George Compton thinks the hot dry weather is injuring the late grain up in the Crabtree country, where he lives. The early spring grain and winter crops are extra good. W. G. McDonald, also, thinks the late oats will hardly be worth harvesting. He says they are just drying up, but that the earlier crops will be first-class.

Oh no! The people did not use any water when it was turned on Wednesday morning. After going dry for ten days, with lawns, gardens, etc. drying up, our citizens were worse than an average dry county in Kansas. They kept Electrician West busy at the pump all morning.

The change of time and the running of an exclusive passenger train on the Woodburn-Springfield road, is most satisfactory to the people of Scio and vicinity. The train now reaches West Scio at a few minutes before 7 in the morning and at about 8 o'clock in the evening. A freight train runs every other day.

W. M. Phillips exhibited a bunch of wheat in our office, Wednesday, which was good to look at. The heads were long and splendidly filled from top to bottom and with four grains in the mesh, almost uniformly. A field of such wheat, providing the stand is good, will yield easily forty bushels to the acre.

It is reported from reliable sources that as soon as the Klamath cut-off is completed, the main line to California will go through Coburg. The same report states that a connection will be made from the present Woodburn-Springfield from or near Coburg to the present Main line at Muddy station some four miles south of Halsey.

## Neighborhood News

### Crabtree Collections

The farmers in this vicinity are still busy with their hay crops. Most everyone reports large yields and why not, in these rich river bottom lands of ours. The hum of the binders, reaping the large areas of golden grain, can be heard everywhere and prospects were never better for a bountiful crop than at the present time.

The voters of the several districts interested in the new proposed high school, met in the new church building to formulate plans and discuss the ways and means of building and maintaining a Union High school at this place, was a decided success, everyone taking part and were interested in giving our boys and girls better equipment to compete, in the future, with the problems of how to be successful in life.

The writer has noticed, with considerable interest, the progressiveness of our Bohemian farmers. They all practice rotation of crops and use fertilizers extensively; also, the year book of the Department of Agriculture can be found in nearly all of their homes, besides bulletins from our experiment stations. These people believe in tilling the soil and getting it in the best possible condition and then planting the seed in the ground and not in the moon as some of our old foggy mossbacks do. One of the farmers the writer is acquainted with, is C. A. Posvar. Mr. Posvar is one of those big-hearted men any community may justly be proud of. He has just finished building a large granery and milk house, giving them both an attractive coating of paint, and now Charles is giving his large fine barn another coating of paint. Why? Because he finds it pays.

W. R. ALVIN, R. F. D. Carrier No. 1.

### Thomas Topics

(Too late for last week)

S. Hart and family came up from Lebanon to Crabtree, on the first train over the new road, and walked out to their father's ranch Sunday morning, returning on the evening train.

A stranger looking for a home offered S. Gaines \$200 per acre for 40 acres, but the offer was refused. Sam says he'll not go off till carried away. From the fruit he has planted he wishes to reap as long as possible.

Mr. Gillard bought 80 acres of land last summer of C. B. Serling for \$2800. A short time ago he was offered \$6000 for same but refused the offer, saying: "I have to live some where until I die and I am satisfied here; I have good water, soil, climate and health, what more do I want? If it is worth \$6000 to you it certainly is to me."

Wm. Schram, a relative of Mrs. Green came from Manitoba a year ago. After looking all around for land, declared land was entirely too high here and left early in the spring for better findings. Not having found what he wanted, returned Sunday saying "this is certainly the garden spot of the world and there is no mistake about it. Disbelievers follow my tracks."

G. Bilyeu & Co. have bought a new Altman & Taylor threshing machine and will soon be ready to do justice to the bountiful harvest.
