Scio correspondence in the Oregonian last week stated that the hack service between here and Munkers and the motor service from Mill City to Albany came in for a grilling at a meeting of the Commercial Club. The correspondent was evidently misinformed, as the motor service is meeting with the approval of all and was heartily commended by the club. Some discussion was indulged in at the club relative to a 50c fare by the hacks meeting the motor at Munkers, the consensus of opinion being that 35c would be about right, and that the hacks should meet the motor both morning and evening each day of the week.

There is a rapidly growing demand in all parts of the country that books be included in the list of articles sent by parcel post. Why should books be excluded and bricks be carried at the low rate? The present arrangement is inconsistent and absurd. A cheap rate on books would be a decided benefit to a very large percentage of the people of the United States. It is likely that more people live in communities and on farms to which books must be shipped than reside in cities or in towns where books may be purchased from dealers. All those residing on rural routes and in villages are interested in securing a lower rate on literature and are entitled to consideration.
