The readers of this paper will be
pleased to learn that there is at least one
drugged disease that science has been
able to cure in all its stages, and that is
Cataract. Hall's Cataract Cure is the only
positive cure now known to the medical
fraternity, Cataract being a constitutional
disease, requires a constitutional treat-
ment. Hall's Cataract Cure is taken in-
ternally, acting directly upon the blood
and mucous surfaces of the system, there-
by destroying the foundation of the dis-
ease, and giving the patient strength by
building up the constitution and assisting
nature in doing its work. The proprietors
have so much faith in its curative pow-
ers that they offer One Hundred Dollars
for any case that it fails to cure. Send
for list of testimonials.

**Local Druggist Makes Many
Friends**

E C Feery, druggist, reports they are
making many friends through the
QUICK benefit which Scio people re-
ceive from the simple mixture of buck-
thorn bark, glycerine, etc., known as
Adler-ka. This remedy became fam-
ous by curing appendicitis and it is the
most thorough bowel cleanser known,
acting on BOTH the lower and upper
bowel. JUST ONE DOSE of Adler-ka
relieves constipation and gas on the
stomach almost IMMEDIATELY.

What Becomes of the Smoke.
Smoke is composed of gases and
of little particles of fuel which are
carried up the chimney by suction.
Knowing this, the ultimate end of
smoke may be readily explained.
The fuel particles fall to the ground
of their own weight when they get
beyond the drawing power of the
chimney and out of the current of
the heated air formed in the chim-
ney flue.

There is a lot of carbonic acid
gas in smoke which mixes with the
air and eventually becomes food for
plants. Some other gases which
are not entirely consumed when
they come from the chimney are
burned by the air still more until
they, too, become carbonic acid gas.
—Chicago Blade.

The Watch on the Rhine.

In 1849, when Max Schnecken-
burger, then, it is said, a druggist's
assistant in Berne, wrote "Die Wacht
am Rhein," Germany was expecting
an attack by France. The verses,
which appeared in a small volume
with others of a similar nature, at-
tracted little notice. The author
died in 1849, unknown, and little
dreaming that twenty years later,
when the war with France did come,
his song, set to stirring music by
Karl Wilhelm, would become the
national anthem.—Youth's Com-
panion.

Broad Brimmed Hats.

Toward the end of the thirteenth
century big broad brimmed hats
were fashionable in Austria. They
were of such huge dimensions that
a face under one of them could not
be recognized. A poem written by
Johannes Hadlaub expresses disgust
with the style and the hope that the
hats might be consigned to the
Danube "so that the pretty faces of
our women might once more be-
come visible."—Exchange.

He Thought Them High.

"Where is your high school?"
asked the stranger in town.
"Which one?" asked the pompous
looking citizen addressed.
"Why, have you more than one
high school?"
"Oh, yes; we have two schools,
each three stories high."—Youkers
Statesman.

Armless, but Useful.

Professor Karl Lohmeyer of Koenigsberg, who died at Danzig at the
age of seventy-seven, was born
without arms. A special permit was
granted to allow his entry into the
university service. His students
opened and shut doors for him, but
he turned the pages of books with
his mouth and could sign his name
firmly with a pen held between his
teeth.

A Great Advantage.

A school principal was lecturing
his teachers upon efficiency. "What
would be thought," he demanded,
"of a glovemaking who, at the close
of the season, found 10 per cent of
his stock returned because it fell
below standard requirements? Why
should we require 100 per cent ef-
ficiency of the glovemaking and only
90 per cent of a teacher?" "Be-
cause," responded a teacher, "he
can select his kids!"
