Best Cough Medicine for Children.

"Three years ago when I was living
in Pittsburgh one of my children had a
hard cough and coughed dreadfully.
Upon the advice of a druggist I pur-
chased a bottle of Chamberlain's Cough
Remedy and it benefited him at once.
I find it the best cough medicine for
children because it is pleasant to take.
They do not object to taking it,"
writes Mrs Lafayette Tuck, Homer
City, Pa. This remedy contains no
opium or other narcotic, and may be
given to a child as confidently as to an
adult. Sold by all dealers.

MARKETING WORLD'S GREATEST PROBLEM

WE ARE LONG ON PRODUCTION
SHORT ON DISTRIBUTION.

By Peter Radford
Lecturer National Farmers' Union

The economic distribution of farm
products is today the world's greatest
problem and the war, while it has
brought its hardships, has clearly em-
phasized the importance of distribu-
tion as a factor in American agricul-
ture and promises to give the farm-
ers the co-operation of the govern-
ment and the business men the
solution of their marketing problem.
This result will, in a measure, com-
pensate us for our war losses, for the
business interests and government
have been in the main assisting al-
most exclusively on the production
side of agriculture. While the depart-
ment of agriculture has been dumping
tons of literature on the farmer telling
him how to produce, the farmer has
been dumping tons of products in the
nation's garbage can for want of a
market.

The World Will Never Starve.

At no time since Adam and Eve
were driven from the Garden of Eden
have the inhabitants of this world
suffered from lack of production, but
some people have gone hungry from
the day of creation to this good hour
for the lack of proper distribution.
Slight variations in production have
forced a change in diet and one local-
ity has felt the pinch of want, while
another surfeited, but the world as a
whole has never been a land of plenty.
We now have less than one-tenth of
the tillable land of the earth's surface
under cultivation, and we not only
have this surplus area to draw on but
it is safe to estimate that in case of
dire necessity one-half the earth's
population could at the present time
knock their living out of the trees
of the forest, gather it from wild
vines and draw it from streams. No
one should become alarmed; the
world will never starve.

The consumer has always feared
that the producer would not supply
him and his fright has found expres-
sion on the statute books of our state,
and nations and the farmer has been
urged to produce recklessly and with-
out reference to a market, and regard-
less of the demands of the consumer.

Back to the Soil.

The city people have been urging
each other to move back to the farm,
but very few of them have moved.
We welcome our city cousins back to
the soil and this earth's surface con-
tains 15,092,160,000 idle acres of till-
able land where they can make a
living by tilling the earth with a
forked stick, but we do not need them
so far as increasing production is con-
cerned; we now have all the producers
we can use. The city man has very
erroneous ideas of agricultural condi-
tions. The commonly accepted theory
that we are short on production is all
wrong. Our annual increase in pro-
duction far exceeds that of our in-
crease in population.

The World as a Farm.

Taking the world as one big farm,
we find two billion acres of land in
cultivation. Of this amount there is
approximately 750,000,000 acres on the
western and 1,250,000,000 acres on the
eastern hemisphere, in cultivation.
This estimate, of course, does not in-
clude grazing lands, forests, etc.,
where large quantities of meat are
produced.

The world's annual crop approxi-
mates fifteen billion bushels of ce-
reals, thirteen billion pounds of fibre
and sixty-five million tons of meat.

The average annual world crop for
the past five years, compared with the
previous five years, is as follows:

| | Past Half Decade. | Previous Half Decade. |
|----------------|----------------------|--------------------------|
| Corn (Bu.) | 3,934,174,000 | 3,402,635,000 |
| Wheat (Bu.) | 3,522,769,000 | 3,257,526,000 |
| Oats (Bu.) | 4,120,017,000 | 3,508,315,000 |
| Cotton (Bales) | 19,863,500 | 17,541,200 |

The world shows an average in-
crease in cereal production of 13 per
cent during the past decade, compared
with the previous five years, while the
world's population shows an increase
of only three per cent.

The gain in production far exceeds
that of our increase in population, and
it is safe to estimate that the farmer
can easily increase production 25 per
cent if a remunerative market can be
found for the products. In textile
fibres the world shows an increase
during the past half decade in produc-
tion of 15 per cent against a popula-
tion increase of three per cent.

The people of this nation should
address themselves to the subject of
improved facilities for distribution.

Over-production and crop mortgage
force the farmers into ruinous com-
petition with each other. The remedy
lies in organization and in co-opera-
tion in marketing.

Cough Medicine For Children.

Never give a child a cough medicine
that contains opium in any form.
When opium is given other and more
serious diseases may follow. Long ex-
perience has demonstrated that there is
no better or safer medicine for coughs,
colds and croup in children than Cham-
berlain's Cough Remedy. It is equally
valuable for adults. Try it. It con-
tains no opium or other harmful drug.
For sale by all dealers.

Surprises Many in Scio

The QUICK action of simple buck-
thorn bark, glycerine, etc., as mixed in
Adler-ka, the remedy which became
famous by curing appendicitis, is sur-
prising Scio people. Many have found
that this simple remedy drains so
much foul matter from the system that
A SINGLE DOSE relieves constipa-
tion, sour stomach and gas on the
stomach almost IMMEDIATELY. Adler-
ka is the most thorough bowel
cleanser ever sold. E. C. Peery, drug-
gist.
