Hugo's Practical Side.

It may not be generally known that Victor Hugo used to draft the advertisements of his own books, instead of leaving the task to his publishers. His correspondence with his Belgian publishers gives the following example of the great novelist's advertising style: "After the middle ages, the present time: Such is the subject of Victor Hugo's double study. What he did for Gothic art in 'Notre Dame de Paris' that he has done for the modern world in 'Les Miserables.' The two books figure in his scheme of work as two mirrors reflecting the whole human life." An encouraging example to those young authors who cannot make up their minds how much modesty is enjoyed by the best literary traditions.—London Globe.

—so now there's no need to sacrifice pride to economy

Now for the first time your sense of pride and strictest economy are fully satisfied in one and the same car. Never before has a stylish, comfortable, completely equipped car been offered at anywhere near so low a price. This Overland costs only \$695. But it is every inch an Overland—a perfect beauty. Though a small, light, economical car, it is roomy, strong and powerful. And it is absolutely complete to the last detail. Of course it is electrically lighted and started; and the electrical control buttons are located on the steering column—right at your finger tips. As for easy riding, this newest Overland is not to be compared with any other car of its size. The buoyant cantilever rear springs, the deep, soft upholstery, and large tires provide real riding comfort. You should have a car this spring—and if you want top class at bottom price, it must be this Overland, for no other car meets both these requirements. The demand for this car is in excess of the factory's capacity. Order yours now, to avoid delay. See me right away.
