95 Per Cent Fail in Business

Of the hundreds of thousands of merchants engaged in business 95 per cent of them fail. Why should they fail? Suppose 95 per cent of the people died of diphtheria, what would we say? There is no more reason in 95 per cent of merchants failing in business than there would be reason in 95 per cent of the people dying of diphtheria. It is pure waste. Statistics prove that 85 per cent of the merchants who fail in business are non advertising merchants. Advertising is the only anti-toxin. Results of good advertising are certain. The inexperienced generally meets with disappointments in his advertising. Advertising is a special business just as medicine, law, dentistry, etc. The watchmaker takes \$5 worth of pig-iron and converts it into hair springs worth \$2,000,000. That is what efficiency does with pig iron. What would efficiency do with your business? What every merchant needs is the assistance of an advertising specialist, who has studied carefully the problem of advertising efficiency. My years of experience in the field of newspaper advertising is at your service at the small sum of one-third of a cent an hour. I have the only reasonable plan for newspaper publicity on the market. Results guaranteed. Write me for my plan of assisting the local merchant with his newspaper advertising. Let me send you free my 52 copyrighted articles on newspaper advertising. Acute Indigestion

"I was annoyed for over a year by attacks of acute indigestion, followed by constipation," writes Mrs M J Gallagher, Geneva, N Y. "I tried everything that was recommended to me for this complaint but nothing did me much good until about four months ago I saw Chamberlain's Tablets advertised and procured a bottle of them from our druggist. I soon realized that I had gotten the right thing for they helped me at once. Since taking two bottles of them I can eat heartily without any bad effects. Sold by all dealers.
