**REMINGTON UMC**

**METALLIC CARTRIDGES and Steel Lined SHOT SHELLS**

The amount of powder in Remington-UMC cartridges is so uniform, the combustion so perfect, the bullet of such a model and so accurately gauged, that at long or short range your shots are always "kills" if the aim be true.

The steel lining around the powder in Nitro Club and Arrow Shot Shells insures better pattern, better penetration and greater velocity for the same load. It makes the shell stronger, surer and safer.
