can maintain our present prices and if possible, advance them in the near future. We might say in this connection, that this will be the first car of butter of fresh churned make, that has been shipped to an Eastern market.

The only way we can account for such a surplus of butter on the market at this time of the year is on account of the mild open winter, and the large production, also the unsatisfactory industrial condition all over the coast. The lumber concerns all over the northwest have practically closed their plants throwing thousands of men out of employment. Many of the wholesale houses in the large cities have reduced their force, all of which has an indirect effect on the consuming power of the public.

We are giving you this outline of conditions so that you will be thoroughly posted and can talk to your patrons with intelligence, also as to our future plans in maintaining the market and, if possible, keep it from declining. Also it might be well to get into communication with your newspaper and publish some of the contents of this letter with a view of informing the farmers and others interested, as to the real market condition of the country on butter.

We should think that the matter of shipping a carload of butter to the eastern market would be quite interesting news for most people at this time, as a good many are under the impression that thousands of pounds of eastern butter has been shipped into the Portland market each year. This is not so, and to our knowledge there has not been a single car of eastern butter shipped into portland this winter.

Yours very truly
Hazelwood Company.

The legislature will probably submit an amendment to the state constitution to the people, by which the governor will be empowered to veto a single item in a bill. This is a reform which has been due many years.
