Scio, Oregon, Jan. 21, 1915—To anyone who is interested in buying telephone or other batteries, insist on testing them as there is a cheap battery being placed on the market that will only test from 10 to 18 amperes. The Dry Cells I handle will test 28 to 30 amperes. All dry cells I put out that tests less than 25 amperes I will sell at 22 cents; above that the price will be 30 cents each. I test every battery before the purchaser so he knows what he is getting. I am basing my business on quality and I believe that the public does and will bear me out as past experience shows that my business has gradually increased from \$3,000.00 the first year started in the hardware and implement business to \$31,000. in 1914. I did \$3,000 more than in 1913, regardless of the close times the past fall. I ask your assistance to make 1915 the banner year, both for you and myself. If you have any money don't be afraid to spend it, keep it moving, don't let it rust but keep it bright with use. I can use it and you will smile next fall to see what you have accomplished. Yours for more business. N I Morrison.
