole family, and there are seven of them."—California Weekly.

Merely Friendly.

Elderly Relative—Mortimer, what are your intentions in regard to Miss Julia?
Mortimer—I am glad to hear that you are going to try to persuade her to marry you.—Chicago Tribune.

Merely Friendly.

Elderly Relative—Mortimer, what are your intentions in regard to Miss Julia?
Mortimer—I am glad to hear that you are going to try to persuade her to marry you.—Chicago Tribune.

Bad BLOOD

"Before I began using Cascarets I had a bad complexion, pimples on my face, and my food was not digested at all should have been. Now I am entirely well, and the pimples have all disappeared from my face. I can truthfully say that Cascarets are just as advertised; I have taken only two boxes of them."
Clarence R. Griffin, Sheridan, Ind.

Pleasant, Palatable, Potent, Taste Good. Do Good. Never Sicken, Weakens or Gripes. 10c, 25c, 50c. Never sold in bulk. The genuine tablet stamped C. C. C. Guaranteed in cure or your money back.

DAISY FLY KILLER

Analysis, or send prepaid for 30 cents. HAROLD SOMERS, 150 DeKalb Ave., E'klyn., N. Y.

CRESCENT BAKING POWDER

A pure phosphate baking powder that does all that the high priced baking powders will do and does it better. It raises the dough and makes light, sweet and better risen foods. Sold by grocery 25c per pound. You will send us your name and address, we will send you a book on health and baking powder.
