When Baby Has the Croup

When a mother is awakened from sound sleep to find her child who has gone to bed apparently in the best of health struggling for breath she is naturally alarmed. Yet if she can keep her presence of mind and give Chamberlain's cough remedy every ten minutes until vomiting is produced, quick relief will follow and the child will fall asleep to awaken in the morning as well as ever. This remedy has been in use for many years with uniform success. Obtainable everywhere.
