

Winter or Summer

UNITED STATES
CREAM SEPARATOR

"Is Always on the Job"

It's at the two extremes in weather when a cheap or old style separator will get on a fellow's "nerves", if anything will. Below zero or above ninety will "spoil the health" of any Cream Separator that I know anything about—except the United States Cream Separator!

FORTIFIED AGAINST EXTREMES OF TEMPERATURE

<p style="text-align: center;"><i>When it is Winter</i></p> <p>When you are using a U. S. Cream Separator you don't have to heat a kettle of water to start the skimming. It works cold.</p> <p>When the oil in other separators has clogged or frozen up, the U. S. Separator, with no kinks, bends, or goose necks, in its oil tube,—is running smoothly and silently, perfectly lubricated.</p> <p>When every liquid is freezing solid, you don't have to worry about the bowl of the U. S. Separator being damaged by neglect. It empties itself automatically—always!</p> <p>When the gas engine "dies" if you are using power, the U. S. has a hand crank on the other side, and you can "go to it!"</p>	<p style="text-align: center;"><i>When it is Summer</i></p> <p>When the cream is skimmed by a U. S. Separator, it keeps longer, for its the first and only separator remarkably fortified in sanitary ways from top to bottom. Bacteria are "up against it" like flies in January.</p> <p>When other separators get "vile" the U. S. is sweet and clean, with no milk drip on the frame, or in the gear case, or in the iron bowl chamber. The removable sanitary liner prevents.</p> <p>When ordinary separators are turning the new batch sour, with bowl left full from the previous run, the U. S. is starting fresh and dry, the bowl having drained itself without attention.</p> <p>When washing-up time comes, there are fewer parts to clean. With the mechanical washer U. S. users are through in one-third the time. Time in summer is especially valuable.</p>
--	---

Every Season is "Open Season" for the U. S.

Do you wonder now that I will never rest easy until all my dairy friends have the U. S.? I am selling satisfaction and will not try to build up business on any other basis.

N. I. MORRISON, Scio, Oregon

Dairymen! Weigh and Test Your own Cream

No dairyman has the right to make the statement that a creamery is not giving him a square deal on tests or weights unless he is in position to substantiate that statement by having scales and a testing outfit of his own, and by using them carefully and regularly to verify the weights and tests of the creamery. The Babcock method of testing milk and cream is as certain to give correct results in honest hands as are the balance scales in giving weights, or the yardstick in the measuring of distances. The simple variation in the test of milk and cream is no indication of dishonesty on the part of the dairyman, the driver or the creamery.

The causes of variation in the tests of cream are many. That there is about the same amount of milk, that there is about the same amount of cream and that the separator has been turned at about the same number of revolutions per minute each time in use is no indication that the cream will be the same. Many dairymen believe, however, that the results should be alike, but those who have a testing outfit of their own know that there are many causes of variation in the tests of cream other than the lead pencil of the creamery man.

Before I purchased a Babcock tester I could not be convinced but that the creamery man was cheating, but the outfit soon revealed to me that other conditions were causing the variation in the tests of cream and the creamery man was dealing entirely on the square. There may be some creamery men who use their lead pencils unsparingly on the cream tests of their friends in order to show a profit or to take from some and give to others with the design of getting and holding patronage, but no dairyman has a right to think that or say that

unless he has weighed and tested the cream himself and knows to a certainty that he is right.

To have a sample of cream tested by another creamery, or even by another dairyman is not fair to the creamery one is dealing with. No man has an honest right to place his business friends at the mercy of a competitor or in the hands of some one who has no interest or skill in handling the Babcock test. Any dairyman who neglects to weigh and test his cream must place his business in the hands of the creamery man for results.

Dividing the cream among several creameries can give no true idea of the accurate results of the tests of the cream and can in no way pay for the neglect to attend to one's own business. There is only one method of finding the honest creamery or to get honest returns from the creamery that may be inclined to manipulate the tests and that is by the regular and careful use of the scales and Babcock testing outfit at the dairy by the dairyman. I do not write in the interest of the creamery man, but to urge the great need of the Babcock test by the dairyman that he may satisfy himself that there are many causes for the variations in the tests of cream that he has never thought of, and that he can often save himself much money by checking up unintentional errors on the part of the creamery.

It is not very difficult to learn to do accurate work with the Babcock testing outfit. It is only a question of taking accurate samples, carefully following directions in each stage of the operations, and then reading the results on the graduated necks of the test bottles with an understanding of the proper allowance to be made.—Oregon Journal.

Mr and Mrs Fred Ohlemeier have moved to the house just west of the Parker hospital.

W. E. CHRISMAN SCIO

Candidate for Republican nomination for County Commissioner for Linn county.

Scio Milling Company

SUCCESSION TO
SCIO ROLLER MILLS

INCORPORATED DECEMBER 28 1904

We do a General Custom Milling Business. Flour and Feed on Sale. Wheat Bought and Exchanged for Flour. We are in the Field for Business and Will Treat You Right

Bad Cold Quickly Broken up
Mrs Martha Wilcox, Gowanda, N. Y., writes: "I first used Chamberlain's Cough Remedy about eight years ago. At that time I had a hard cold and coughed most of the time. It proved to be just what I needed. It broke up the cold in a few days, and the cough entirely disappeared. I have told many of my friends of the good I received through using this medicine and all who have used it speak of it in the highest terms." Obtainable everywhere.

Look over our list of clubbing offers on page 2, and if you don't see what you want come in and talk it over. We have many others just as good.
