DEATH IN THEIR WORK.

Dangers That Beset Those Who Toil in Alkali Factories.

Do you like your work? When you are inclined to be discontented with it think of the alkali workers. They die by inches from the moment they enter the factories. Things are not so bad now as they once were, but they are bad enough still.

In what is known as the "black ash" department in chemical works big open vats of caustic are used. The splashing of this caustic sends drops of the burning fluid flying through the air. A drop falling upon naked flesh causes a bad burn. A drop in the eye will blind it forever if the stuff is not removed within a few seconds.

A black ash worker in a Welsh alkali factory, toiling at the caustic pots, received an invisible globule of this deadly spray in his eye. There was no water at hand with which to wash out the caustic. It seemed that he must surely go blind. But one of his mates seized on the injured man, who was quite frantic with pain, lifted his eyelid with forefinger and thumb and with his tongue licked out the caustic. He burned his tongue badly, but he saved the other poor fellow's sight.

Another of the dangers that beset the alkali worker—and the worst of them all—is poisoning by chlorine acid gas. This gas, which comes off the lime in thin green fumes, is known to the men and joked about as "Roger." A full in-draft of the gas kills a man in an hour.—Pearson's Weekly.

Strange Chinese Beliefs.

Among the many extraordinary customs of the Chinese is that of banding years together in groups of twelve, called "cycles," and naming each year of the series after some animal. Thus, the first year of a new cycle is the year of the rat, the second the year of the ox, the third the year of the tiger. Every Chinese born in the year of the rat belongs to the order of the Rat,

and so on. The animal class of every Chinese man and woman is thus recorded and is held to be of great importance in foretelling the future. Another curious fact about the Chinese reckoning of time is that in the celestial empire a child is held to be one year old as soon as it is born. With the absurd superstition so dear to the oriental mind, a baby boy is frequently given a girl's name in order to deceive the evil spirits, who apparently have an objectionable habit of making it as hard as possible to rear a male child successfully.

A Napoleon Story.

One day at breakfast when, as was often the case, Talma had been admitted to see Emperor Napoleon, the young Napoleon was brought to his father. The emperor took the child on his knee, and, far from carressing, amused himself by slapping him, though not so as to hurt him; then, turning to Talma, he said:

"Talma, tell me what I am doing."

Talma, as may be supposed, did not know what to say.

"You do not see it," continued the emperor. "I am slapping a king."—Memoirs of Mme. de Remusat.

A E Brown of Lebanon was a business visitor in Scio Wednesday.

Nothing So Good for a Cough or Cold

When you have a cold you want the best medicine obtainable so as to get rid of it with the least possible delay. There are many who consider Chamberlain's Cough Remedy unsurpassed. Mrs J Boroff, Elida, Ohio, says, "Ever since my daughter Ruth was cured of a severe cold and cough by Chamberlain's Cough Remedy two years ago, I have felt kindly disposed toward the manufacturers of that preparation. I know of nothing so quick to relieve a cough or cure a cold." For sale by all dealers.

A RECENT

U. S. Government Report

Makes Plain Your Need of a

UNITED STATES CREAM SEPARATOR

With

Guaranteed Non-Rusting Skimming Device

The scientific staff of the dairy division in the United States department of Agriculture recently conducted a series of experiments to learn what effect, if any, (rust) has on cream and butter.

The tests definitely established the fact that even minute particles of iron (rust) caused certain undesirable flavors and that in every instance when butter was scored a few days after the making, the samples in which iron (rust) was present scored lower than the butter made from cream which contained no iron rust.

In using the United States Cream Separator with non-rusting skimming sections of solid nickel silver you avoid all risk of cream and butter with an "off" flavor.

The U S Skimming sections are positively guaranteed never to rust. No other separator manufacturer gives you a printed non-rusting guarantee.

Yet, United States Cream Separators, with this big exclusive improvement, are sold at no higher prices than other separators without it

A demonstration gladly given at your home, with obligation.
