Ask for Bell Service

A number of residents of the Scio section are asking the railroad commission to request the Scio Independent Telephone Co. to connect with the Bell company's toll line switch board, according to the statement this morning of George Sanders, manager of the Pacific Telephone & Telegraph company at this city.

Since similar connections have been made at other places, it is regarded as more than probable that there will be no objection on the part of the Bell company. If the Scio connection is made as per the request of the people, it will give them an extensive service throughout that section, according to Mr Sanders. Tuesday's Democrat.
