The "Toothbrush Plant."

One of the most curious plants in the world is what is called the toothbrush plant of Jamaica. It is a species of creeper, and has nothing striking about its appearance. By cutting pieces of it to a suitable length and fraying the ends, the natives convert it into a toothbrush; and a tooth powder to accompany the use of the brush is also prepared by pulverizing the dried stems.

WISE USE OF BY-PRODUCTS.

Has Brought Wealth to Thousands Engaged in Different Industries.

Not so long ago many things which are now bringing wealth to those who handle them went to waste. One-half of the beet sugar industry went to waste. Now, through the latest scientific processes, fully 90 per cent of the sugar can be obtained, writes Madison C. Peters. A few years ago fully one-half of the slaughter house trade represented waste, only the principal parts of the carcass being sent to market. Now all of the by-products are put to some use. The blood is used for dyeing industries, while from the muscular tissue we get beef extract, from the hide shoes, from the hair and bristles brushes, from hoofs and horns gelatine and horn utensils, from entrails and refuse fats for soaps, from the bones phosphorus for fertilizer.

Skim milk used to be almost valueless until chemistry found a way of extracting the casein from it, and of this good buttons are now made, and it is used also medicinally for numerous remedies. Whey, or what is left when the curd is taken off, was once worthless waste. Now they are making lactose, or sugar of milk, from it. Recent industries have turned this rubbish into coatings and sizings for paper, waterproof glues for wood veneers, substitutes for hens' eggs, hard rubber lacte acid and other useful commodities.

The world of mining has been revolutionized in the past few years. The culm that used to be piled up at the mouth of the coal mines, and which nobody would carry away, is now almost as valuable as the unbroken coal. Artificial diamonds, rubies and sapphires are produced from it. The tailings of coal mines had the mineral in such minute particles that it could not be extracted. Some one discovered that gold was soluble in a weak solution of potassium cyanide; the discovery was applied in practice, every particle was recovered and seemingly worthless ores produced millions of dollars. The loss also in silver mines was enormous until a method was found of freeing the mineral from the lead.

Much of the enormous wealth amassed by the Standard Oil Company has come from wise use of the by-products. Paraffin, to cite just one instance, which has proved so immensely profitable to the concern, is made from a disagreeable substance once thrown into the river, until the authorities got after the company because of the pollution it produced. To burn it made an unbearable stench, and in despair the company appealed to the chemists how to get rid of the nuisance, when a process was discovered to convert it into paraffin.

Preparing to Look His Best Success Magazine.

A certain journalist was an enthusiastic golfer. Once he had occasion to interrogate, in a criminal suit, a boy witness from Bala.

"Now, my lad," he said, "are you acquainted with the nature and significance of an oath?"

The boy, raising his brows in surprise, answered:

"Of course I am, sir. Don't I caddy for you at the Country club?"

PHYSICAL WRECK RESTORED TO HEALTH BY GREAT KIDNEY REMEDY.

I feel it my duty to furnish you with my testimonial as to what your remedy Swamp-Root did for me when I was a physical wreck from kidney and bladder trouble. Some years ago I was not able to do any work and could only just creep around, and am satisfied that had it not been for Dr. Kilmer's Swamp-Root I would not have lived. After using the preparation for one month I was able to work some and when I had used \$8.00 worth of Swamp-Root I could do a good day's work. I used about \$10.00 worth altogether and would not take \$10,000 for the good that it did me. I consider it a God-send to suffering humanity for the diseases for which you recommend it and have recommended it to many sufferers.

Highest Good in Life.

The highest good is found in the way of doing good, giving what we have, our best selves, to others. Let a man seek efficiency in his business, let him seek leadership in his profession, let him seek enriching some other lives. This is the myrrh that preserves to us all that we gain and perfumes all, while selfishness is the moth that breeds decay and death.

Mother's find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Olive Oil to Remove Cinders.

The man with the cinder in his eye was suffering great pain. Every one had a different method of relief to suggest, but nothing had the desired effect. At length one of the bystanders procured a little olive oil from the lunch room. This was poured into the eye and relief was instant. "I learned that method of dealing with cinders while abroad," said the bystander, "and I guess it is about as effective as anything after all."

Priceless Relic Found.

The first original description of America ever written has just been discovered. It was penned by Dr. Diego Alvarez Chanca, physician to the second fleet of Columbus, and was dated at the Port of Isabella, Santo Domingo, in January, 1494. Dr. Fernandez de Ybarra, of the New York Academy of Sciences, with the Smithsonian Institution of Washington, aided and abetting, uncovered the document.

Worms

"Coccarcs are certainly fine. I gave a friend one when the doctor was treating him for cancer of the stomach. The next morning he passed four pieces of a tape worm. He then got a box and in three days he passed a tape-worm 45 feet long. It was Mr. Matt Freck, of Millersburg, Deep River, Pa. I am quite a worker for Coccarcs. I use them myself and find them beneficial for most any disease caused by impure blood."
