

LETTERS FROM OUR COUNTRY CORRESPONDENTS

MILL CITY.

Miss Dayse Geddes spent a two weeks' vacation at the home ranch where she chased chipmunks when a little girl. She spent most of the time taking pictures of mountain scenery from Mill City to Detroit, along the logging railroad to the front and in the woods. She set the instrument on the highest mountain peak at the head of Rock Creek and took several views. The view from there is inexpressibly grand. In sight are Mt Hood, Jefferson, Three Sisters, Mt Pitt and Table Mountain. Then the awful canyons, "hog-backs," cliffs and valleys. The eastern part of Linn county is a wonder.

Hunters and campers will find a wide open trail from Gates to the head of Thomas and Rock Creeks.

Mr and Mrs Frank Grant of Eugene returned home after a visit with J R Geddes, a brother-in-law. Mr Grant is lately from Minnesota.

A curious accident happened on the logging railroad. A car left the track, tipped the logs off, skidded along on the ties, cutting seventy of them each in two pieces and jumped back on the track. It was after dark and the crew knew nothing of it until next morning.

Miss Jessie Barnes came up from Salem recently and made her folks a visit.

The section boss on the logging road has one man left. The rest went to the hop fields.

The Potter mill has shut down indefinitely as there is no demand for ties which they cut.

John Marra, fire supt, drove over from Lacombe one day last week.

Ben Thacker and Miss McClary were crossing the Gates bridge in an automobile. Miss McClary was driving and the thing became scared, turned toward the side of the bridge, knocked off the two inch guard plank, smashed one or two side boards and came within a fraction of a second of going into the river 50 feet below.

The Schroeder mill is being built near Gates. They have 20,000,000 feet to cut.

If your correspondent had a good gun he could take the whole country. Gone to the hop fields.

A Miss Scott from Indiana is here visiting her uncle and aunt, Commissioner and Mrs Ben Butler.

It is interesting to sit on the bank evenings and watch the big salmon jump out of the water and form rainbows in the air. A little girl said she counted "500 jumps" one evening. The wardens draw in the net after dark, pick out the fish they want, put them in a tank until morning and then extract the eggs. They got as high as 13,000 eggs one night.

Mr Walsworth the Dreamland man of Albany is living at Mill City now.

Suppose A T P does look at the "widders" in the Pie Eater country. What has that to do with the trend of civilization,

the tariff, the huckleberry crop, or any of the great questions of the day that we ought to study. Suppose a widow does peek around the corner. He is a good and wholesome gentleman to look upon. Let them meander. Publicity may spoil a romance.

NICK.

Strength of the Oyster.

If the average person were asked what was the strongest living thing it is probable that he would name the lion or some such huge denizen of the forest and would not even think of the unassertive bivalve. But so great is the power possessed by the oyster that to open it a force equal to 1,319.5 times the weight of its shell-less body is required.

The Highest Light on Our Coast.

The tallest light tower in the United States is at Cape Hatteras, on the low lying coast of North Carolina, which is 200 feet from base to top of lantern. The highest light, however, is that at Cape Mendocino, on the coast of California, which is 422 feet above high water. It is on a cliff, the lighthouse itself being only twenty feet in height. —National Geographic Magazine.

Hardly Ever.

"Other things being equal," she asked, "don't you think a girl has a better chance than a widow has to get married?" "Perhaps," he replied, "but a widow hardly ever gives a man a chance to consider other things equal." —Chicago Record-Herald.

Reason Why.

"You haven't many relatives, have you?" "Worlds of them." "I never meet any of them at your house." "No; they've all got more money than I have." —Judge.
